

Interaction Optimizer™

A Complete Workforce Management Solution

INTERACTIVE INTELLIGENCE
Deliberately Innovative

PRODUCT SNAPSHOT

Interaction Optimizer brings innovation and workforce management together as the core component of Interactive Intelligence's WFM solution for small to large-sized contact centers. Seamlessly integrate the Interaction Optimizer application module with the *Customer Interaction Center®* (CIC) contact center platform, and the benefits reach beyond simple forecasting and scheduling.

Improved agent effectiveness and satisfaction

Make any agent workforce inherently more effective with Interaction Optimizer's intelligent forecasting, scheduling and real-time adherence. Also maximize service levels by ensuring adherence to assigned shifts and company goals. Most critically, however, use Optimizer's easy scheduling submissions to raise job satisfaction levels among agents, and to keep supervisors content by eliminating confusing spreadsheets and multiple last-minute scheduling changes.

More accurate forecasting via historical ACD data

By leveraging CIC's multimedia platform and historical ACD data, Interaction Optimizer generates forecasts based on specified dates, media type, skill sets, and configurable time units—functionality that WFM product integrations from separate vendors can't achieve.

Enhanced scheduling and adherence

Along with combining historical data and projections for more accurate forecasts and scheduling, Interaction Optimizer weighs agents' time-off requests and schedule changes to balance anticipated interaction demands with agent skills and preferences. Thereafter, Interaction Optimizer communicates real-time adherence that lets supervisors ensure consistent, quality service levels at all times.

Fully-integrated... no 3rd-party integration required

Interaction Optimizer's robust functionality eliminates the need for 3rd-party integrations, upgrades and prolonged implementation times. Coming from Interactive Intelligence, Interaction Optimizer provides a common interface with the CIC system's *Interaction Administrator®* and *Interaction Supervisor™* applications for a single support center that lowers the total cost of ownership over similar solutions.

KEY FEATURES

Forecasting

- Leverages CIC's historical ACD data to make forecasting a seamless process
- Anticipates interaction volumes for phone, e-mail, Web chat
- Assigns optimal headcount to manage given forecasts and assists HR in agent planning, from 25 agents to thousands

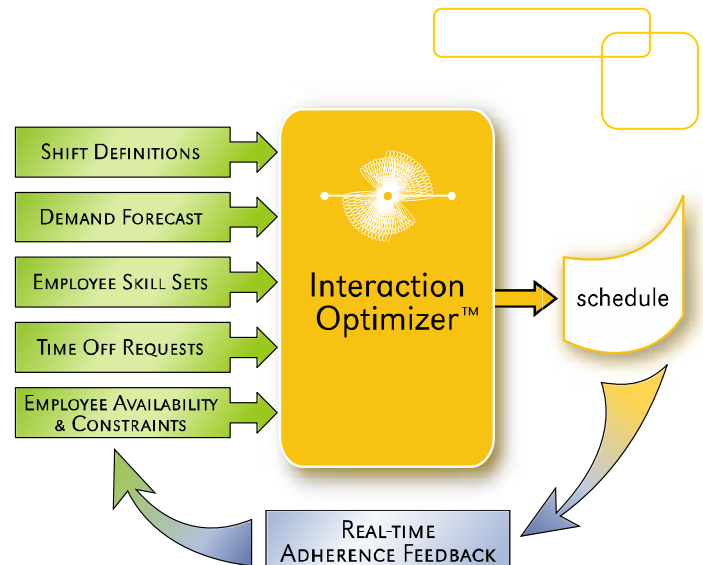

Scheduling

- Generates agent schedules that accommodate vacation time, schedule changes and variances, labor/ union laws, employee availability and skill matching
- Simplifies scheduling process for administration; identifies shortages and overages in demand
- Improves employee/ administration satisfaction with scheduling flexibility and "what-if" scenario capabilities

Real-time Adherence

- Monitors agents' adherence to schedule at all times
- Provides proactive control & feedback mechanism
- Eases service level monitoring via on-demand recording feature (optionally available)

Interaction Optimizer

A Complete Workforce Management Solution

Forecasting

Get a clear picture of interaction volumes.

Interaction Optimizer forecasts interaction volumes and the headcount required to meet them.

Use the Interaction Optimizer solution to track historical patterns, determine future interaction volumes, and schedule headcounts accordingly to meet demands.

Powerful multimedia contact center forecasting

In supporting phone as well as e-mail and chat volume, Interaction Optimizer provides an intuitive, easy-to-use mechanism to anticipate phone calls, e-mails and chats—allowing contact centers to deliver interactions to the right agents with the right skills the first time.

Scheduling

Manually scheduling agents is a waste of time.

Let Interaction Optimizer do it for you.

Interaction Optimizer eases scheduling so administrators can focus more closely on profit-driving contact center operations and optimizing their agents' effectiveness. The Interaction Optimizer module lets you generate schedules while accommodating the following constraints by day, week, month and/or agent.

- Vacation time
- Schedule changes and variances
- Labor/union laws
- Employee availability
- Agent skill matching

Use a volume and headcount forecast to determine the schedule based on requirements and constraints in your environment. Instantly identify your shortages and overages in demand. Using Interaction Optimizer results in higher employee and administration satisfaction due to its flexibility and "what-if" scenario capabilities.

Real-time Adherence

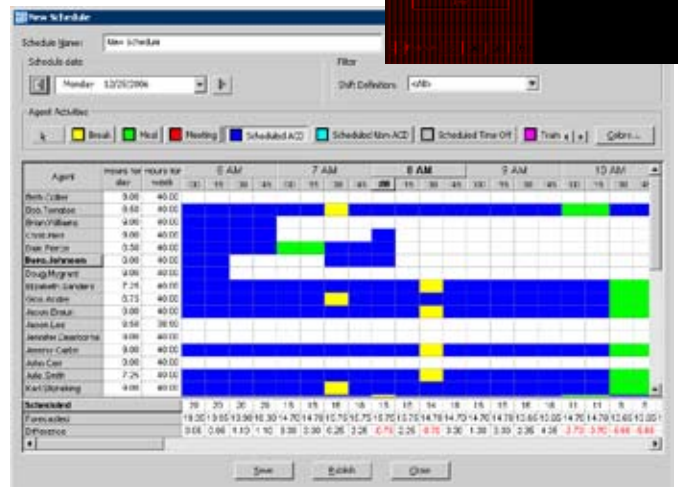

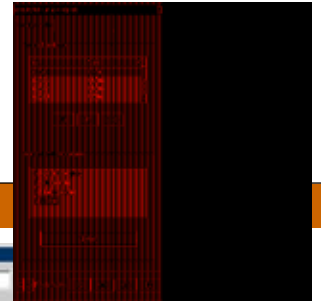

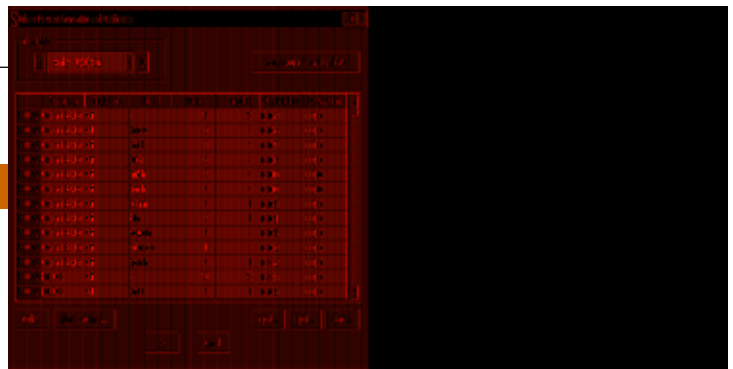

View agent and schedule information... instantly!

Interaction Optimizer is the window to your contact center.

Contact center administrators gain more control over schedules when they can readily access adherence questions and scheduling discrepancies. Interaction Optimizer's Real Time Adherence (RTA) module simply completes the Workforce Management solution.

Interaction Supervisor for real-time monitoring

Along with instant access to a published schedule's real-time status, Interaction Optimizer's integrated Interaction Supervisor plug-in drives immediate feedback, proactive contact center management and assessments of agent performance throughout the month.

Innovation. Experience. Value.

Interactive Intelligence® provides the most innovative products and services available today for the contact center, enterprise IP telephony, enterprise messaging, and self-service automation.

Solutions that are modular in nature, built with proven, award-winning products that push the edge of technology to deliver a truly best-of-class offering.

At Interactive Intelligence, it's what we do.
