## AGNES Connect<sup>®</sup>

A Collaborative Patient Assessment Tool for Enterprise-Wide Telehealth Applications

- **Delivers 100% real-time clinical examinations via a virtual platform**
- **Simultaneously capture and share integrated medical device data**
- **Enables complete physician mobility and Remote camera control**
- **Provides enterprise-wide scalability & security**
- **Integrates to EMRs using HL7 or FHIR**

### What Is AGNES Connect<sup>®</sup>?

AGNES Connect<sup>®</sup> is cloud-based telemedicine software that enables remote clinical healthcare providers to capture and share medical device data, exchange documents, stream medical images in real-time, and participate in a live video conference - all in a single web-based platform.

### How Does it Work?

AGNES Connect<sup>®</sup> is operational in minutes - no need to configure back-end servers. The cloud-based platform aggregates clinical device diagnostics, vital signs data, encounter documents and live video conferencing and then securely exchanges that information in real-time to the remote consulting physician.
