

# One System to Drive All Systems

## About FileWave

Since 1992, FileWave has provided business, education, and government customers with industry-leading systems management software to effectively, and efficiently, secure and manage devices, applications, and content from one easy-to-use console. With offices throughout the USA and Europe, FileWave provides worldwide support, when you need it.

## Key Components

- Multi-Platform Support
- Cross-Platform Network Imaging
- File-Level Deployment
- Integrated Inventory
- Patented Self-Healing Technology
- License Management
- End-User Kiosk
- Device Security
- Advanced Reporting

## More than just an MDM provider

FileWave is more than just an MDM (mobile device management) provider; FileWave is a complete cross-platform systems management solution that covers both client (desktop) and mobile devices. FileWave solves the many challenges of managing a diverse population of devices and users by ensuring its customers have all of the tools needed to successfully implement and support their users' devices and needs throughout all phases of the product life-cycle (image, deploy, manage, and maintain). It is this holistic approach to system management that differentiates FileWave from other providers.
