About Howard

Howard Technology Solutions, founded in 1998, is a division of Howard Industries, a billion-dollar, privately held company headquartered in Ellisville, MS. As a leading manufacturer and provider for computer hardware and related equipment, we are committed to creating, providing, and supporting superior products and services that meet or exceed the needs of our customers.

While technology may be complex, we believe obtaining it doesn't have to be. This simple fact, along with our strategic partnerships, enables us to offer a rich portfolio of over 250,000 products ranging from desktops, notebooks, tablets, servers, networks, printers, digital cameras, and accessories to custom designs and presentation carts.

Howard Technology Solutions has been satisfying business, educational, governmental, and medical customers for over 10 years. When it comes to technology, Howard has you covered!

IBM servers
Outstanding performance

IBM BladeCenter® blade servers support a wide selection of processor technologies and operating systems to allow clients to run all of their diverse workloads inside a single architecture.

Increase storage efficiency.

Keep pace with storage demands while increasing storage efficiency.

Exagrid Disk-based Backup Solution Simple, Turnkey Appliances

The ExaGrid system is a plug-and-play disk backup appliance that works with existing backup applications and enables faster and more reliable backups and restores. Customers report that backup time is reduced by 30 to 90 percent over traditional tape backup. ExaGrid's patented byte-level data deduplication technology reduces the amount of disk space needed by a range of 10:1 to as high as 50:1, or more, resulting in a cost that's comparable to traditional tape-based backup.

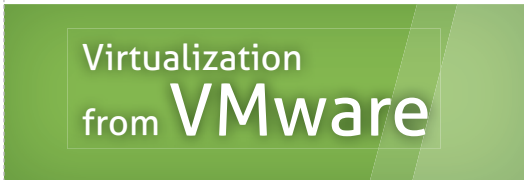

SPECTRA LOGIC

Spectra Logic Solutions Continuous data growth

Spectra Logic's archive and backup data storage tape products support all aspects of secondary storage, are compatible with every major tape and disk format, and supply integrated encryption and key management options through the intuitive BlueScale® 10 interface.

VMware Virtualization Transforming virtualization

VMware delivers powerful, proven virtual infrastructure solutions that enable state and local governments, federal government agencies and military installations to increase the efficiency and cost-effectiveness of their IT operations.

HP Storage Systems Maximize scalability

Industry-leading network storage products and solutions for your enterprise.

Maximum scalability, industry-leading performance, a fully integrated suite of centralized management tools.

The most powerful wi-fi solution in the industry

The Xirrus Wi-Fi Array is the most powerful Wi-Fi solution in the industry with enough capacity and performance to replace switched Ethernet to the desktop—ideal for offices, cubicles, conference rooms, auditoriums, campuses, warehouses, remote users, emergency response, etc.

- *Delivers 4x more coverage than traditional APs*
- *Supports 100's of users per device*
- *Up to 8X the bandwidth and 14X the throughput of traditional APs*
- *Multiple tunable radios, automatic channel, cell, interference, and load optimization of the RF environment*
- *Integrated Wi-Fi Firewall, integrated spectrum analyzer, and dedicated Wi-Fi Threat Sensor, and rogue AP blocking*
- *Resiliency at the radio, Array, uplink, backhaul and power level*
- *Line rate encryption within the Array - no bottlenecks*
- *Modular design and flash upgradeable allows for quick field upgrades*
- *75% less devices, cabling, switch ports, and installation time*
- *Security policies can be created for different types of users to control parameters such as time-of-day and day-of-the week access, QoS, and traffic limits*
- *Clients location can be mapped to building floorplans based on location of the client relative to the Array.*

Train, view, and capture.

Meet your management and training objectives, reduce travel time and expenses, and improve overall productivity with interactive solutions from Howard. Interactive technologies enable global flows of information that promote active learning, facilitate effective collaboration, and improve data-driven decision making. Regardless of the size of your organization or budget, or whether you spend your days in the boardroom or briefing room, we have the interactive solution that is right for you.

MimioTeach & MimioView
Mimio innovation makes it possible

What if you didn't have to buy an interactive whiteboard to get an interactive whiteboard? With MimioTeach you can transform any whiteboard into an interactive whiteboard. The MimioView document camera is fully integrated with MimioStudio software and the MimioTeach system, making it easier than ever to capture images and present them in your training presentations.

Mimio Interactive Whiteboards

Reliable performance - all day, every day

If your training room is not already equipped with a standard whiteboard, Mimio Interactive Boards are the answer—an “all-in-one” interactive whiteboard with clear advantages over the competition. The Mimio Interactive Board is powered by Mimio Studio software, the easy-to-use, all-inclusive suite of tools and resources that will give you interactive training a positive edge.

MimioCapture

Automatically save what you write

The MimioCapture™ ink recording system is the perfect accessory to MimioTeach technology. It allows you to save whiteboard notes and drawings to your computer as you teach or train.

MimioPad Wireless Tablet

Train on the move

With a MimioPad™ wireless tablet, you can control your whiteboard from anywhere in your boardroom. It comes with a wireless USB receiver that communicates automatically with the MimioTeach system.

Mimio Wireless

Go wireless for even greater convenience

When your training room presents physical challenges, the Mimio Wireless option lets you operate your Mimio Interactive system without a USB cable.

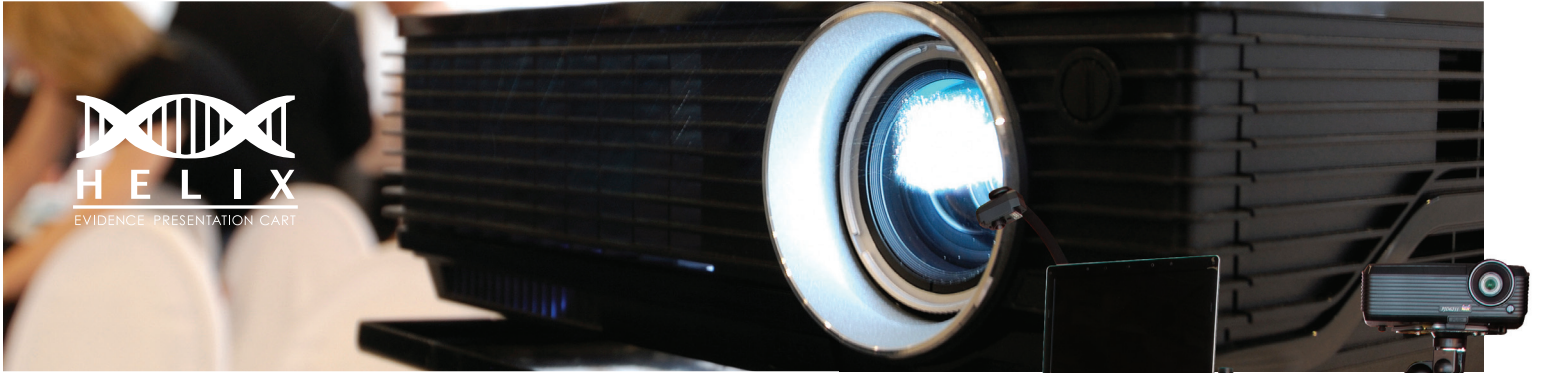

MimioVote Assessment System

Maximize Participation

- Get real-time results and eliminate manual test correction.
- Track progress, as well as scores tallied over time, through instant feedback.

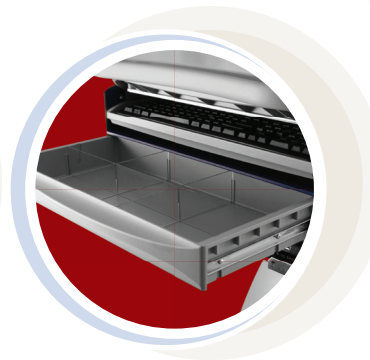

Transforming boardroom presentations.

Just as the double helix is the main constituent of DNA, the Helix evidence presentation cart will become the crux of courtroom presentations.

What can you do with this cost-effective device? Ensure physical evidence, crime scene photos, and other computer-generated information are exhibited with infallible clarity. Display digitally stored charts, testimony, and graphics in a fast-flowing format using a variety of software. Locate disposition transcripts within seconds. Available in four convenient models, select the cart that best serves your technology needs. Your choice of a combination computer, projector, and document camera securely mounted onto a sturdy, highly ergonomic mobile base makes this a smart addition to the trial process. Who wins with the timesaving Helix? From judges and jury to counsel and onlookers, virtually all who enter the courtroom will benefit from this advancement in litigation.

Keep your presentations smoother and your audiences closer.

EPSON

Epson BrightLink 485Wi Interactive WXGA 3 LCD Projector
The ultimate solution in bright, interactive widescreen performance

Make almost any wall — or even tabletop — interactive with the sleek and powerful BrightLink 485Wi projector. This high-performance, network-ready projector and interactive pens integrate interactive functionality into one machine without the constraints or expense of an interactive whiteboard. Annotate from any source — directly on projected images sent over the network or on content from DVD/Blu-ray® players and document cameras — without the use of a computer.

Take complete control.

Consider how much time you spend changing the air conditioning, adjusting the lights, and prepping the audio/visual equipment before a meeting or presentation—there’s no doubt that using different, separate systems requires both time and effort. Thankfully, integrated control system technology streamlines the process and improves user experience. With a centralized control system you won’t waste time or distract your audience by walking around or using different programs to change settings for each of the different components of the system.

PoleVault Systems

Complete AV switching and control systems for ceiling mounted projectors

Extron PoleVault® Systems are complete, easy-to-use AV switching and control systems designed for rooms with a ceiling mounted projector. PoleVault Systems use economical twisted pair cable for transmitting signals and include network connectivity for Web-based AV resource management, monitoring, and control. Extron PoleVault Systems take their name from the unique PMK 550 Pole Mount Kit that securely mounts and conceals system components above the projector.

SP Controls Pixie Family

Four figure control. Three figure price tag.

Elegant and complete control system in an astonishingly trim form factor.

Crestron Media Manager

The network hub for your business

From infrastructure to interfaces, Crestron offers the power of total integrated control and connectivity on a single platform throughout the entire facility.

Deliver fresh, relevant information to a wider audience in seconds.

- 100% web-based (unlimited user access via a browser)
- Access from anywhere to anywhere
- Single content manager (fully scalable, allows growth over time)
- Popular Image, media formats, combine bulletins, audio, video, data feeds, flexible multi-window layouts (all in the comfort of your office)
- Better message recall
- Attractive, informative
- Easy, fast customization
- Target messaging – Desktop messenger, screensaver, RSS publisher, text messenger
- Conference room on-site manager – Allows you to schedule meetings right at the room sign.
- Revenue producer for your business

Intelligent remote monitoring and management backed by 24/7 IT.

Howard Technology Network Services has the resources to serve any size organization, ranging from small offices / home offices (SOHO) to enterprise-level corporations. Our network engineers are experienced in the latest network technologies and industry best practices to ensure you are provided with the most reliable and up-to-date products and solutions.

With Howard Technology Network Services, you will never receive a "one-size-fits-all" approach – all of our technologies and solutions are tailored to satisfy your individual business needs. Because we are an independent resource, you can be confident that you will receive honest and objective insight into industry-standard technologies and solutions, equipping you with the ability to find reliable and cost-effective solutions which best fit your networking needs – not a manufacturer's.

- **Discovery**
HTS will meet with you, the customer; to discuss what your technology needs are.
- **Planning**
This phase includes a set of recommendations as to how to position yourself in the current technology trends.
- **Implementation**
HTS team has years of experience in implementation of networks ranging from small business to enterprise levels.
- **Measurement**
We stay in constant contact with you for months after the implementation to ensure that the solid product built meets and exceeds all expectations.

Installation services

Along with a wide range of audiovisual (AV) products, Howard also offers affordable turnkey AV solutions that include design, procurement, and installation services by a team of CVE and CTS industry-certified technicians.

Whenever, wherever...

Tacticomm is the solution for your command and control needs.

In the aftermath of a major disaster, whether natural or man-made, first responders must act quickly in establishing command presence, resource control, and communication interoperability. This capability is equally important for agencies tasked with maintaining public safety at large-scale events and organizations charged with a quick response to non-emergent incidents. That is where Tacticomm comes in.
