INTERACTIVE SOLUTIONS for Higher Education

Let HOWARDedu bring the Mimio experience into your classroom. Every Mimio product is designed to put students at the center of the educational environment, so they're more engaged, more collaborative, and more motivated. But the teacher still drives the instruction. So Mimio makes teaching easier and more rewarding, and learning more exciting. When technology is at its best, it paves the way, rather than getting in the way. Teachers can do what they do best – simply teach.

MimioDisplay™ Touch Display

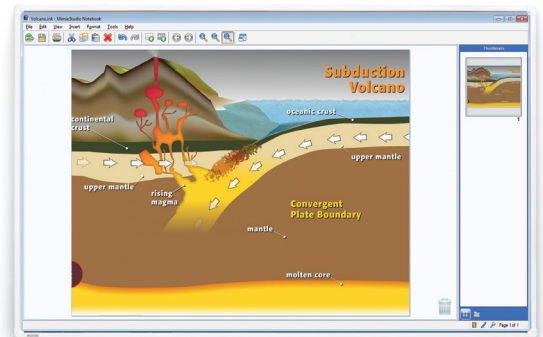

Multiple students can work together on the large touchscreen display at the front of the room. And the high-definition interactive display can replace a separate interactive whiteboard, projector, and speakers; freeing up valuable classroom space.

- The interactive display's huge size and LED backlighting make your lessons more visually striking and memorable, even in large classrooms.

MimioBoard™ Touch Board

A touch board that offers collaborative learning and an unprecedented touch experience. With 6-point Touch 360° interactivity, up to six individuals can work together simultaneously at this easy-to-install board. Their control and touch experience will remain uninterrupted, no matter where they work on the board.

- Up to 6 single-touch users or 3 dual-touch and gestures users can work together interactively at the same time, increasing student engagement and driving collaborative learning.

MimioProjector™ Touch Projector

Who says you can't have it all? If you're interested in an easy and affordable way to bring touch-enabled collaborative learning into the classroom, get the MimioProjector™ touch projector. Now you can turn your conventional dry erase boards into touch boards!

- An affordable way to bring multi-touch, interactive collaborative learning into classrooms that don't have projectors.
- Create an interactive touch area as large as 100 in. diagonal. Allows up to 10 single-point touches or 5 dual-points touches with gestures.

MimioCapture™ Ink Recorder

The NEW MimioCapture™ ink recorder extends the functionality of both the MimioTeach™ and the MimioBoard™, by allowing teachers to save whiteboard notes directly to their computer.

MimioView™ Document Camera

High-definition pictures and live video can really engage students. Your teachers can do it with plug-and-play simplicity. Take the MimioView™ out of the box, attach a single cord, and it's ready to go.

MimioPad™ Wireless Pen Tablet

With the new MimioPad™ you can control your interactive whiteboard from anywhere in the classroom. Multiple tablets can be viewed and controlled on the interactive classroom display.

MimioProjector™ 280I Interactive Pen Projector

If your classrooms already have dry-erase boards but no projectors, the MimioProjector™ interactive projector lets you bring interactive teaching into your classrooms without breaking the bank.

- Just mount, plug into a computer, and bring your lessons, graphics, and images to life on a conventional dry erase board.
- With the two included pens, students can simultaneously interact with the same projected image, enhancing collaborative learning.

MimioTeach™ Interactive Whiteboard

Now teachers can place the small MimioTeach™ interactive whiteboard on the dry erase boards they already have, push two buttons, and — just like that — they have a full-featured interactive whiteboard for a fraction of the cost of conventional fixed whiteboards.

- A complete interactive whiteboard system that uses the dry erase boards and projectors you already have.
