Small business. Big deal.

INTERNET TELEPHONY IS NOW MORE ACCESSIBLE THAN EVER.

The SPA9000 marries the rich feature set of high-end PBX telephone systems with the convenience and cost advantages of Voice over IP. It has common voice system features such as an auto-attendant, shared line appearances, three way call conferencing, intercom, music on hold, call-forwarding and much more. The SPA9000 opens up access to the benefits of VoIP, including low cost long distance service, telephone number portability, and one network for both voice and data.

The Cisco Small Business Voice Systems offer all the features of a large-scale PBX deployment at a fraction of the cost and makes it easy to set up a new voice network within minutes.

3-phone systems
starting at just

* Other phone systems are available.

SPA9000

This IP PBX system comes with high-end features comparable to traditional large business voice services, and supports up to 16 SIP compatible phones.

SPA400

This multi-port PSTN gateway solution features an integrated voicemail server with up to 32 voicemail accounts and enables Linksys voice system users to leave and playback voicemail messages.
