

Patient Experience Solutions

Care Team Information

Health Plan and Expected Discharge Date (if set)

Room Controls, Meals, and Entertainment Options

More control for Patients and Families

Tools to empower patients with knowledge and to self-serve during hospital visits to improve care and experiences and clinical outcomes.

More time for Care Teams

Unify data across systems to automate tasks, streamline workflows, and augment time.

Less complexity for Organizations

Secure, scalable, and flexible platform makes it easy to deploy and operate enterprise and consumer apps at the bedside.

Lighting Options

Clinical Lighting

Both the amount (brightness) and color of the light, as well as the ability to control it, have a positive effect on the mood of the patient, their recovery time, and the level of care they receive. Adjustable lighting also can improve patient sleeping patterns and better mental health, improve night shift staff performance and reduce errors.

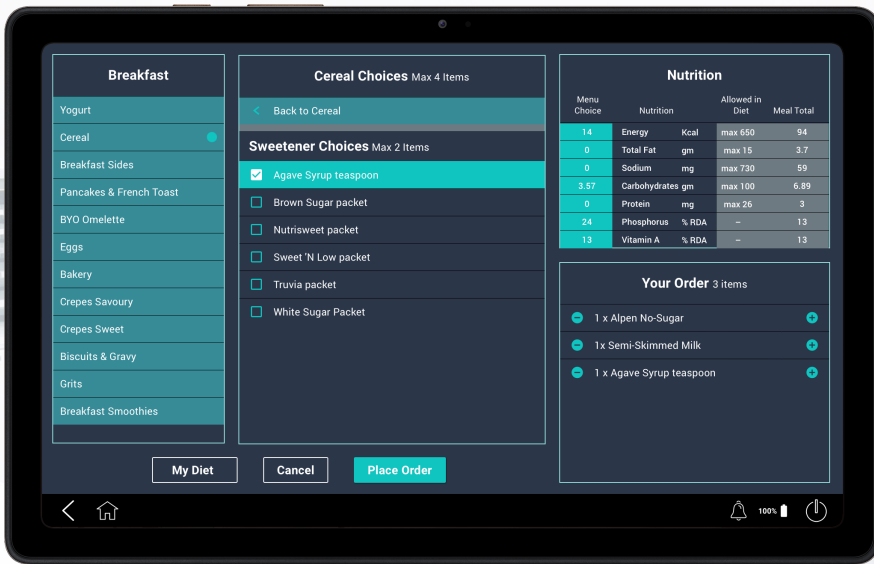

Clinical lighting provides bright clear light that allows healthcare workers to perform effective exams and procedures.

Softer, natural colored light can help patient's circadian rhythms and give them a more restful sleep.

Natural Lighting

Patient Engagement Platform

Give Patients more control over their environment

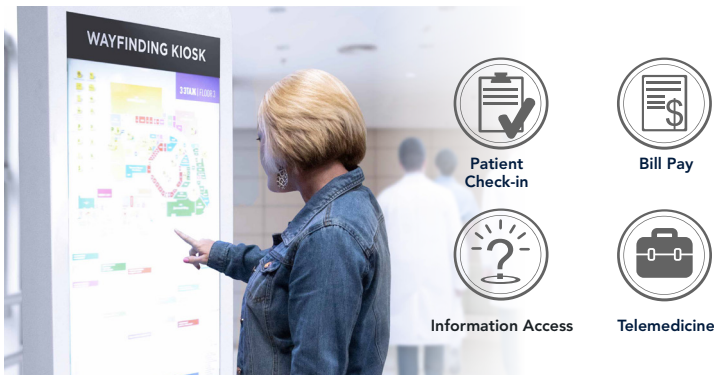

Secure software applications allow patients to access their medical information while in the hospital and at home. Patients can view educational videos and brochures, as well as detailed information on patient-specific illnesses, treatment plans, and post-hospital care recommendations.

Benefits of OneView

OneView's solution not only keeps patients informed about their healthcare team and care plan, but also reduces the workload by routing non-medical issues away directly to the respective department.

Kiosk & Digital Signage

Our Kiosk & Digital signage solutions provide an easy way to offer information and services to a large number of visitors, patients and staff.

Bedside Telepresence

a selection of our premier patient experience solutions partners
