

mimio® Stimulus Plan: Stimulate students' minds for less

Effective teaching is an active process. That's why teachers increasingly rely on interactive curricula and interactive whiteboards. But with today's limited budgets, how do schools afford to equip multiple classrooms with this exciting technology? They turn to mimio® interactive classroom technology solutions.

With mimio interactive solutions, you can triple the number of interactive classrooms per dollar.

Unlike conventional interactive whiteboards, mimio solutions put technology on the whiteboard, not in the whiteboard. mimio patented technology fits neatly into a small, unobtrusive bar that easily attaches to your current whiteboard, transforming it into a full-featured, interactive whiteboard.

mimio Interactive is classroom and kid friendly.

mimio works out of the box with your existing projector and classroom computer. The lightweight system moves easily from classroom to classroom, setting up quickly. You create engaging multimedia lessons with ease, and control everything from the whiteboard. You can even record your dry-erase color notes and drawings with our clever mimio Capture Kit.

mimio is a classroom favorite of teachers and administrators, and its intuitive design encourages children of all ages to use it. But don't take our word for it. Beverly H. says, "Our students can't wait to get their hands on it, and it is amazing how fast they pick it up." No wonder Scholastic Administrator named mimio a Best in Tech 2008-2009 for whiteboard solutions.

When looking at your budget, look at mimio.

"Since all of our classrooms have whiteboards, mimio is the more advantageous way to go."

Samantha S.
Technology Facilitator, River Dell Elementary School, Clayton, NC
