

CYBER SECURITY

Don't be a statistic.

HOWARD[™]
ENTERPRISE

Three-quarters of all cyber attacks are unreported.

Cyber crime damages are expected to exceed \$6 trillion annually by 2021. This prediction is up \$3 trillion from one year ago. Do not think that you are safe from this growing epidemic. It is easy to assume that the majority of attacks are against large, well-known companies such as Target, Yahoo, and IHG. This could not be further from the truth. Most cyber attacks never receive public awareness or media attention.

The Cyber Security Experts of Howard Technology want to make YOU the next success story in the war on Cyber Crime.

- Our team of certified white-hat hackers will perform **penetration tests** against your physical and data safeguards.
- **Vulnerability scans** will be offered to keep your servers and systems clean of exploits.
- **Workforce Training against Phishing, Malware and Social Engineering** will prevent against the world's greatest vulnerability – PEOPLE.
- Our engineers and architects will **analyze your environment** to offer solutions to fit your business needs while managing and mitigating risks.
- The physical security team will evaluate your needs for **surveillance and access control**. They will offer affordable, cutting edge solutions to monitor the safety of your employees and their work environment.

Howard Enterprise cares about the safety and security of its customers.

Contact your representative today to learn how our experts can **make you the hero** in the war against Cyber Crime.
