

NEXT GENERATION TECHNOLOGY

STORAGE & BACKUP SOLUTIONS

At Howard, we recognize that data security is essential to the success of your business. We offer affordable storage and backup solutions, as well as provide technical services and maintenance for LAN, WAN, and SAN solutions. Our consultants are certified in the latest technologies, and committed to keeping your data safe and reliable. So, whether you simply need some assistance in the initial planning phase or need end-to-end planning, design, and implementation services, we're here to help.

 **compellent**

 **symantec**

 **compellent**

Compellent's integrated feature set, innovative technologies, and industry-leading ease of use make it the only SAN to win consecutive "Best SAN" awards from Infoworld.

SPECTRA LOGIC

Spectra Logic manufactures and markets a complete line of automated tape library solutions incorporating SAIT and AIT technology to protect, store, and manage rapidly-growing data centers.

 **symantec**

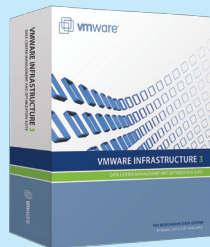

Symantec Backup Exec is an extremely fast and efficient disk-to-disk-to-tape backup solution, that provides "True Continuous Data Protection" and a patent-pending "Granular Recovery Technology" that brings ultra-fine control of data recovery down to the individual file level.

 **vmware**

Virtual servers let you host multiple operating systems and multiple applications locally and in remote locations, freeing you from physical and geographical limitations. In addition to energy savings and lower-capital expenses due to more efficient use of your hardware resources, you get high availability of resources, increased security, and improved disaster recovery processes when you build a virtual infrastructure

SPECTRA LOGIC

 **vmware**

 **Xiotech**

Xiotech data storage and protection solutions address information management with more reliability, flexibility, greater ease of use, and a higher ROI compared to other DAS, NAS, or SAN solutions. Xiotech provides the most advanced storage area network (SAN) technology available today.
