1 Desktops & Laptops

Whether you work inside at a desk or out in the field, Howard has the right computer for you. From desktops that include space-saving minis, all-in-ones, and traditional towers to ultra-portable notebook PCs, today's computers offer an incredible array of high performance features and energy-saving capabilities. Integrated, next-generation graphics packages bring amazing new visual dynamics into play for the ultimate in realism—high-quality video playback, sharper images, and richer color. Need one that is as tough as your job? Howard has it—powerful workstations to handle heavy workloads day after day, as well as semi and fully-rugged notebooks for maximum performance in challenging environments.

Projectors & Screens

2

Accelerate decision-making and increase your overall competitive advantage by creating the ultimate collaborative environment. From small and medium conference rooms to executive boardrooms and large training facilities with integrated audio, video displays, and control systems, Howard conference room solutions are expertly designed to suit your space requirements and communications needs. Howard offers a comprehensive line of projection screens that includes electric, manual or rear projection, and portable screens. Howard specialists are available to assist you in creating your own audio-visual-rich, multimedia work environment.

Printers and Scanners

From large multifunction printers (MFPs) that combine up to four devices—printer, copier, scanner, and fax machine—into a single piece of equipment to lightweight, portable printers that complete a mobile workspace, Howard has a wide array of printers to suit your business needs. Printers and scanners simplify the process of linking your physical documents with your digital environment. Howard also offers rugged mobile printers—tough-tested devices designed to handle rough-and-tumble workdays, everyday. Reach new levels of productivity anywhere you work, with the latest in high-quality print technology.

Surveillance Cameras

Safeguard your assets with IP-based video technology that provides flexible, scalable, and cost-effective surveillance solutions suitable for a wide range of industries and applications. From offering preventative security by acting as a deterrent to crime, violence, and misbehavior to providing verifiable evidence in the event of a security breach, IP-based video surveillance systems provide you with the information you need to protect your environment. IP-based video technology can be integrated easily with other security systems, such as alarms, paging systems, and access control. The need for security has never been greater—for businesses and government entities, on school campuses, and at home—so protect yourself with state-of-the-art audiovisual security solutions.

Digital Signage

Create, manage and deliver messages, media and alerts to displays, desktops, smart phones and RSS readers the world over. That is what you can do with Digital Signage. It is an effective, affordable method of communication that can be quickly and easily updated to reflect the very latest information, making it ideal for broadcasting news items, advertising upcoming events, and dispatching emergency instructions. Deliver fresh, relevant information to a wider audience in seconds with Digital signage—timely, cost-effective communication designed to advise, educate, and even entertain.

Servers

If your business requires you to manage, store, send and process data, 24/7, 356 days a year—you need a server. That is the kind of workload they're designed to handle. They include a variety of features not typically found in a desktop PC, such as dual processors, redundant hard drives or power supplies, and hot-swappable components, which allow for on-the-fly upgrades and repairs without ever turning off your system. Not only can they process data faster and more efficiently, but they also provide a scalable architecture that accommodates future expansion. Howard offers pedestal and rack-mount configurations with customizable performance options to suit your business needs.

Professional Services

Many organizations don't require the services of a full-time IT coordinator for technology administration; however, the need for some support remains constant.
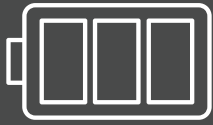

At Howard, we custom fit our services to give you the help you need, when you need it, and without the expense and hassle of hiring and retaining in-house support personnel. We provide customers with a wide range of technical support that includes network consulting, programming, and management services, as well as installation and training by industry-certified technicians. From a few hours every week to days each month, our technology professionals can devise a plan that is just right for your business—one that includes the amount of support and specialized training that you choose. Make life easier with Howard professional services.

Furniture

Furnish your organization with consoles, chairs, conference tables and custom furniture. We source our furniture from industry-leading manufacturers who specialize in room furnishings. All furniture is designed to withstand rigorous 24/7 use and to support operator comfort, vigilance, and productivity over long shifts. Whether you choose to sit, stand, or both, we can provide the right option for you.

Charging Stations

Power up with full-speed, intelligent charging solutions, and give employees and customers a safe, convenient way to recharge all their devices—tablets, ipads, cellphones, and notebooks. From lockers that charge and store electronic devices securely to quick-fix charging stations and charging tables—Howard can assist you in choosing the right charging solution for every environment. They're exceptionally durable, which makes them ideal for usage in high traffic areas. It's a simple way to create a better customer experience, win loyalty, and rack up referrals.
