FOCUS ON…

creating a safer educational environment.

Keep your students, staff and visitors safe with an end-to-end security solution, managed by AXIS Camera Station.

It's not easy making sure your premises are safe and secure, around the clock.

Axis can help. As the market leader in network video, our intelligent products and technologies have been designed to work seamlessly together – giving you a complete package to help increase safety and security in your educational environment.

Get a clear picture of dark stairwells, corridors and weather-beaten car parks. Monitor and manage entrances and restricted areas remotely. And communicate with staff, students and unwanted visitors. With AXIS Camera Station it couldn't be easier.

With Axis, you can do it your way. Choose an-end-to-end solution that's ready straight out-of-the-box with our wide range of network recorders.

Or, if you need to adapt to existing policies or specified equipment, don't worry – you can build your own system, using our software and your choice of PCs and servers. The choice is yours. So, you can relax, knowing that your premises – and everyone in them – are in the safest hands.

Everything you need

Control them all with AXIS Camera Station, the easy-to-operate software interface

+

Video – for clear images

Access control – for secure premises

Audio – for communication

Visitor management – for extra security

Control – for integration with other devices

Do it all, with AXIS Camera Station

Make security management simpler than ever with AXIS Camera Station – an intuitive video management system that covers all your needs.

> **Flexible** – view and control your entire security system from anywhere

> **Fast** – manage incidents as soon they occur and quickly export high-definition evidence

> **Comprehensive** – increase your awareness of site activities for a safer environment

> **Simple** – forget about complicated training and maintenance

AXIS Camera Station works seamlessly with our entire range of network products, so you can create the right solution to meet your needs.

Stay safe and secure

With Axis, you won't just get the right system to suit all your needs; you'll also get value for money and first-class support. You can rely on an end-to-end solution from Axis to deliver the best performance, all day, every day. And as the needs of your premises grow or change, you can extend it quickly and easily.

Use our out-of-the-box network recorders preloaded with AXIS Camera Station as a base to build your solution.

Increase your awareness

> Wide camera portfolio for high resolution video

> Use vandal-proof camera models to ensure system operation

> Get discreet designs that blend in with the environment

> Share experiences by using our broadcasting cameras for event broadcasting and e-learning

> Use analytics to detect unwanted behavior such as loitering and perimeter breaches

Secure the premises and manage visitors

> Remotely manage the entry of visitors, such as parents, delivery drivers and maintenance personnel

> Receive alerts if cameras are being tampered with or if a door has been forced open

> Control restricted areas – secure doors, corridors, IT areas and equipment rooms

Enhance health and safety

> Integrate emergency buttons to trigger alerts, recordings or audio messages

> Control other equipment such as turn-on lights, lock doors or open gates

Improve communications

> Use clear, live audio to communicate with students, staff and unwanted visitors

> Trigger pre-recorded messages to inform and notify
