## complete room sign solutions

### Optimized Workplace. Flexible Workforce.

Whether you want to simply show room schedules or employ a fully-integrated office hoteling and digital signage solution, our room signs let you schedule space from any location - at any time - to keep your entire workforce in sync.

MeetingMinder™ room signs show your schedules and other digital signage content outside conference rooms and shared workspaces. This lets meeting organizers and attendees see space options instantly while staying up-to-date with daily announcements.

Since all of our room signs can be fed by a single scheduling application, space booking is the same whether people are in a home office, on the road or in the workplace. Calendars are consistent and up-to-date everywhere, no matter who changes it or from where.

Visix room signs accommodate all types of shared spaces, and all of our room signs can be used together in the same facility and integrated with our other digital signage solutions.

- Show schedules for one or multiple rooms
- Display greetings and announcements
- Provide wayfinding information and interactive maps
- Keep everyone informed with news, weather and RSS feeds
- Present live, streaming content from your network
- Playback videos and other animated content
- Deliver critical alert notifications

Both our Touch and EPS room signs show data from most event management systems, including:

## Interactive Room Signs

Touch and Connect room signs let you schedule meetings right at the sign. Create a walk-up reservation with only a few touches to the screen, and those reservations are immediately shared with your calendar application to avoid double-bookings.

You'll see room availability at a glance with lights on each side that shine green when the room is available and red when it's not.

- Choose an AxisTV-powered or stand-alone solution
- Book meetings right at the room sign
- See room status instantly with availability lights
- Use PoE or PoE+ via network switch or injector
- Easily mount right out of the box

These room signs let you run one Ethernet cable to the room sign to supply both power and data. Touch signs can be recessed, and both Touch and Connect models can be easily mounted right out of the box without additional hardware.

### Touch10 & Touch15

Our AxisTV content management software lets you publish calendar schedules, digital media, and mass alerts to Touch room signs, making them a perfect extension of your digital signage.

To schedule a room, just touch "Reserve" and set the time and meeting length. A four-digit PIN can be set to protect your reservation from being canceled or modified, and the "Confirm Meeting" button lets participants confirm the room is being used at the scheduled time. If unconfirmed, the room will free up.

For places where walk-up reservations aren't appropriate, any 10- or 15-inch Touch room sign can run in non-interactive mode, so digital signage content and schedules are displayed full-screen.

### Connect

Connect offers a feature-rich, cost-effective room management solution that doesn't require the AxisTV CMS. Show schedules outside each meeting room and let people book space on the go.

Connect shows the room name and technology icons, and you can report resource issues on screen. Meeting participants can start, extend, end and cancel meetings right at the sign. If a room is booked, you can see other available rooms at the press of a button.

If you don't want to limit yourself to schedules only, Connect lets you show a logo and pull in digital signage messages via an image reader. Display content from your digital signage CMS by pointing to the URL of an exported RSS image playlist, or pull in images from any folder on your network.

## EPS (Electronic Paper Signs)

Our electronic paper signs (EPS) are the most cost-effective option to display current schedules outside your shared spaces – an inexpensive, wireless and battery-operated solution from Visix.

These compact displays can be placed virtually anywhere because they don't require any cabling. Easily mount them outside meeting rooms, classrooms, training rooms or any other space you reserve. You can also attach them to desks or cubicles used for workspace hoteling.

Paper-white signs have a bright display background with low reflectivity for high readability, and allow for both black and red colors on screen.

The room signs are updated wirelessly via RF communication designed to minimize battery usage. A sign's batteries are only activated when information changes, which allows batteries to last up to three years or 10,000 updates.

EPS signs come with a stylish black faceplate and custom designs are also available. Custom faceplates can include raised room numbers, braille, different material finishes and your organization's logo.

An EPS system can be used with other Visix room signs and digital signage products, or as a completely stand-alone solution.

- Economical choice for displaying room schedules
- Wireless and battery-powered
- Display schedules for meeting rooms, classrooms, training rooms and more
- Show workspace reservations for office hoteling
- Save time, money and waste by replacing printed schedules

## Conference

Our Conference application pulls together schedules from a variety of calendar programs, taking care of integration with the scheduling system you're already using. It supports multiple event management systems – and multiple instances of those systems – in the same installation, so it can easily support all the systems across an organization.

Conference can be used in conjunction with AxisTV digital signage software, or as a stand-alone application to power your EPS room signs.
