

UNITRENDS CLOUD SERVICES DATA SHEET

Backup, Archiving
& Disaster Recovery

NO LIMITS CLOUD™ PROTECTION

Embrace the cloud.

No Limits Appliances meet No Limits Cloud™. Replicate your entire on-premise appliance to the cloud for one low price, without crippling your network.

Be prepared for when disaster strikes. Extend your backup strategy to a full disaster recovery plan in the cloud.

Slash your total cost of ownership (TCO). Streamline your DR practices and simplify your infrastructure with backup in the cloud. No need for secondary off-site servers or tape.

Take control of your budget. Get the most for your IT dollar with No Limits Cloud, or choose metered plans if you want to pay per 250 GB increment on an annual term.

How Unitrends Cloud services make your life easier:

- Redundant cloud storage ensures availability of your data.
- Retention options so you can satisfy internal policies and industry regulations.
- Advanced WAN Optimization (WO) and in-flight deduplication means that your data transfers to the cloud faster, with less drag on your network.
- Configurable security options with AES-256 encryption capabilities for data in-flight and at-rest.
- Optional seeding available to quickly establish the initial data set in the cloud.
- Hosting in secure SSAE 16 certified data centers for your peace of mind.
- One, three, and five year service terms available.

“There are so many options for accessing backup data and such a high level of support.”

Kevin Littrell
The Catholic Diocese
of Baton Rouge
