Newline **INTERACTIVE TECHNOLOGY** and **ACCESSORIES**

Captivate your students by creating a learning environment that isn't confined to the boundaries of a physical classroom. To do that, Interactive Technology is the key. It opens up endless learning possibilities and stimulates thinking and learning skills. It allows you to approach traditional teaching models in an imaginative, non-traditional way, helping students to understand new concepts more thoroughly and integrate newly acquired knowledge more completely. It's education, the way it should be.

Newline TRUTOUCH IB Series Interactive Panels

Take collaboration to the next level with a impressive interactive display. TRUTOUCH lets you experience presentations on a touch screen that redefines clarity. With multi-Touch technology on a larger scale, TRUTOUCH displays allow multiple students to work on the screen at once. Simply annotate on images, utilize a basic whiteboard application and more without needing to download software to any of your own devices.

- Collaborate with anyone, anywhere, no matter what device or system they use.
- 1080p and Ultra-High Definition resolutions give your presentations quality clarity.
- Don't worry about losing a pen, use your fingers.
- Comes in 55", 65", 70", 80" and 84" screen sizes.

Newline TRUTOUCH Mobile Interactive Display Stands

Ensure optimal viewing with portable, height-adjustable display stands designed to accommodate people of differing heights, as well as those who are seated or mobility-challenged.

- Adjustable stands enable users to position Newline interactive displays to one of several preset height levels.
- Brackets accommodate Newline Interactive monitors in portrait or landscape orientation
- Casters at the base lock to keep the screen in place

Newline TRUCAST Wireless Presentation Solution

Lose the wires, not the connection, with the TRUCAST wireless presentation system. Connect multiple devices, from a laptop, smart phone or tablet, to an interactive display. Share your screen with anyone in the network or pass control to a new presenter. Newline's TRUCAST works just like a regular router, but helps keep your connectivity both easy and secure.

- Project up to 4 devices at once so your whole class can broadcast their work and collaborate.
- No limited number of software downloads means everyone in your school can participate.
- Connect to Ethernet, your own WiFi or use TRUCAST's independent, private WiFi network.
