

Modern Data Protection | **#1 VM Backup**
 Built for Virtualization

Veeam Backup Essentials Modern Data Protection for small businesses

Veeam has won more VMworld awards than any other vendor, and Veeam is the only two-time winner of the VMworld award for New Technology.

Veeam Backup & Replication v6.5 won Best of TechEd 2013 for Backup and Recovery.

"As a one-man support team, I need a backup system that is easy to use. With Veeam, I just set it up and forget it; it practically runs itself. Reliable backups are just one less thing I have to worry about."

Jason Knight
 IT Manager
 L&L Energy, Inc.

"Veeam products simply work. They deliver what they promise and do it much faster and more affordably than any other product we've tried."

Marco Staiti
 Director Infrastructure
 Telecommunications and Security
 Sogegross Group

Gold Application Development
 Gold Management and Virtualization

Organizations with small VMware vSphere or Microsoft Hyper-V environments need an affordable backup and recovery solution that is easy to use and easy to manage.

That's why Veeam® Software offers Veeam Backup Essentials™. Delivering all the benefits and features of Veeam Backup & Replication™ at savings of 33% or more, Veeam Backup Essentials is a powerful and easy-to-use solution for organizations with fewer than 250 employees and virtual environments with 2, 4 or 6 sockets.

Meeting today's challenges

Shrinking backup windows, exploding data volumes, and escalating performance and availability demands make effective protection and management of your virtual infrastructure more important than ever. With Veeam Backup Essentials, you have the power and ease of a single solution that addresses your most important needs:

- Fast, reliable backup
- Fast, flexible recovery
- Fast, efficient replication

An affordable solution

Veeam Backup Essentials provides fundamental and far-reaching benefits that help small businesses with limited staff and budgets:

- Reduces backup and recovery time by 95%
- Decreases administrative time by 90%
- Cuts costs by up to 70%

Veeam Backup Essentials is available in 2-socket bundles for VMware and Hyper-V environments, and organizations may purchase up to three 2-socket bundles, for a total of 6 sockets. With savings of 33% or more over purchasing Veeam Backup & Replication, Veeam Backup Essentials offers a very affordable option for small businesses with typically fewer than 250 employees.

Protecting your investment

Your investment in Veeam Backup Essentials is protected as your virtual environment grows and changes. If you switch hypervisor platforms, you can swap your Veeam Backup Essentials licenses between Hyper-V and VMware. And if your virtual infrastructure grows beyond 6 sockets, you can upgrade to either Veeam Backup Management Suite™ or Veeam Backup & Replication, for a price that takes into account your original purchase of Veeam Backup Essentials.

Supported platforms

VMware infrastructure

Platforms:

- vSphere 4.x - 5.5
- VMware Infrastructure 3.x (VI3)

Hosts:

- ESXi 3.5 - 5.5
- ESX 3.5 and 4.x

Software:

- vCenter Server 4.x - 5.5 (optional)
- Virtual Center 2.5 (optional)
- vCloud Director 5.1 - 5.5 (optional)

Virtual Machines:

- All operating systems supported by VMware
- Any application
- Any file system

Microsoft Hyper-V infrastructure

Hosts:

- Windows Server 2012 Hyper-V (through R2)
- Windows Hyper-V 2008 R2 SP1 (including core installation)
- Microsoft Hyper-V Server 2012 (through R2), 2008 R2 SP1 (free version of Hyper-V)

Software:

- Microsoft System Center 2012 (through R2) Virtual Machine Manager (optional)
- Microsoft System Center 2008 R2 Virtual Machine Manager (optional)

Virtual Machines:

- All OSs supported by Microsoft Hyper-V
- Any application
- Any file system

Modern Data Protection - Built for Virtualization™

Your company's data is its most valuable asset. Legacy backup tools simply can't cope with the challenges of virtual environments or meet the growing intolerance for application downtime and data loss. At Veeam, we believe today's IT requirements have changed and that "3C" legacy backup problems—limited capabilities, increased complexity and high cost—are no longer acceptable for any organization.

Missing
 ✗ Capabilities
 ✗ Complexity
 ✗ Cost

✓ Powerful
 ✓ Easy-to-use
 ✓ Affordable

Veeam Backup Essentials delivers Veeam Backup & Replication in a specially packaged and priced bundle to provide fast, flexible, and reliable backup and recovery of virtualized applications and data for small businesses. Veeam Backup Essentials unifies backup and replication in a single solution, increases the value of backup and reinvents data protection for VMware vSphere and Microsoft Hyper-V virtual environments.

Multi-hypervisor support

Veeam Backup Essentials supports VMware and Hyper-V in a single solution, so you get powerful data protection for both hypervisors without the time and effort of deploying and managing separate tools.

Enterprise capabilities for small businesses

Data protection is just as important to your small business as it is to a Fortune 500 company—the only difference is scale.

Veeam Backup Essentials delivers the core capabilities you'd expect in a data protection solution on the market today – the ability to backup live VMs, built-in deduplication and compression, and instant VM recovery, to name just a few. But Veeam Backup Essentials also goes above and beyond the "expected" with an agentless solution that offers automated verification of backups and replicas, granular item-level recovery, built-in WAN acceleration for getting backups offsite fast and reliably, and much more.

Editions

Veeam Backup Essentials is offered in three editions, Standard, Enterprise and Enterprise *Plus*, with data protection capabilities that correspond to the Standard, Enterprise and Enterprise *Plus* editions of Veeam Backup & Replication.

Veeam Backup Essentials is also offered in a Cloud Edition. With support for more than 15 leading cloud providers and open cloud storage platforms, the Cloud Edition lets you choose the best cloud provider for your needs and makes offsite storage of backups to the cloud easy.
