WHITE MONITOR, Keyboard & Mouse BUNDLE PROMO

LG 24MB35V-W & Seal Shield™

A great combination

Yes, it looks good, but that isn't the only thing that makes the LG 24MB35V-W monitor easy on the eye. This LED backlit IPS professional monitor also includes features designed to minimize eye fatigue, such as anti-glare, 3H hard coating, LG's Flicker-Safe technology that reduces flickering to almost zero, and a one-touch reader mode that limits blue light emissions. It produces images that are crystal clear and consistent in color accuracy from all viewing angles. To top it off, it is Energy Star Qualified™ and EPEAT Gold certified. That makes LG's 24MB35V-W easy on the eye, easy on energy, and easy on the environment.

Seal Shield™ medical grade keyboards and mice range from CleanWipe to Washable and Antimicrobial. Low Profile QWERTY Keyboards with wired, RF, or Bluetooth connectivity make them versatile and a standard setting in the healthcare industry. Partnering with Howard Medical and bundled with an LG monitor, it makes for a great upgrade to any medical area.

Make it a bundle

bundle pricing when you order an LG 24MB35V-W monitor with a Seal Shield™ wired, antimicrobial keyboard and mouse. Call a Howard Medical Representative today for details at **877.856.6441**.
