DAKTRONICS®

EXTREME PRODUCT TESTING

> "Lightning had hit our original scoreboard and caused major problems. Daktronics was great with how they handled the service on the board, which is why we keep going back."
>
> Jim Slaughter
> Retired Athletic Director
> San Angelo ISD
> San Angelo, Texas

Daktronics state-of-the-art product reliability lab provides our engineers the information needed to design and build tough-rated products made from high quality parts. Since 2009, we continue to use a wide variety of systems and testing equipment, some similar to those used by the automobile and aerospace industries, ensuring the longevity of our products. For detailed statistics on our reliability lab, visit **Daktronics.com/productreliability**.

ENVIRONMENTAL SIMULATOR
Our lab technicians place entire video boards through this massive 4,500 cubic foot chamber to test its durability through blistering heat, freezing temperatures and humidity.

HIGHLY ACCELERATED LIFE TESTING
Combining environmental variables, such as temperature shock and vibration, stresses the product to the point of failure to determine the product's functioning limits.

We invite you to tour our lab or go to daktronics.com/productreliability

WATER INTRUSION
High-pressure water jets drench displays to test how well enclosures protect internal components and ensure performance against moisture.

SALT FOG
A 5% salt solution and sweltering heat up to 95° F (35° C) gauge a display's ability to withstand the corrosive effects of coastal air.

WEATHER-SEALED OUTDOOR DIGITS

Don't let corrosion bring your scoreboard down on game day. Daktronics weather-sealed digits have a $\frac{1}{8}$ inch (3mm) layer of weather-tight silicone gel applied to the front and back of the digits. This gel completely seals out moisture creating an unmatched resistance to the harshest of conditions.

This weather-seal significantly increases reliability and product performance. No other LED scoreboard manufacturer offers this kind of protection. Stay ahead of the game—and corrosion—with Daktronics weather-sealed digits.

"I wanted to match the old-school feel of the ballpark similar to the old, white bulb lights. With the white LEDs, it looks like a million bucks."

Chad Shepherd
Marshall Gates Foundation
Kearns High School
Kearns, Utah

Thick coating on the front and back of the digit
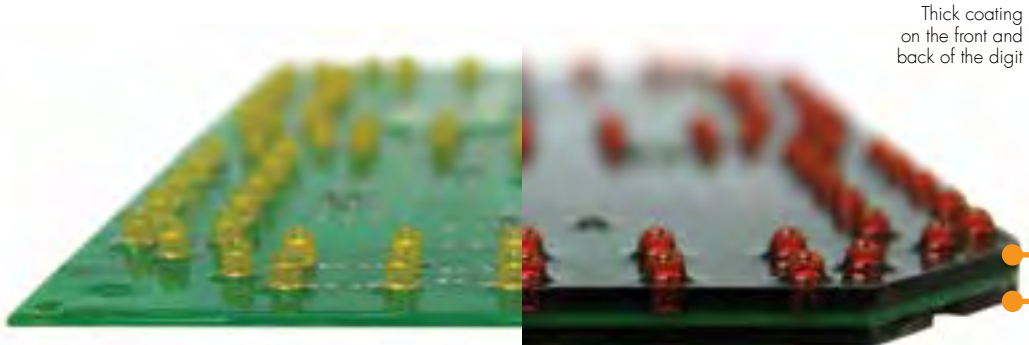

CONFORMAL COATING
A thin layer on the front and back gives minimal environmental protection.

DAKTRONICS GEL COATING
A thick layer of gel adhered to the front and back of the digit completely seals out moisture.

PANAVIEW® DIGITS

White LED digits are a rising trend for outdoor scoreboards. White will complement any team color and can be used to create a modern, fresh-looking display.

Daktronics PanaView® digits fully use the specific cone of light emitted by LEDs. This produces wider viewing angles and a brighter appearance than other LED digits. These digits are available in amber, red or white.

To further customize the scoreboard, mix and match digit colors within one display. Clock digits can be red, while the score and stat digits are amber. This icon appears by scoreboards that are mixed digit capable.

INDOOR DIGITS

COLORSMART® COLOR-CHANGING DIGITS

Daktronics patented ColorSmart® digits respond to the ever-changing events of the game. ColorSmart LED technology follows the game's events by changing colors between red, amber and green according to which team is ahead and whether the game clock is stopped, running or under one minute.

This icon appears by the scoreboards that are upgradeable with ColorSmart digit technology.

Game clock running and home team ahead shows green

Game clock stopped and home team behind shows red

Game clock under 1 minute and teams tied shows amber

Game clock stopped shows red and home team ahead shows green

White LED digits are now available for indoor scoreboards.

PANAVIEW® DIGITS

White will complement any team color and can be used to create a modern, fresh-looking display.

Daktronics PanaView® digits are robust and strong, specially designed for Daktronics Tuff Sport® scoreboards. They offer every money-saving advantage of LED technology and provide an outstanding viewing angle, outshining previous LED technologies.

UNIVIEW® DIGITS

Daktronics exclusive, patented UniView® digits provide the advantages of LED technology while retaining a clean, sleek "bar" look. This digit uses a specially designed diffuser to promote a uniform flow and dramatically increases the viewing angle of the scoreboard.

SCOREBOARD PERSONALIZATION

THE MOST COLOR OPTIONS IN THE INDUSTRY

Daktronics is the only company providing more than 150 color choices at no additional charge. Regardless of the color, Daktronics offers high-quality, long-lasting display finishes designed to resist fading due to ultraviolet rays.

All Daktronics scoreboard paints and primers are lead-free and chromate-free, which makes the paint safer for the environment.

For more specific information on scoreboard color options, please request the Daktronics Scoreboard Paint Color brochure.

TEAM NAME MESSAGE CENTERS

Daktronics Team Name Message Centers, (TNMCs) are available for most indoor and outdoor scoreboard models and are excellent for tournaments and multi-school facilities. TNMCs feature cost-efficient LED technology and enable operators to display names of home and guest teams. Add a TNMC to most existing scoreboards with a retrofit kit.

Double-stroke

Single-stroke

TEAM NAME

Change the HOME caption of the scoreboard to your school's mascot or team name.

COLORED CAPTIONS

Select colored captions for the scoreboard to match the striping and school colors. Outlined captions are available for an additional fee.

STRIPING

Add striping to a scoreboard to coordinate with school colors. Choose from more than 50 colors.

› Display speed of pitch to 99 MPH

SOLAR POWER

Go green—and save some green—with solar power. In certain situations, it may be impractical for you to run electrical service to your scoreboard. The solar power kit uses one or two 40-watt solar panels, control box and batteries to provide 24V of renewable energy where you need it. Solar power performance varies depending on the current season and display location. Refer to the scoreboard index for scoreboards that may receive solar power, and ask a Daktronics representative if solar power is right for you.

FOOTBALL SCOREBOARDS

Trusted by high school football teams and collegiate teams alike, Daktronics offers the best lineup of products in the industry to design the most exciting game-day atmosphere for your fans and players. We'll help you create the best scoring system to fit your field starting with the main scoreboard that provides vital information such as Time Outs Left, Down, To Go and Quarter. As your program grows and scoring needs evolve, our integrated systems make it seamless to add on the perfect touches at your pace.

ENDLESS OPTIONS

LOGO/SPONSOR PANELS Identify the facility and recognize sponsors

STRIPING Choose from 50+ colors to outline your scoreboard

CAPTION COLOR Select from 50+ colors of vinyl captions

RADIO CONTROL Increase control flexibility, reduce installation costs

TEAM NAME CAPTION Showcase a custom home team name

TEAM NAME MESSAGE CENTERS (TNMC) Personalize team names

BACKLIT CAPTIONS Improve readability for nighttime viewing

ELECTRONIC CAPTIONS Switch sports modes with the touch of a button

MESSAGE DISPLAYS Boost excitement with vivid animations and stats

VIDEO DISPLAYS Entertain and inform fans with live, full-color video

RED PANAVIEW® DIGITS Excellent digit readability

AMBER PANAVIEW DIGITS Complement school colors

WHITE PANAVIEW DIGITS Provide maximum brightness

MIXED DIGIT COLORS Vary the game and team digit colors

ACCENTS Add detail and interest to the scoring display

DAKTRONICS AUDIO Bring superior sound quality to your facility

HORN Trigger automatically or manually as needed

INDIVIDUAL DIGIT SCREENS Protect each digit

NETTING Protect the entire display from ball impacts

SOLAR POWER Power the scoreboard with solar energy

WHAT MAKES DAKTRONICS DIFFERENT?

WHITE LED DIGITS
Our white LED digit upgrade option creates a modern, fresh-looking display and complements any team color.

SCOREBOARD CLAMPING
Eliminate the need to drill into steel or weld with our supplied aluminum clamp-style mounting brackets.

WEATHER SEALED DIGITS
Weather-sealed digits and scoreboard drivers ensure durability and long life.

INTEGRATING YOUR SYSTEM

MESSAGE DISPLAYS
› Showcase player stats and headshots
› Advertise upcoming games and events
› Generate revenue through sponsorships

VIDEO DISPLAYS
› Show live video, replays and profiles
› Enhance classes by having students produce content
› Generate sponsor revenue with advertising

OUTDOOR AUDIO SYSTEMS
› Experience the impact of a single-point sound system
› Identify your school on printable mesh
› Choose from standard sizes or custom

SPORTSOUND®
AUDIO SYSTEMS
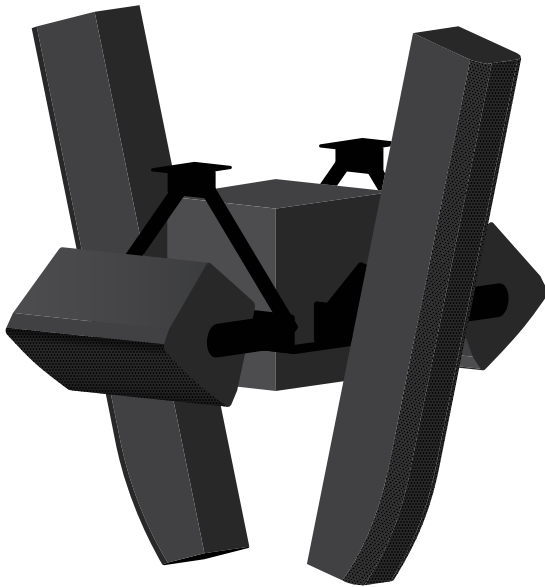

Wingate University Wingate, North Carolina
BB-2126, SSN-250

SSN-250
H: 4'-7" 1397mm* **W: 3'-4"** 1016mm **D: 2'-11"** 889mm

The Sportsound® 250 indoor system provides audio for a variety of mid-sized, indoor gymnasiums. The single-point system can be mounted directly to the ceiling structure. This system's speakers can be adjusted horizontally or vertically. Positioned in the middle of a gymnasium, this sound system provides even coverage and overcomes crowd noise.

This system is available in either white or black speaker clusters.

*Dimensions may change depending on speaker adjustment angles.

SSN-150
H: 8' 2438mm **W: 2'** 610mm **D: 1'-5"** 432mm

The Sportsound 150 indoor sound system provides audio for a variety of small, indoor gymnasiums. The single-point system is permanently wall-mounted with speakers adjusting horizontally and vertically. Durable sound cabinets protect internal speaker components from air-filled sport balls. Providing even coverage throughout the gymnasium, this sound system overcomes crowd noise.

This system is fully assembled when shipped, keeping installation time and costs to a minimum.

OUTDOOR SPORTSOUND AUDIO SYSTEMS

SS-1500HD
H: 6' 1829mm **W: 8'** 2438mm **D: 3'-6"** 1067mm

The Sportsound 1500HD sound is suitable for outdoor facilities with an average max capacity of 8,000 fans. A step up from the 500HD model, the 1500HD has a broader coverage pattern and a higher decibel rating, better suited for longer throw venues. This system also works great in smaller facilities looking for that extra punch of sound. Both the speaker cabinet and control rack are fully assembled and ready to be installed right out of the box.

Multiple team logos   Sponsors   Animations

SSD-1500
H: 6' 1829mm **W: 8'** 2438mm **D: 3'-6"** 1067mm

Daktronics digital audio façade combines next generation ProPixel® Freeform LED Sticks and a SS-1500HD sound system for an exciting avenue to get fans pumped up and generate revenue by displaying crowd prompts and sponsor information. A retrofit kit for an existing SS-1500HD is available.

SS-500HD
H: 3' 914mm **W: 8'** 2438mm **D: 3'-6"** 1067mm

The Sportsound 500HD is designed to provide audio for a variety of outdoor facilities. The single-point system speakers adjust horizontally, providing even coverage and the ability to overcome crowd noise up to 15 rows high. This sound system provides intelligible speech and full range music for in game announcements, rich music and halftime events.

Internal components of the single speaker configurations can be adjusted. These adjustment options offer installation flexibility without compromising on aesthetics. Installation time is minimal thanks to being fully assembled when shipped.

Track scoreboard

Soccer scoreboard

Large message displays work great as all-in-one scoring displays or when paired together with a traditional clock/score scoreboard for "hybrid" scoring.

CUSTOMIZATION

Standard scoreboard templates are easy to modify and allow for complete customization of game information and statistics—simply drag and drop. Showcase names of individual participants and play animations or sponsor messages in place of score to keep fans engaged.

FLEXIBILITY

Matrix, or "universal," scoreboards are a flexible scoring solution because of their ability to display scores, statistics, announcements and advertisements. Use one scoreboard for multiple sports or events on a shared field. Changing between different modes is as easy as pressing a button.

VIDEO DISPLAYS ON THE RISE

Video displays are becoming a rising trend for schools everywhere. Daktronics has sold thousands of video displays; over 300 of these are placed in high schools.

REVENUE IMPACT

Generate revenue for your new video display or athletic program by showcasing advertisements for businesses in the community at any sporting event.

CURRICULUM

Incorporate your video display in the classroom and provide students a new opportunity that can lead to future career interests. Students have the chance to create content for games and even run the video display equipment themselves.

"Our students have the opportunity to create slides in class and help run the board at all the events. Students like the challenge, the chance to be creative, and the reaction they get from students, staff, and fans at the events."

Jeff Nix
Ste. Genevieve High School
Ste. Genevieve, MO

ALL VIDEO IS NOT THE SAME

All of our products start in the research and development stage. Last year, we spent over $24,000,000 in research and product development to make sure our products remain the best in the industry.

Daktronics high-contrast HD pixel layout

Competitor

Our video displays, even in direct sunlight, provide sharper contrast and superior brightness. Fewer LEDs and a darker display face provide more pronounced blacks, while custom-engineered LED louvers deflect the sun, improving color integrity.

INDOOR VIDEO DISPLAYS

Create the focal point of your gymnasium with a Daktronics indoor video system. Display zoning and video overlays offer prime real estate to recognize sponsors and showcase in-depth game information. Popular video display sizes are shown below.

Ridgefield High School, Ridgefield, Washington
BB-2103, 160x288-10, DA-1500

160x288-10
BB-3107

Combine a video display with a team statistics scoreboard and incorporate statistics software to provide an engaging game experience.

Jump to the Matrix Display Index >
for all video display sizes.

336x576-6
BB-3125
SD-3103 @ 2

Add a video display to your scoreboard and player statistics displays to complete the scoring system.

Lake High School Uniontown, Ohio
312x552-15, SS-1500HD, DA-1006

OUTDOOR VIDEO DISPLAYS

Bring the big league to your backyard on a Daktronics outdoor video display. Use live and pre-recorded video, along with instant replays, to ensure everyone in the stands catches all the game action. Popular video display sizes are shown below.

180x234-20
Modular football scoreboards

Personalize an outdoor scoring system by choosing the video display size that fits your facility. Then pick scoreboard modules that complement the video display.

Jump to the Matrix Display Index >

for all video display sizes.

408x720-15
SS-1500HD
DA-1000
Arch identification panel

Use a video display with zoned content areas and a sound system that fits your facility to create a dynamic scoring option. Personalize even further with a square truss and arch ID panel.

"We are using the new video display in conjunction with the video engineering class at our high school. The students will operate and oversee the video production at each home football game."

Ken Paige
Facilities Director
Cartersville High School
Cartersville, Georgia

SHOW CONTROL
SYSTEM

Daktronics Show Control System combines an easy-to-use display control interface with powerful content compositing, state-of-the-art playback hardware, cutting-edge image processing and dynamic live data integration to offer a complete set of powerful production tools all in one package for your video display.

CREATE THE CONTENT
› Click and type to add text
› Upload athlete or sponsor images from your library
› Arrange the text and images on screen with easy content layering

STORYBOARD EDITOR
› Quickly organize or rearrange content
› Apply various graphic transitions between content

ORGANIZE CONTENT
› Group similar content pieces into a customized structure

DISPLAY CONTENT
› Click one button to instantly deliver content to the display
› Control and edit the playlist of content in the playback queue

Animation preview

Expanded button

Collapsed button

FOR TECHNICAL SPECIFICATIONS

ALL SPORT
CONSOLES

Daktronics control consoles feature LCD screens to provide scoreboard operators with visual feedback. These All Sport® control consoles include a time-of-day display mode, $\frac{1}{10}$ of a second timing, radio control to eliminate the need for signal wire and memory retention in case of power loss.

ALL SPORT 5000/5500
Weight: 7 lb 3kg
H: 4.25" 108mm **W: 16.25"** 413mm **D: 9"** 229mm

The All Sport 5000 and 5500 series controllers are versatile units designed for intermediate and large scoring systems. Both consoles have color-coded keys and a large backlit character display.

The All Sport 5500 is for controlling ColorSmart scoreboards and compatible stats displays and shot clocks.

ALL SPORT 1600
Weight: 4 lb 2kg
H: 4.25" 108mm **W: 8.5"** 216mm **D: 9"** 229mm

The All Sport 1600 series controllers are designed for basic scoring systems. Commonly used functions and a quick start guide are printed on the face of the controller.

RC-100
Weight: 0.4 lb 0.2kg
H: 4.7" 119mm **W: 2.7"** 69mm **D: 1.2"** 30mm

The RC-100 is a wireless device that controls many smaller displays. The handheld unit operates using a 900 MHz radio with an internal antenna and a rechargeable battery.

RADIO COMMUNICATION

Radio control eliminates extra wiring from the All Sport® console to the scoreboard and saves money on installation costs.

Daktronics 2.4 Ghz spread spectrum radio has 500' (152m) line-of-sight signal range for indoor scoreboards and 1500' (457m) range for outdoor scoreboards. This option features five broadcast groups and 64 non-interfering channels. The multi-broadcast feature has great control flexibility, especially in multi-court facilities.

Battery packs and additional rugged console carrying cases are available.

OMNISPORT® 2000e
Weight: 14 lb 6kg
H: 4.25" 108mm **W: 20.5"** 521mm **D: 9"** 229mm

This timing console is the first in the industry to use Ethernet connectivity, which dramatically simplifies setup. Three backlit LCD screens indicate current race information, lane status and completed lengths for up to 10 lanes. The OmniSport® 2000 console has multiple modes, such as those for track timing, and memory retention in case of accidental loss of power.

For more information on aquatics timing options, see the Daktronics aquatics catalog or visit **Daktronics.com/aquaticsbrochure**.

REMOTE START/STOP
These handheld units are convenient and easy to use. The game clock remote manually starts and stops the game clock and sounds the horn. The shot/play clock remote is used for shot clocks in basketball and play clocks in football. It features a start/stop switch and buttons for two different reset times.

CHARACTER GENERATOR
Weight: 0.4 lb 0.2kg
H: 6" 152mm **W: 4"** 102mm **D: 1"** 25mm

The All Sport Character Generator (CG) is a lightweight portable device that allows coaches and athletes to get more from their game film. Real-time scoring data is recorded to game footage, improving the way games are evaluated and eliminating the frustration of having incomplete information on film.
