

Audio Visual Overview **INSTALLATION | PROGRAMMING | DESIGN**

What's the secret to an audiovisual-rich instructional environment? Howard! From projectors, document cameras, and sound amplification systems to lecture capture devices, control systems, and more, Howard has everything you need to teach 21st Century skills, foster collaboration, and integrate multimedia tools into instruction. Along with a wide range of audiovisual (AV) products, Howard offers affordable turnkey AV solutions that include network consulting, design, programming, installation, and training by experienced, industry-certified technicians. Each system is designed to satisfy industry standards and expertly engineered to ensure high reliability. From start to finish, Howard is your source for AV solutions.

- **Installation Services:** Audio Visual & Computing, Cabling, Distance Learning & Video Conferencing, Network & Data Centers and Wireless Access
- **Programming Services:** Controls Systems and Video Conferencing
- **Consulting Services:** Design, Network Assessments, Outsourced Labor and Wireless Surveys

Projectors

Transform your classroom to meet the demands of a new, tech-savvy generation of learners with full-featured, interactive projectors. Integrating technology into your classroom adds a multi-dimensional aspect to curriculum, capturing attention and engaging students more fully. In addition, projectors facilitate collaboration by enabling students to connect and communicate with one another—from class to class and around the world! 21st Century classrooms not only improve teaching, but also spark an interest in learning in a way that traditional teaching methods just can't.

BenQ, Boxlight, Casio, Christie, Epson, Hitachi, Infocus, NEC, Panasonic, Sanyo, Sony, Toshiba and Viewsonic

Control Systems

Control your classroom with state-of-the-art, centralized control systems from the biggest names in the technology industry. Control systems are a unique blend of advanced cloud technologies, user-friendly software and industry-leading hardware that enable you to access and operate complex A/V presentation tools and more with the touch of a button. They're simple to configure and easy to use! Deliver multimedia presentations that make an impact, with stunning visuals and crisp, clear, reliable audio that captivates and engages students in ways that make learning seem effortless.

AMX, Crestron, Extron, FrontRow, Kramer and SP Controls

Lecture Capture Devices

Improve the learning experience for all your students and raise achievement levels with Lecture Capture technology. It's an easy and affordable way to create video lessons for online and blended learning that enables students to review class videos at their own pace, whenever and as often as they want. It helps reinforce learning for students with a variety of learning styles and can lead to better test scores. Lecture Capture is also great for flipping the classroom and recording student presentations and for keeping students current if they miss a class. Lecture Capture is the new must-have technology.

Crestron, Extron, FrontRow, Lumens and VBrick

HOWARDedu also provides Managed, Support, Physical Security and Video Surveillance Services, On-site Technicians, IT Outsourcing, Training and Professional Development for Campuses.
