CARES Act Funding Solutions
Let HOWARDmed Bring Innovative Solutions to Your Healthcare Facility.

The Coronavirus Aid, Relief, and Economic Security Act (CARES Act) was signed into law on March 27, 2020 in an effort to provide emergency assistance and healthcare response for individuals, families, and businesses affected by the 2020 Coronavirus pandemic. Healthcare facilities were included in the act to provide COVID-19 related care. While there is guidance on how the funding is to be spent, it is left up to local institutions to prioritize funding needs. Areas of focus include developing and implementing procedures and systems to improve preparedness and response efforts of institutions, building temporary structures, purchasing supplies, and increasing surge capacities.

Legislation passed on December 21, 2020, allocated additional COVID relief funds to the U.S. Department of Health and Human Services (HHS) and expanded access to mental health services furnished through telehealth past the expiration of the COVID-19 public health emergency.

This document was designed as a planning tool to help decision makers ensure that their institution is appropriately equipped to care for and protect staff, patients, and visitors.

Essential Solutions

Developing and implementing procedures and systems through technology and training improves the preparedness and response efforts of healthcare facilities. HOWARDmed can help!

Audiovisual and Digital Signage
Communicate facility protocols and deliver important information in real-time; increase situational awareness, and promote informed decision making with interactive panels, digital signage, and clear audio solutions.

Rugged Computing Devices
Funds received under the CARES Act may be used to purchase rugged solutions to facilitate safe, mobile healthcare.

Crisis Planning and Consultation
Plan for crisis situations with HOWARDmed's support in providing your healthcare facility with the necessary processes and procedures to enable swift responses to aid in recovery.

Distancing Protocols
Utilize HOWARDmed's clear, protective shields, made from durable, easy-to-disinfect acrylic, to protect against airborne micro-organisms.

Face Masks
Protect staff, guests, and patients with face masks to help prevent the spread of infectious disease from person-to-person.

Patient Engagement Interface
Secure software applications allow patients to access their medical information while in the hospital and at home.

Tablets
Hospital-owned mobile devices can be set to allow patients' a measure of control over their room environment, to discover upcoming events, check vital signs, and get more information about their visit.

Web and Document Cameras
Increase the number of people in your facility with document and web cameras. They provide the perfect mobile solution for televisits, sending important health documents, meetings, and more.

Cleaning Protocols

Cleaning and disinfecting with HOWARDmed's Hand Sanitizer Kiosks, UV Light Sanitization devices, and facility sanitization services reduces the risk of spreading infection.

Facility and Device Sanitization
Prevent the spread of germs and infectious diseases by cleaning and sanitizing facilities and frequently touched devices before they are used.
Hand Sanitization Kiosks
Kill germs and bacteria and reach your audience with targeted messages using HOWARDmed's sanitizer kiosks for an all-in-one solution for any healthcare environment.

Hand Sanitizer
Provide liquid sanitizer for occasions when hand-washing with soap and water is not an option.

UV Light Sanitization Devices
Clean and sanitize objects and surfaces quickly and safely with UV light devices that kill 99.9% of bacteria to create sterile environments.
Cyber Security

Identifying network information vulnerabilities in your security architecture through advanced penetration testing allows HOWARDmed to identify and resolve network and information issues that often go undetected.

Disaster Recovery
An important requirement of the HIPAA Security Rule, and an IT best practice, is to have a formal IT disaster recovery plan. Is yours as up-to-date and reliable as it needs to be? Howard can help.

Endpoint Protection
Don't leave your endpoints open to attack. HOWARDmed has security solutions that work, from firewalls, HIPS systems, and white listing tools to patching and logging/monitoring tools.

Firewalls
Provide security for end-to-end protection across your entire network with next-generation firewalls that provide comprehensive protection against ransomware, malicious botnets, and encrypted malware.

Crisis Planning and Consultation
Mitigate crisis situations with advance planning and support from HOWARDMed. From facilitating day-to-day processes and procedures to enabling swift responses and aiding in recovery, we're with you every step of the way.

Facility Solutions

In addition to network security tools, rugged notebooks, and mobility solutions for the healthcare industry, proper sanitization equipment is essential to the health and well-being of facility employees and healthcare workers.

Occupancy Detection
Estimate on-premises occupancy levels accurately to allow for a better understanding of visitor patterns and how space is used and to increase efficiency and facilitate social distancing protocols.

Distancing Protocols
Make distancing even safer by using HOWARDmed's clear, protective shields. They're made from durable, easy-to-disinfect acrylic and protect against airborne micro-organisms.

Remote Staffing Support
Deliver help, information, and assistance at a safe distance with ultra-connected portals for unmanned, self-guided support in lobbies, outdoors, and more.

Temperature Management
Maintain a healthy environment with HOWARDmed's Contactless Passive Detection Temperature Sensing Kiosk and hand-held temperature measurement devices.

Physical Security

Video cameras and keyless entry systems that contribute to the security and physical safety of facility employees, healthcare workers, patients, and guests are key elements of HOWARDmed's physical security solutions.

Keyless Entry Systems
Save time and money with advanced security, time-determined access control systems, featuring extreme durability and convenience; no need to fumble with keys or re-key locks.

Video Cameras/Systems
Make IP-based video surveillance your security solution of choice. HOWARD offers video cameras and management software, as well as complete surveillance systems.

Point-of-Care Solutions & Technology

HOWARDMed's solutions are designed with the healthcare setting clearly in mind; with a range of features expressly integrated to ease workloads for nurses and other healthcare professionals, as well as to enhance patient care.

Point-of-Care Carts
HOWARDMed's family of carts can be used in a variety of applications that include Charting and EMR, Medication Dispensing, and Nursing Education.

Registration Carts
Registration carts allow for electronic registration through a mobile platform. Optional accessories such as barcode scanners, printers, and a trash bin make these ideal workstations for pre-building entry screening and admission.

Sanitizable Technology
Healthcare facilities depend on sanitizable equipment—medical-grade technology devices that are designed to withstand repeated cleanings with traditional materials, without any damage to exterior coatings or screens.

Wall-Mounted Arms & Cabinets
Strategically placed wall-mounted arms and cabinets increase efficiency by providing more data access points for both patient rooms and high traffic areas.

Barcode Scanners
Ease workloads for healthcare workers and improve patient safety by greatly reducing the possibility of human error with these maximum productivity barcode scanners.

Specialty Printers
HOWARDMed offers a complete selection of medical-grade specialty printers, from mobile wristband printers and label printers, to full-page document printers ideal for use on a mobile cart.

Telehealth Solutions

Helping patients connect with experienced medical and psychiatric professionals with Howard's Telehealth endpoints provides benefits to all, especially when remote connection is necessary.

HOWARD Telehealth Kiosk
Use live, interactive video conferencing to connect patients with healthcare professionals who can offer care and counseling through a HIPAA compliant online platform.

HOWARD Portable Telehealth Kit
Provide on-the-go telemedicine services to all patients, remote or local, with the HOWARD Rugged telemedicine kit (RTK).

Wireless Connectivity

Extending healthcare past facility walls by transforming vehicles into solar powered, Internet-broadcasting hot spots ensures all healthcare workers have access to reliable Internet service. HOWARDmed has you covered!

Instant Mobile Networks for Mobile Medicine
HOWARD has the products and services to ensure that healthcare vehicles are equipped with the most advanced technology available to meet mobile healthcare needs.

Wireless Access Points
Employ the latest secure-networking protocols and optimizing feature functionality while reducing configuration and maintenance requirements with HOWARDmed!
