

Ideal for digital signage applications

The new Howard DE2700 is the latest, and one of the lightest mini PCs around. Powered by Intel's Atom™ technology, with integrated graphics, and an integrated dual-gigabit NIC for high speed connectivity, the DE2700 offers a very affordable, full-functioning computing solution that is perfect for even the most demanding digital signage applications. The small form factor chassis' all-metal construction offers the increased durability necessary for indoor digital signage environments. This Digital Engine helps to reduce energy costs because of its low power consumption, which earned it an EPEAT listing. It is easy to install, and comes with your choice of Windows® 7, Vista®, or XP.

Howard Technology Solutions recommends genuine Microsoft® Windows® 7 Professional.

The Howard Advantage!

Q: What about processor options?

A: There are no processor options for the DE2700 because the Intel® Atom™ processor is integrated onto the motherboard.

Q: What is the GMA 950GSE?

A: The GMA 950GSE is one of Intel's integrated graphics chipsets that features 3d enhancements, enabling greater flexibility, scalability, and improved realism, with support for Microsoft® DirectX 9.0c.

Q: Where would I use the Howard Digital Engine DE2700?

A: The DE2700 is designed to be used in digital signage applications such as digital billboards.

Q: Whom should I contact for support?

A: Call Howard for world-class support and service if there are any questions about the desktop. Customer support is available:
 Online at <http://www.howardcomputers.com/support>,
 By phone at 1.888.323.3151,
