21ST CENTURY CLASSROOMS

Howard Technology Solutions

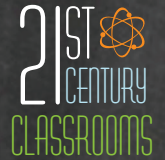

21ST CENTURY CLASSROOMS

Preparing students to succeed in today's information-driven world requires a new kind of teaching. By means of technology, classrooms are dramatically transformed, enabling teachers to meet the demands of a new, tech-savvy generation of learners. 21st Century classrooms integrate video and other media to support instruction, establishing connections to life outside the classroom and addressing real-world concerns. In this way, students are helped to develop valuable, real-world skills like computer literacy, problem solving, critical thinking, and self-direction. Technology is the catalyst for bringing this change into the classroom and Howard is the company bringing that technology to you.

YOUR EXPLORATION BEGINS HERE

Start building your 21st Century Classroom today!
