# Watch live TV and movies on your PC, anytime

Howard's new all-in-one desktop computer, the G45N1, really has it all! Not only does this PC offer full computing capabilities, HDMI, and high-speed connectivity, but it also features an integrated TV Tuner that turns it into a powerful TV. Watch and record live TV, anytime; download TV schedule guides, and watch Internet TV. Included with the G45N1, the Windows Media Center remote feature enables you to record, change channels, and browse through a guide easily. You will be amazed at the high-quality video playback, with sharper images and richer color. Centralize your entertainment with Howard's G45N1, and never miss a favorite show again!

## Howard Technology Solutions recommends genuine Microsoft® Windows® 7 Professional.

Feature	Description
Internal TV Tuner	Howard's G45N1 with integrated TV Tuner allows users to watch and record live TV. With Windows 7 Media Center, users can download TV schedule guides, view Internet TV, and use the system as a DVR. The TV Tuner supports the following formats: HYBRID ATSC/CLEAR- QAM/ANALOG TV
Integrated Intel® Graphics	The G45N1 provides a rich new media experience for users with its integrated Intel® GMA X4500HD graphics package that enables full 1080p high-definition video playback.
Integrated HDMI	The G45N1 monitor can be used for any number of devices with HDMI connections, such as video game consoles. This feature requires that the G45N1 be powered ON to power the LCD display.
Intel® Socket 775	The G45N1 has support for Intel® Core™ 2 Duo, Pentium® Dual-Core, Celeron® Dual-Core, and Celeron® processors.
Integrated Gigabit NIC	An integrated Gigabit network port enables high-speed network connectivity.
Touch Panel	A high quality, accurate Touch Panel transforms the G45N1 monitor into an interactive display screen.
Webcam	1.3 megapixel webcam

#### Q: What is the Intel<sup>®</sup> X4500HD?

A: The X4500HD is one of Intel's latest integrated graphics chipsets that features 3D enhancements enabling greater flexibility, scalability, and improved realism, with support for Microsoft® DirectX 10.

#### Q: What is Dual-Channel Memory?

A: Dual-channel mode is enabled when identical matched memory modules are installed in each of the two memory channels, allowing for higher throughput and reduced latency.

#### Q: What advantage do I get from the 1333 FSB?

A: The 1333 FSB (front side bus) allows for compatibility with the latest Intel<sup>®</sup> processors including the new 45nm CPU's.

#### Q: Whom should I contact for support?

A: Call Howard for world-class support and service if there are any questions about the desktop. Customer support is available:
