

The technical services you need from the professionals you can trust.

The most important consideration in obtaining technical services is ensuring that they are designed and implemented to your specific needs. With **Howard Technology Solutions**, you'll never feel that you are receiving a "one-size-fits-all" response, but rather a tailored solution to satisfy your real-world needs. From network consulting and integration to technical management and product procurement, our team of trained professionals is committed to you.

Network Consulting Services

Many of our professional services are eligible for E-Rate discounts and are on various contracts. These services are typically project driven and include any or all of the following:

Network Assessment:	Identifying your organization's needs through an interview and survey process.
Network Infrastructure Design:	Addressing your hardware, software, bandwidth, and/or communications issues for both LANs and WANs.
Network Consulting Services:	Reviewing your current network designs for verification or complete network specification design.
Network Analysis:	Performing detailed analyses of your network's performance before making optimization recommendations.
Security Services:	Designing and implementing firewall applications that provide security around technology communications. This includes setting up application gateways, packet filters, circuit-level gateways, and proxy servers for secure access via your network, intranet or the Internet.
Disaster Recovery Planning:	Assisting clients in the planning phases of disaster recovery.
Voice Over Internet Protocol (VoIP):	Designing and implementing of VoIP communications applications that provide secure, reliable communications solutions using data networks.

Technology Management Services

Our technology management services most frequently include monitoring and maintaining network hardware and operating systems from a centralized management center for a contracted timeframe. However, we are here to fulfill the day-to-day technology support your organization requires – **just ask**.

Product Procurement Services

Once you experience our product procurement services, we are confident you'll agree that they are the ultimate pre-sales consultation. **Why?** We allow you to remain in the driver's seat but with the guided advantage of our proven expertise in obtaining, configuring, and overseeing delivery of the equipment we procure on your behalf.

Innovation **at work** for you.
