

## **Take Care of What Matters Most**

Nurse Efficiency = a more positive patient experience

## Patient Engagement Platform

**VITAL**CHAT.

**Care Team** Information

Health Plan and **Expected** Discharge Date (if set)

Room Controls, Meals, and **Entertainment Options** 

Put care-team plans and information, along with answers to common medical questions, at the patient's fingertips with our Patient Engagement Solutions. When patients are in charge of their own room controls, meals, entertainment choices, and virtual visitor options, facility workflows are minimized and managed more easily. Patients can view educational videos and brochures that include detailed information on patient-specific illnesses, treatment plans, and post-hospital care recommendations.

Optimize resources by giving nurses secure, reliable access to electronic data as well instant communications — all integrated into your EMR.

Regardless of the duties nurses are tasked with, Howard has a cart designed to make it easier. All of our carts are customizable, with optional accessories and technology to ensure that healthcare staff have every available tool close at hand. From a quick telepresent consult to a detailed telemedicine appointment and from mobile imaging to med dispensing, Howard has you covered.
