

+

= Improved Assessment

+

= Greater Participation

+

= Higher Test Scores

Howard Technology Solutions has partnered with Turning Technologies to bring you a comprehensive K-12 assessment solution - **TouchPoints for Education**. This innovative assessment package provides educators to district level administrators with the ability to track students through every point in the assessment process including: formative and summative assessment, alignment with state standards, and both individual and aggregate reporting.

TouchPoints for Education

The combination of these powerful assessment tools will dramatically increase the ability of educators to make data-driven decisions that will improve students' academic performance.

Take the

surprise out of state standard test results. Track student comprehension at every point of the learning process from the first day to the last. Turning Technologies offers customized student response systems to meet your objectives. Our team can work with you to create your ideal student response technology solution.

A K-12 Bundled Student Response Kit Includes:

- The TouchPoints for Education package - TurningPoint, QuestionPoint, TestingPoint, ResponseCard keypads or vPad, our virtual keypad solution.
- USB receiver.
- Compact carry case.
- 12 months of support/warranty.
- Instructor led web based training.

Add VantagePoint for comprehensive tracking of student learning and performance (sold separately).

Turning Assessment into Engagement

- 100% native to Microsoft® Powerpoint® provides minimal learning curve.
- Easily align interactive assessment content with integrated state and national standards.
- TurningPoint AnyWhere (bundled with TurningPoint) allows educators to poll across all PC applications including MS Word, Adobe® PDF documents, internet browsers, and more.

TurningPoint

QuestionPoint™*

Strong Questions. Key Points.

- With 100% integration into TurningPoint and TestingPoint student response software, simply load identified question content for formative and summative assessment.
- Save time and resources during curriculum development with high quality content questions aligned to state standards

Testing Made Simple.

- Combined with our self-paced testing ResponseCards, TestingPoint allows students to progress at their own pace.
- 100% integration with Microsoft Word - no need to learn proprietary software.
- Save administrative time with instant assessment results of homework and self-paced quizzes and tests.

TestingPoint

Reporting from Every Vantage Point

- Secure, web-based analytics application that enables superintendents, curriculum directors, principals and teachers to see quarterly AYP and performance reports in real-time at the district, building and classroom level.
- Improve performance on state testing through aggregate tracking and reporting to determine early intervention needs.
- VantagePoint allows educators to automatically load assessment results for analysis.

Open Architecture

- Leverage the benefits of other educational technologies.
- Export Session data tool allows users to automatically transfer assessment sessions into gradebook software programs and learning management systems.
- TurningPoint integrates directly with WebCT and Blackboard for easy and efficient data sharing between applications.

ResponseCards®

Gather multiple student responses in real-time with today's most innovative keypad technology. Our ResponseCards are lightweight, exceptionally durable and scalable to fit virtually any size audience. New with TurningPoint 2008, hardware setup is plug-and-play ready!

ResponseCard IR

- Ideal for small to medium groups
- Infrared technology
- Up to 90 foot range

ResponseCard RF

- Ideal for small to large groups
- Radio frequency with USB receiver
- 2-way verification
- 200 ft range (400 ft coverage)
- RF does not require line of sight

ResponseCard XL

- Ideal for small to medium groups
- Infrared technology
- Up to 90 foot range
- Self-paced testing mode
- Easy to read LCD screen

ResponseCard XR

- Ideal for small to large groups
- Radio frequency with 2-way text verification
- 200 ft range (400 ft coverage)
- Alphanumeric entry
- Self-paced testing
- Easy to read LCD screen with multiple line display
- Largest storage capacity in the industry
- USB port for firmware upgrades

vPad Virtual Keypad

- Compatible with desktop PCs, notebooks and pocket PCs
- All standard ResponseCard functionality
- 200 ft range (400 ft coverage)
- Alphanumeric entry
- Text entry capabilities support fill-in-the blank and essay response
