Includes Howard LifeGuard	•	

Q: What is Core 2 Duo?

A: Dual-Core processors are processors that have two complete execution cores in one processor package running at the same frequency. Both processors share the same packaging and the same interface with the chipset memory. However, they operate as distinct execution cores to provide next-generation performance.

Q: What is VPRO technology?

A: VPRO is a hardware platform that focuses on Built-in Management, Proactive Security, and Energy Efficient Performance. VPRO allows out-of-band remote management and security of VPRO certified customers. With VPRO you can inventory, troubleshoot, and manage your system remotely with the highest level of security. A VPRO system even has the ability to quarantine itself from the network when it detects a virus. Because VPRO works out-of-band the computer can be cut on and off remotely to further decrease the amount of time it takes to remotely fix a problem.

Q: Does Howard Technology offer installation services?

A: Yes, Howard Technology has a Network Services Group that can install systems as well as network security analysis and other technical services. Call us today for a quote.

Q: Whom should I contact for support?

A: Call Howard Technology Solutions for world-class support and service if there are any questions about the desktop. Customer support is available online at <http://www.howardcomputers.com/support>, through phone at 1.888.323.3151, by email at tech@howardcomputers.com or by traditional mail at Howard Technology Solutions, 36 Howard Dr., Ellisville, MS 39437.
