

NEXT GENERATION TECHNOLOGY EMAIL ARCHIVING SOLUTIONS

Company email has become a business-critical database requiring protective management, to which email archiving provides a cost-effective and reliable solution. By creating a time-stamped, unalterable copy of your organization's email for as long as you want, this long-term storage system frees up your email server and allows fast and easy record retrieval for all emailed business communications, transactions, or intellectual property. Whether your focus is on improving mail server performance, enhancing employee productivity, or ensuring compliance to corporate guidelines and regulatory or legal mandates, email archiving safeguards your business.

ArcMail Technology is focused on providing simple, secure, and cost-effective email archive solutions to the small and medium sized business market. ArcMail's product strategy is to provide an email archive product that improves the end-user experience, reduces the load on IT resources, and safely and securely retains the business information contained in emails.

The Barracuda Message Archiver is a complete and affordable email archiving solution, enabling you to effectively index and preserve all emails, enhance operational efficiencies and achieve regulatory compliance needs.
