

Portégé® M400 Tablet PC

FAQs

TOSHIBA

1. Who has Toshiba designed the Portégé M400 Tablet PC for?

The Portégé M400 was inspired by the diverse mobility, and productivity requirements of highly mobile users, including mobile road warriors, professional sales forces, knowledge workers, executives, as well as technology enthusiasts. The Portégé M400 enjoys the most comprehensive implementation of Toshiba EasyGuard™ Technology enhancements¹ to provide unparalleled durability and reliability. Mobile users that demand a highly mobile notebook PC with a travel-friendly, digital ink pen-enabled 12" display with an internal optical drive will find the Portégé M400 Tablet PC performance beyond expectations.

2. Does the Portégé M400 Tablet PC feature Intel® Centrino® Duo Mobile Technology?

Yes, the Portégé M400 features Intel® Centrino® Duo Mobile Technology. Intel® Centrino® Duo Mobile Technology represents Intel®'s finest technologies for notebooks. For a notebook to carry the Centrino® logo, the notebook must feature an Intel® Core™ Duo Processor or Intel® Core™ 2 Duo Processor, an Intel® 945 Express System Chipset, and Intel® PRO/Wireless capability.

3. The Portégé M400 Series features Toshiba EasyGuard™ Technology. What are the features and benefits?

- **Protect & Fix:** To fortify vital information and vulnerable components against the stress and hazards mobile computers face every day.
- **Secure:** To defend your data and your notebook against loss, theft or viral attack.
- **Connect:** To help users establish a reliable wired or wireless connection effortlessly and quickly.
- **Optimize:** Enables users to customize system settings to be more productive.

4. The Portégé M400 Tablet PC offers an option for internal Wireless Broadband. With which carriers is Toshiba partnering with?

Toshiba has partnered with Verizon Wireless to offer an integrated module that can connect to the Verizon Wireless Broadband Access Service.

5. Can you build a custom configuration on the Portégé M400 Tablet PC?

Yes. To customize or personalize a configuration for specific needs, customers and businesses can visit www.toshibadirect.com or www.config.toshiba.com to see the wide range of configuration options, which will be available via Toshiba valued Reseller, Distribution, and Mail Order Partners, as well as direct from ToshibaDirect.com.

6. The Portégé M400 Tablet PC has a Wide View Angle screen. What are the benefits?

Wide View Angle displays provide multiple benefits to users. The wide view angle will allow users to deliver small-group presentations so that everyone viewing the presentation will be able to see the presentation clearly. An example would be a pharmaceutical sales representative demonstrating the latest drug studies to a physician. When users are taking notes on a table top, they will be able to clearly see their notes and other information on the screen.

7. The Portégé M400 Tablet PC features docking support. What are the benefits of the Toshiba Express Port Replicator?

The Toshiba Express Port Replicator provides desktop cable management. Cable management means all desktop cables are permanently connected to the Port Replicator (keyboard, mouse, monitor, speakers, PDA, speakers, Ethernet, power, etc). Customers can move seamlessly to the desktop by docking the notebook, instantly providing all the desktop peripheral connectivity without having to connect each individual cable every time. This functionality allows fast, one-touch docking for simple desk-to-mobile computing.

8. What does a Bridge Media Adapter do?

The Bridge Media Adapter allows the system, via one slot, to read the following media forms (depending on exact configuration): Secure Digital®, Memory Stick™, Memory Stick PRO™, SmartMedia™, Multi Media Card, xD Picture Card (shared slots). The Bridge Media Adapter allows users easy access to digital files from multiple sources, making it easy to share information with co-workers and clients utilizing a myriad of PCs, PDAs and digital cameras.

9. Now that there the Portégé M400 Tablet PC can be configured with internal Wireless Broadband, can I upgrade my system with the internal Wireless Broadband module?

The Portégé M400 Tablet PC must be factory configured with the internal Wireless Broadband module.
