Get the MAX from a Mini

Get a mini computer that delivers maximum performance—the energy-efficient, space-saving H57 Mini desktop. Powered by Intel's Core™ i3 and i5 technology, with an integrated gigabit NIC or wireless N-card for high-speed network connectivity, and 8GB of DDR3, the H57 is one mighty little mini. It features next generation graphics from Intel® with HDMI, plenty of ports for connecting all your multimedia accessories, and comes with your choice of Windows® 7 Professional or Ultimate—the latest technology in a super-small form factor. So, get the MAX from a mini—Howard's H57 Mini.

Howard Technology Solutions recommends genuine Microsoft® Windows® 7 Professional.

Q: What is Dual-Channel Memory?

A: Dual-channel mode is enabled when identical matched memory modules are installed in each of the two memory channels, allowing for higher throughput, and reduced latency.

Q: What about processor options?

A: Processor options for the H57 Mini include the Intel® Core™ i3 and i5 family of processors.

Q: What is Intel® Integrated HD Graphics?

A: Intel® HD Graphics is one of Intel's latest integrated graphics chipsets. It features 3D enhancements, enabling greater flexibility, scalability, and improved realism with support for Microsoft® Direct X10. This graphics package is included on the same die as the processor for faster graphics processing and reliability.

Q: Does the naming convention used by Intel® for their i3 and i5 processors indicate performance level?

A: Intel® processor numbers are not a measure of performance; they simply differentiate features within each processor family.

Q: Whom should I contact for support?

A: Call Howard for world-class support and service if there are any questions about the desktop.
