

SafeGuard® Easy - Mobile Data Protection

Data Encryption protection for Laptop, Desktop, Removeable Media & PDA's

Challenging Fact:

Data is becoming increasingly vulnerable as mobile computing becomes more widespread. Sensitive information is often stored on notebooks and removable media without any firewall protection. Mobile devices are always at risk of loss or theft.

Solution:

Utimaco Safeware provides both complete data encryption of stored data and a secured user authentication procedure ensuring impenetrable data protection for all notebook, desktop PC's, removable media and PDA's.

Utimaco Safeware:

- #1 worldwide software vendor for desktop and notebook data protection
- Founded in 1983 with over 20 years experience in data protection
- Only publically traded company in the space (strong growth/financials)
- Broadest solution offering in space
- More than 3.5 Million SafeGuard Easy licences sold
- Leader in Gartner - 'Mobile Data Protection: Magic Quadrant'

Product Highlights:

- Complete protection of PC's, notebooks, data, and removable media against unauthorized access.
- Easy enforcement of company wide-security policies
- Transparent operation for users & easy-to-use for administrators
- Efficient management, administration and support
- Successful global solution for hard disk encryption
- Common Criteria Certified, FIPs compliant - Certification in process
- Vendor Neutral Full Hard Disk Encryption Solution

Ease of deployment

- Smooth integration into existing IT environment
- Scalable roll-out mechanisms for software and configuration
- Support for existing administration and distribution mechanisms eg. Microsoft
- Active Directory management tools from third party vendors
- Flexible, centrally enforceable configuration rights for end-users

Easy to use

- Intuitive user interface, adaptable to company needs, flexible logon methods, adaptable to user needs.
- Reduced help-desk workload through simple reset of forgotten passwords

Key Features:

Security

- Pre-boot authentication using password or eToken
- Vendor Neutral Full Hard Disk Encryption Solution
