

C.1 Network Infrastructure Solutions **WIRELESS**

Give teachers and students the freedom to roam without losing connectivity; support BYOD collaboration, and accommodate a suddenly increased number of users and equipment with ease. You can do it with a reliable and robust Wi-Fi infrastructure—a wireless network that employs the latest secure-networking protocols; one designed to optimize feature functionality, while reducing configuration and maintenance requirements. Let HOWARDedu make wireless work for you.

Indoor & Outdoor Wi-Fi Network Solutions

Xirrus provides the only enterprise Wi-Fi networks specifically designed for the real-time demands of an all-wireless world. Xirrus' cloud managed Wi-Fi solutions are scalable, future proof, easy to use, and provide application control, which makes Xirrus the obvious choice for small, medium, or large-scale Wi-Fi networks.

Xirrus' unique network architecture can scale to double and quadruple the number of users, without performance impact or the need for additional wiring and access points. Because it's designed to evolve with the changes in Wi-Fi technology and standards, you won't need to replace your Xirrus network, even after a decade of use.

Instant Wi-Fi Solution

Aruba Instant is the only controllerless Wi-Fi solution that delivers superior Wi-Fi performance, business-grade security, resiliency and flexibility with the simplicity of zero-touch deployment.

Mobility & Wireless Solution

Cisco Mobility and Wireless Solutions bring your IP network to more users throughout the campus environment while improving safety, administration, as well as 21st century teaching and learning.

Identifi Wireless Products

Identifi represents a complete line of 802.11ac access points and appliances. Identifi Wireless is available in various configurations and price ranges to meet any network requirement.

MSM-802.11n Access Points & Mobility Security Systems

HP Wireless brings intelligence to the network edge, providing scalable, secure, WI-FI access points anywhere, anytime, either autonomously or centrally controlled by MSM Controllers.

Meraki

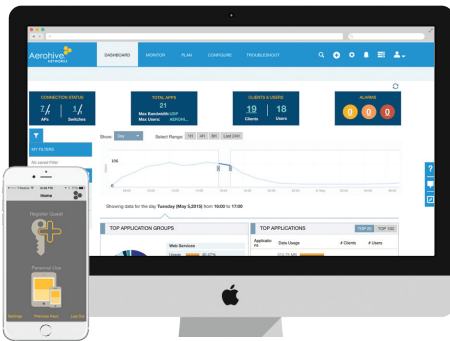

Meraki Cloud Managed Wireless Solution

With intuitive cloud-based management and self provisioning, self-optimizing, and self-healing hardware, the Meraki solution is easy to deploy and manage without training or dedicated staff.

UniFi High Performance Enterprise Wi-Fi System

UniFi comes bundled with a non-dedicated software controller that can be deployed on an on-premise PC, Mac, or Linux machine; in a private cloud; or using a public cloud service.

Connected Campus with Simplified Management

To prepare colleges for the mobile-first generation, Aerohive created a wireless LAN architecture specifically engineered for the Gigabit speeds that we see today, by eliminating the need for wireless LAN controllers and optimizing access points for high-density classroom connectivity.
