

WIRELESS NETWORK

Get connected and stay that way—simply, reliably, and affordably—with wireless networking solutions from Howard. We begin by conducting a comprehensive needs survey to find out what your expectations are for your wireless network, followed by a site survey to determine optimal locations for wireless access points. From there, certified professionals proceed with installation and configure your network to your specifications, complete with security management, storage and backup solutions, remote access capability, and disaster recovery. In addition, Howard provides services that range from routine system maintenance and management to complete IT outsourcing. Enjoy a new level of flexibility and mobility with Wireless Networking solutions—let Howard make Wireless work for you.

WIRELESS SOLUTIONS

WIRELESS PRODUCTS

- Wi-Fi
- Routers
- WLAN Platforms
- Access Points

APPLICATIONS

- Network Management
- Network Security
- Cloud Management

WIRELESS SOLUTIONS BENEFITS

We and our partners provide enterprise Wi-Fi networks specifically designed for the real-time demands of an all-wireless world. We offer cloud managed Wi-Fi solutions through our partners that are scalable, future proof, easy to use and provide application control, which makes us the obvious choice for small, medium, or large-scale Wi-Fi networks.

Our unique network architecture can scale to double and quadruple the number of users, without performance impact or the need for additional wiring and access points. And it's designed to evolve with the changes in Wi-Fi technology and standards, so you won't need to replace your network, even after a decade of use.
