Rack mountable server	•	
Pedestal server		•
Processor-intensive applications	•	
Vast internal storage		•
Embedded RAID 0,1	•	
Hot-swappable serial ATA hard drives	•	
Xeon 3000 series 533/800/1066 FSB	•	
Xeon 5000/5100 series 667/1066/1333 FSB		•
Includes Lifetime support	•	

Q: Can this server support an office of 10 – 15 employees?

A: Yes. These systems were developed to feature rich applications and to support a larger user installation base.

Q: Is this server replacing another Howard model?

A: No. This is a completely new entry level Intel® Xeon® 3000 based series.

Q: Can this server handle Voice over IP applications and performance requirements?

A: Yes. Even modestly configured versions with a single Intel® dual-core processor, 4 GB memory, and a RAID 1 configuration can handle 1,000 + users.

Q: What is Dual-Core?

A: Dual-Core is the process of taking a single piece of silicon and placing two processor cores or “brains” on it. This effectively gives you dual processor configuration in a single package.

Q: Why such a long lead time?

A: Simply put — because we custom build each system once ordered and then thoroughly test it to ensure it will meet and / or exceed our customer expectations.

Q: Does Howard Computers offer installation services?

A: Yes. Howard Computers has a Network Services Group that can do installation of systems as well as network security analysis and other technical services.

Q: Whom should I contact for support?

A: Call Howard Computers for world-class support and service if there are any questions about the server. Customer support is available online at <http://www.howardcomputers.com/support>, through phone at 1.888.323.3151, by email at tech@howardcomputers.com or by traditional mail at Howard Computers, 580 Eastview Dr., Laurel, MS 39443.
