

# NEXT GENERATION TECHNOLOGY E-RATE SOLUTIONS

Howard Technology Solutions strives to help you understand technology, services, and the programs that could help you achieve that goal. Actively involved in E-Rate since its inception, our program specialists stay informed of program changes by monitoring a myriad of E-Rate information sources as well as attending state and national workshops and training seminars. We are able to assist you in all aspects of the E-Rate Program including performing walk-throughs during planning and proposal phases of your application, providing telephone and on-site technical assistance, and providing consulting services as needed.

Offering a variety of products to help maximize your networking potential (switching, routing, wireless, unified communications, security).

Service integrated hardware and software solutions that intelligently sense and automatically respond to security threats – and proactively prevent threats from entering your network.

Howard Technology Solutions offers the best in technology equipment from desktops and notebooks to tablets and servers.

Quality power protection and connectivity solutions (UPS, cables, KVM switches, Rack systems).

Video becoming a demand? Vbrick delivers reliable video communication solutions using your existing IP network to deliver important information and classroom content.
