C.2 Network Video Solutions **SURVEILLANCE**

IP-based video surveillance is the security solution of choice for schools and campuses everywhere. It deters crime, violence, and misbehavior and stretches your security budget by allowing you to monitor more locations with fewer personnel. From network cameras and video management software to complete systems—all easy to install, simple to operate, and readily adaptable as your needs change—Howard can help secure your campus.

AXIS COMMUNICATIONS

Indoor & Outdoor Video Surveillance Network Solutions

Far too often we hear about educational facilities that have been exposed to vandalism, violence or burglary. As a result, valuable resources are lost to cumbersome repairs and investigations. A network video solution from Axis enables you to stay focused on your core business – education. With Axis, you get a surveillance system that enables remote access to video from any number of branch offices from a single location. The complete system is easily connected to your existing network infrastructure and computers, thus keeping installation and maintenance costs low.

It also gives you a future-proof tool to: / **Increase the security for students and staff** / **Prevent violence and theft** / / **Minimize the costs for vandalism** / **Investigate incidents and identify suspects** /

CISCO

IP Video Surveillance Network Manager

Cisco IP Video Surveillance designs provide access to video at any time from any network location, allowing remote monitoring, investigation, and incident response by remote physical security staff or law enforcement personnel. Designs leverage existing investment in video surveillance and physical security equipment and technology, and allow products from various vendors to interoperate in the same network.

XProtect® IP Video Management Software

Milestone Systems is the world's leading provider of open platform IP video management software (VMS) and its XProtect VMS is used by more than 100,000 customers worldwide. XProtect is designed with open architecture. This means that all XProtect products are compatible with more IP cameras, encoders and digital video recorders than any other VMS manufacturer's products, giving you the freedom to mix and match hardware to fit your needs and budget.

XProtect® Enterprise is efficient open platform IP VMS that has features to help operators view multi-site locations with an unlimited number of cameras. Users can quickly react to incidents and efficiently export video. The software provides exceptional situational awareness with multi-layered interactive maps, sophisticated alarm handling and a unique Camera Navigator for tracking moving objects.
