

# SMART Notebook<sup>®</sup>

## collaborative learning software

### Full features list

[smarttech.com/Notebook](http://smarttech.com/Notebook)

#### More engaging lessons

##### **Lesson Activity Builder**

Built on the theories of gamification and game-based learning, the Lesson Activity Builder makes it easy to create interactive, fun lessons that your students will love - all in less than 5 minutes.

##### **Interactive concept maps**

Map ideas and brainstorm sessions interactively, so students can explore their learning process, together.

#### Easy to create

##### **The SMART Exchange website**

Access more than 60,000 easy-to-use resources, and a growing online community by clicking the SMART Exchange icon in the SMART Notebook toolbar.

##### **Gallery Essentials**

Choose from over 7,000 learning objects to enhance your lessons, including images, backgrounds, dynamic Flash files, video and audio content.

##### **SMART Notebook Maestro**

Lead instruction through a single iPad, anywhere in the room. Interact with content on it while students see changes in real-time on the board. Or hand control over to a student who can lead interactions.

##### **Integrate student devices**

Students can use web-enabled devices to engage with lessons, contribute ideas, and answer spontaneous or planned questions.

##### **Sound recorder**

Record sound directly into your SMART Notebook lesson - there's no need to switch between programs and files.

##### **Adaptive toolbar**

Choose a tool and the adaptive toolbar changes, so all the properties you need are right in front of you.

## Flexible tools

### Innovative math functionality

Powerful math functionality for all grade levels, including easy equation editing, SMART Blocks, and 55,000+ math content objects and activities for geometry, algebra, calculus and statistics, powered by GeoGebra.

### Embedded Internet browser

Add an Internet browser directly onto a SMART Notebook software page. You can interact with the webpage by drawing or writing over the content, and drag and drop images from a webpage into your lesson.

## Extended functionality

### SMART Notebook Recorder

SMART Notebook Recorder allows you to record your lesson from within SMART Notebook, so students can replay it to learn at their own pace, inside or outside the classroom.

### SMART Notebook for iPad

Create multimedia lessons, complete assessments on the fly and import files with the SMART Notebook for iPad app.

### Insert sound

Add sound to objects in your SMART Notebook lesson with one click. You can browse the Gallery for audio files of famous speeches, animal sounds, phonics, instruments and more.

### Multiple pen tools, including crayon and paintbrush

Use a variety of different tools, including crayon and paintbrush, to create and emphasize content, draw in any color and even convert handwriting to text.

### Gestures

Zoom, pan, flick and swipe. It's easy to scale objects or pages, flick an object or swipe between pages. You can also touch the interactive whiteboard to shake objects to quickly group and ungroup them.

### Multitouch support

Two can work together on the surface (on compatible displays) using a pen, finger or fist. There is no separate multiuser mode or restricted user area.
