

PHYSICAL SECURITY

Safeguard your assets with IP-based video technology that provides flexible, scalable, and cost-effective surveillance solutions suitable for a wide range of industries and applications. From offering preventative security by acting as a deterrent to crime, violence, and misbehavior to providing verifiable evidence in the event of a security breach, IP-based video surveillance systems provide you with the information you need to protect your environment. IP-based video technology can be integrated easily with other security systems, such as alarms, paging systems, and access control. The need for security has never been greater—for businesses and government entities, on school campuses, and at home—so, protect yourself with state-of-the-art audiovisual security solutions.

SECURITY PRODUCTS & SERVICES

Axis Q3617
Network Camera

Through our partners, Howard offers a wide portfolio of IP-based products and solutions for security and video surveillance. Our cameras, video encoders, accessories and access control products are based on open industry standards. The products integrate easily with our video management software to build a complete security or surveillance solution.

FEATURES INCLUDE:

- Exceptional video quality
- HD surveillance
- Lightfinder and WDR - Forensic Capture
- Zipstream technology saves bandwidth without sacrificing quality
- Robust design for harsh environments
- Extensive support
- Validated hardware

SECURITY SOLUTIONS BENEFITS

Our solutions are easy to use and install, and they're designed to work perfectly for schools, retail, manufacturing sites and other mid-size installations. You can either opt for one of our out-of-the-box systems with optimized hardware and software, or build your system using our software together with standard PC and servers.
