The GK5 Laptop for Gaming

Blast your way through to parts unknown with the GK5, Howard's VR-ready gaming laptop. Powered by Intel's 8th generation six-core processors, the GK5 is ultra fast, super powerful, and innately responsive. Featuring Nvidia 1060 graphics, the GK5 is designed to catapult you into virtual worlds that are so realistic you'll swear you're there! And this system looks good, too! The GK5 has an extremely thin form factor—just .86 inches—that makes it the thinnest laptop in the industry with a mechanical keyboard. And not just any keyboard, it's a premium full size, NKRO (N-Key Rollover) per-key RGB backlit gaming keyboard with Anti-ghosting, 10-key numeric keypad, removable key caps, and a customizable RGB light bar. This beautiful system also features an impressive thermal design that ensures it stays as cool as it looks.

Dominate your game with the GK5 gaming laptop from Howard!

- Fast
- Powerful
- Responsive

FAQs

Q: Why does the GK5 have a smaller footprint than other 15.6" laptops?

A: Using Bezel-less technology increases the viewable area of a laptop screen, so you get a full 15.6" look with a sleek 14" inch form.

Q: What is the advantage of Howard's Mechanical LIGHTSWITCH keyboard?

A: The GK5's Mechanical Keyboard is an improved design which delivers incredible tactility, faster responsiveness, better key travel distance, larger keycaps, and longer life span (an average of 50 million clicks).
