Whether your vision for an accurate conference room reservation solution includes the ability to book vacant rooms right at the door, or enhances the way your attendees find a scheduled meeting; 22Miles Publisher Pro can handle it all. Our all-in-one platform enables you to bring your meeting status right to the conference room door, highlight vacant rooms on a 3D wayfinding map, and even drive content to the mobile devices of your attendees.

Publisher Pro natively supports and syncs with event systems such as Office 365, Crestron, and AMX enabling for an automated and efficient approach towards Room Booking.

# Real Time Active Wayfinding

From desk to Mobile. Integrate your event schedule with 3D wayfinding to display room status and availability right on the map. List available rooms and even book rooms using a customized interface.

- Highlight Room Availability on screen with real time, color coded mapping
- Show Event Lists and Wayfinding Directions
- Book / Reserve Rooms
- Show / Filter by capacity

# Room Pop-Up

Deliver dynamic information about room schedules, attendees, and more using room pop-ups. These designs can be loaded on a mobile device, workstation meeting reminder, or even on a Wayfinding Kiosk. Find the perfect blend of elements to drive culture and enhance the way attendees search for and book meetings.
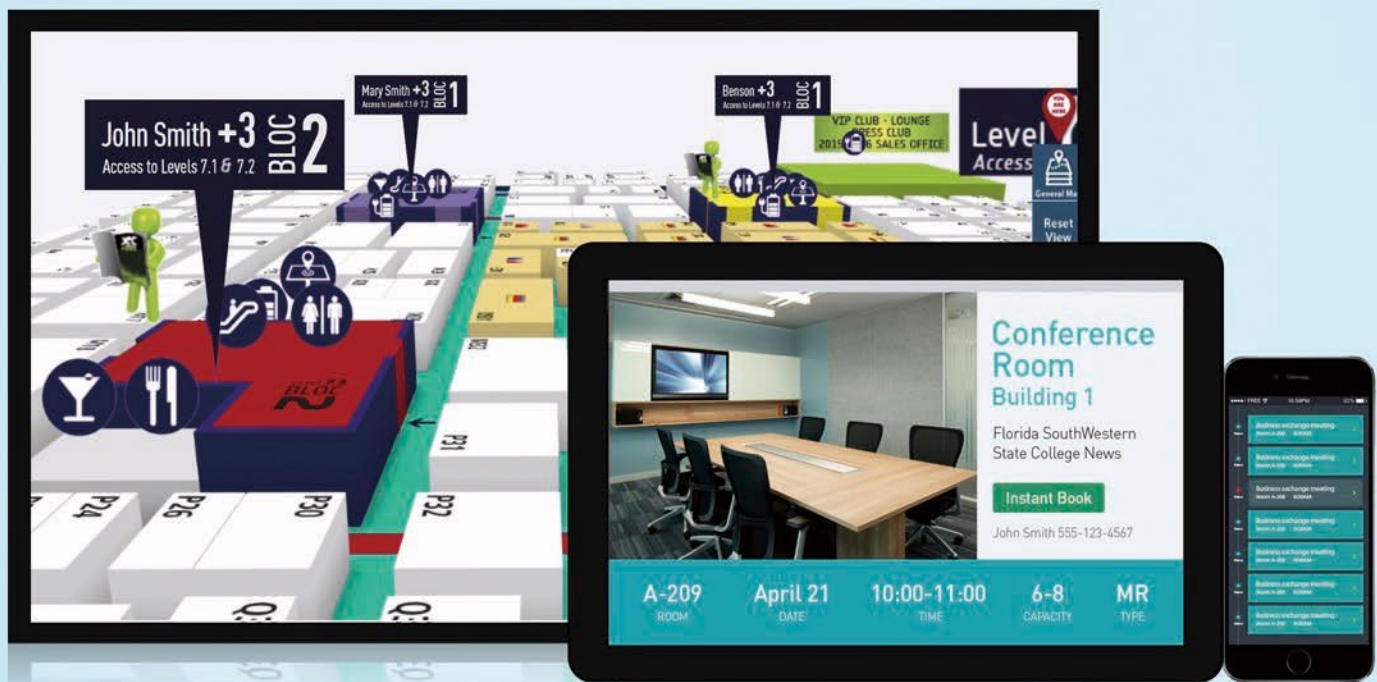

- Use Photography or Panoramas
- Display Event Calendars
- Book / Reserve Rooms
- View Attendees / Contact Info
- Welcome Messages & Recognition
- Corporate Culture & Branding

# Conference Room Reservation Boards

Install discrete touchscreen tablets outside your conference room that features the room reservation status, scheduled meetings, and available times to use the room.

- Streaming list of daily and upcoming events or meetings
- Reserve the meeting room directly from the tablet

Publisher Pro's real-time update capabilities allow any type of organization to feel confident knowing that every device their attendees, staff, and guests are viewing shows the lastest room status, RSS notifications, and any external data sources. The solution natively supports all data source files such as XML, JSON, SOAP, CSV, LDAP, SQL, RSS, ICS, Office 365, and even Crestron or AMX. You can seamlessly integrate data and broadcast events in a simplified way.
