Upgrading to a 21st CENTURY INTERACTIVE CLASSROOM doesn't have to be difficult.

Preparing students to succeed in today's information-driven world requires a new kind of teaching. By means of technology, classrooms are being transformed, enabling teachers to meet the demands of a new, tech-savvy generation of learners. 21st Century classrooms integrate video and other media to support instruction, establishing connections to life outside the classroom and addressing real-world concerns. In this way students are empowered to become self-directed learners, reaching new vistas through adaptive learning and developing strong problem solving and critical thinking abilities. Technology is the catalyst for bringing this change into the classroom, and HOWARDedu is the company bringing that technology to you.

To bring you the latest, most advanced technology, we partner with other industry leaders, such as Mimio, Epson, Brocade, and HP; Microsoft, Newline, Boxlight and Acer. The wide array of products we offer—everything from interactive whiteboards and projectors to anti-virus software, digital signage, virtual reality devices and more—is designed to make learning and teaching easier. We have dedicated representatives for all the products we have listed, each equipped with the knowledge and expertise to answer questions and assist in the buying process. And we don't stop there! HowardEdu certified technicians are available to provide installation, maintenance, and IT management services. For all your education needs, think HowardEdu.
