# A better way to learn

Teaching is changing. Fast. Old-school techniques and tools are no longer up to the task. Today, an effective education provides students with true comprehension that they can apply to the challenges they face in today's world.

Mimio has been a leader in educational technology for the past 19 years, providing affordable, easy-to-use, and effective solutions. Mimio technology empowers both educators and students in all forms of learning, to enable real understanding.

Whether it's whole-group or small-group instruction, formative assessment, collaborative learning, or personalized instruction, Mimio software and hardware help teachers put these strategies into action, easily and affordably.

" Since we began using the MimioClassroom products... teaching is more effective, learning is enhanced, scores are increasing, and excellence is being achieved."

Lisa Cundiff
Instructional Technology Director

mimio®
a better way to **learn**

Better solutions. Better results.

Mimio products incorporate easy-to-use technology that empowers teachers and engages students. And while students respond to this better way to learn, teachers discover it's a better way to teach. Experience flexible, affordable, and effective solutions for the way you teach today.

Teacher-Led Learning

Mimio interactive whiteboard technologies offer an engaging, affordable, and easy way to provide teacher-led instruction. Whether your school needs a portable or a fixed interactive whiteboard, an interactive touch projector, a touch board or even a brilliant, high-definition LED display. Mimio has a solution to fit your needs and budget.

Assessment of Learning

Mimio gives you options to measure student understanding in real time. The MimioVote™ assessment is a tool that students actually enjoy using — and it makes assessment easier on your teachers and your budget. Already own mobile devices and want to make the most out of them? Use them with the MimioMobile™ app for assessment via numeric, short-answer, and short-essay questions. Open-ended response questions will help students practice for the Common Core Assessments.

Collaborative Learning

Mimio tools enable students to learn more effectively through collaboration in a student-centered, interactive environment. The MimioPad™ wireless pen tablet and MimioMobile app for Apple and Android mobile devices let students share their group work in real time. Mimio's tools help teach the collaboration skills so important for success in today's classroom.

Personalized Learning

Mimio's interactive tools allow teachers to present lessons that are effective and engaging. Our collaborative software and app allow students to work together to gain a deeper understanding of concepts. And our assessment tools make it possible for teachers to really understand what individual students are learning, so they can customize the learning environment to meet each student's needs. Truly creating a better way to learn.
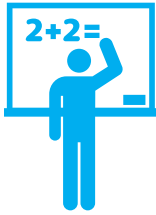

Meet the Mimio Classroom

It's a world-class classroom. And with teaching solutions from Mimio, it really isn't as out of reach as you may think.

We are mindful of budgets and your need to leverage the products you already have. Whatever your classroom's current configuration, Mimio products work with it. Mimio hardware, software, and mobile app let you purchase only what you need now and continue using the tools you currently own. You can expand as your budget allows and your needs change and grow.
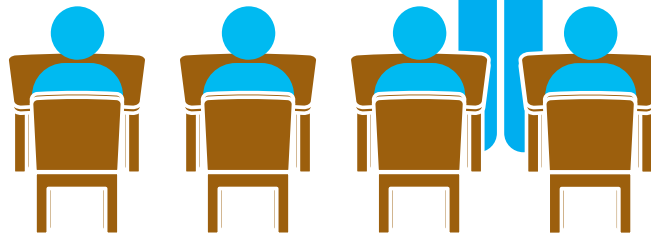

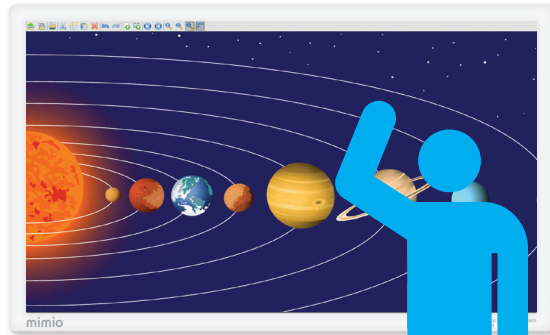

Our technology and software are supported by training resources and exceptional customer support. And our vibrant online community at mimioconnect.com lets educators discuss ideas and share lessons with their peers.

A better way to learn. Mimio.

Teacher-Led Learning

Every Mimio product is designed to put students at the center of the educational environment, so they're more engaged, more collaborative, and more motivated. But the teacher still drives the instruction. So we make teaching easier and more rewarding, while making learning more exciting. When technology is at its best, it paves the way, rather than getting in the way. Teachers can do what they do best – simply teach.

Assessment of Learning

Differentiating instruction is one of the keys to student achievement. But in order to personalize learning, teachers need to perform real-time formative assessment. Teachers can do just that with one of two options: the MimioVote assessment, or your school's mobile devices equipped with the MimioMobile app. They can adjust their lessons accordingly, and use the data to direct small-group or individualized instruction as necessary.

Collaborative Learning

Mimio's advanced software and mobile app facilitate student collaboration, which empowers them to work together in developing critical thinking skills and building their knowledge across all curricular areas. These skills are essential for their future success and align to the new U.S. Common Core State Standards. Whether it's two students working together or many more, they help each other learn more effectively through collaboration.

Personalized Learning

Mimio has designed the technology and software to create the learning environments that work best for each classroom and student. And Mimio assessment tools let educators gauge in real time what their students are comprehending – to give them the information they need to meet every student's needs. Personalizing the learning experience may mean delving further into a topic in whole-group instruction, breaking students off in small groups, or covering a subject in more detail with individual students. With the help of Mimio tools, educators can create a more engaging and effective classroom.
