Feature	Benefits
Support for the latest processor technology	1333 Front Side Bus means this system can run the absolute latest processors from Intel®.
Integrated Gigabit NIC	The integrated gigabit NIC makes the G35 capable of high-speed network connectivity.
Integrated Dual-Video	Run two monitors simultaneously without the need for an additional video card.
Intel® Graphics Media Accelerator X3500	3-D enhancements facilitate greater game compatibility with support for hardware vertex processing, and improved realism with support for Microsoft® DirectX® 10, Shader Model 4.0, and OpenGL 2.0. Intel® Graphics also supports the highest levels of the Microsoft® Windows Vista® Aero experience.
Intel® Fast Memory Access	Updated Graphics Memory Controller Hub (GMCH) backbone architecture improves system performance by optimizing the use of available memory bandwidth and reducing the latency of the memory accesses.
Intel® Flex Memory Technology	This technology makes upgrades easier by allowing different memory sizes to be populated and remain in dual-channel mode.
