The Howard Story

The Howard Advantage starts with being an actual manufacturer by trade and not simply an integrator of parts. **Howard Industries**, our parent company, was founded by Billy Howard, Sr. in 1968, when he left his successful career at General Electric to return to Mississippi and create his own company. Over the decades, he and his wife, Linda, grew Howard Industries into the nation's leading manufacturer of distribution transformers, with nearly nine-million transformers in service throughout the United States and abroad. Today, Howard Industries is a billion dollar company, consisting of four separate divisions and a wholly-owned subsidiary, Howard Transportation. While the Howards have always readily attributed their success to their employees' hard work and commitment to creating, supplying, and supporting superior products and services, you cannot overlook the inspiration the couple provided. Howard's firmly established position as a leader of industry served as the springboard for a new division, which began production of computer technology in 1999, Howard Technology Solutions (HTS). Howard (HTS) designs and manufactures its own desktops, notebooks, servers, and kiosks, as well

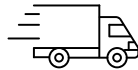

Mr. Billy Howard Sr. and Mrs. Linda Howard

as a variety of enterprise mobility solutions. In addition, strategic partnerships with other industry leaders enable us to offer a rich portfolio of over 500,000 name brand products. We have dedicated representatives for each of the products we have listed, who are equipped with the knowledge and expertise to answer questions and assist in the buying process. From purchase and delivery to installation, management, and servicing by industry-certified technicians, Howard is with you every step of the way. Howard manufacturing and professional services support a variety of vertical markets. We provide government agencies and schools with innovative technology that is affordable, help healthcare and medical facilities maximize productivity, and give businesses an edge by reducing costs and increasing revenue. From single components for small organizations to large-scale solutions for enterprise level operations, we supply superior technology and customize it to fit your needs.

10 Different Facilities

Ten different facilities including corporate headquarters, manufacturing facilities, and a transportation facility.

Over 4.5 Million Square

Over 4.5 million square feet of manufacturing space for Howard products – transformers, lighting, kiosks, medical equipment, computers, & more...

More Than 100 Engineers

Over 100 mechanical, industrial, and electrical engineers with thousands of years of combined experience.

What We Believe

Howard Medical believes in providing the best customer service possible. See what customers have to say about our services.

Our Corporate Headquarters

Howard started in an old army barracks over 50 years ago. Our current corporate headquarters is a 5-story structure wrapped in two tons of blue glass and includes:

- 60,000 ft² of office space
- 112,000 ft² manufacturing plant for technology and Medical products

Our Manufacturing Facility

For 20 years, our carts have been assembled in Ellisville, Mississippi.

Exam Rooms

When it comes to point-of-care work processes, tablet computers provide clinicians with an unprecedented level of mobility and accessibility. They ensure immediate access to patient records and provide a convenient way to complete charting requirements in the exam room, without interruption.

Patient Rooms

The patient room in a hospital should revolve around the patient's care and comfort. Howard has the technology you need to enhance patient experiences and improve your HCAHPS score.

Emergency Department

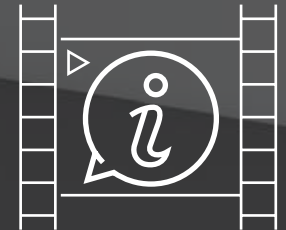

Hospital emergency room doctors, nurses, and other ER staff face stressful situations 24/7. Howard Medical products help minimize the strain by making tough jobs more manageable, so emergency healthcare workers can give each patient their best.

More Control For Patients and Families

More Time For Care Teams

Less Complexity For Organizations

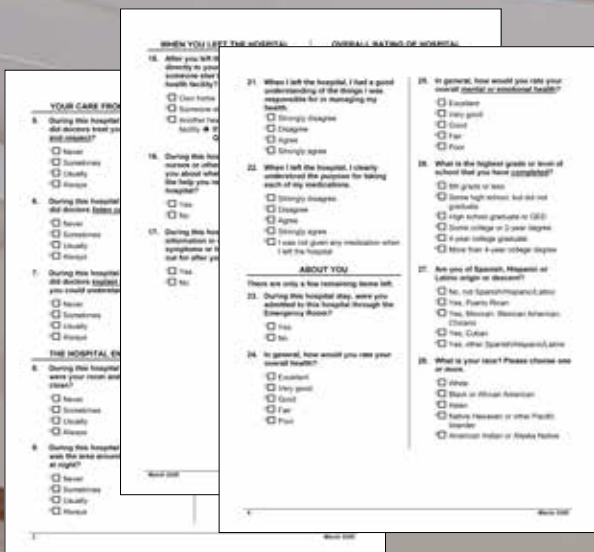

Benefits of Oneview

Oneview's solution not only keeps patients informed about their healthcare team and care plan, but also reduces the workload by routing non-medical issues directly to the respective department.

Patient Experience

The patient room in a hospital should revolve around the patient's care and comfort. Howard has the technology you need to enhance patient experiences and improve your HCAHPS score.

Patient Entertainment

Allow your patients to access all of their streaming services so they don't miss a thing away from home.

Quiet at Night?

State of the art sound masking technology helps keep rooms quieter at night, allowing for a more comfortable and restful stay for patients.

Care Team Information

Let patients see who their care team is before they walk into the room.

Improve HCAHPS scores

Howard's Patient Experience solutions are designed to specifically address HCAHPS questions. Improve your scores by directly addressing issues your facility may have.

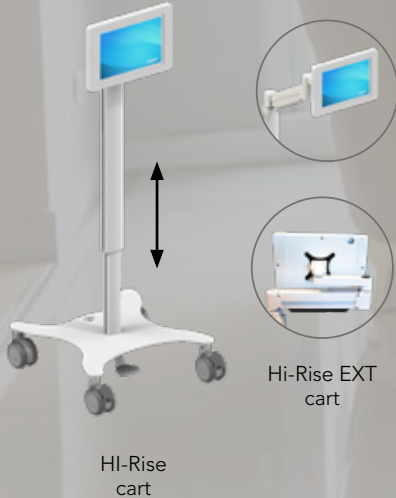

The Howard Family of Carts

Point-of-Care Solutions

Howard Medical products ease workloads for nurses and other healthcare professionals and enhance patient care for an improved patient experience. Our medical carts are designed and built to the exacting standards of the healthcare industry and designed to withstand daily use in the most demanding environments.

Telepresence Carts

Expand your telehealth presence and provide patients a safe way to interact with others via video chat with the HI-View and HI-Rise cart families. These highly maneuverable carts are also available at a fixed height or with height-adjustable capability, as well as an extendable arm, making it easy for people of varying heights to use it comfortably.

HI-Rise cart

HI-Rise EXT cart

HI-Care E 2-tier storage

HI-Care

Our patented flagship point-of-care cart can be tailored to fit multiple and varied workflows. Customizable accessories, power, and storage options allow the cart to be utilized for telehealth, patient registration, charting, medication dispensing, and more.

HI-Swift

This non-powered, lightweight worksurface is designed with mobility in mind. The Swift can also be outfitted for laptops or tablets as needed.

HI-Swift notebook cart

HI-Core notebook cart

HI-Core

The HI-Core non-powered cart line is an innovative blend of convenience, customization, quality engineering, and affordability. These lightweight and easy-to-manuever carts can be customized to fit your needs and workflow.

HI Paradigm

The HI-Paradigm offers secure, organized medicine dispensing in a small, easy-to-maneuver footprint. The electronic lock with keypad, coupled with our Med Manager software, provides premier security capabilities.

HI-Paradigm E
3-tier storage

Med Hub - Transfer cart

Maximize efficiency and ease work flows by teaming Howard's Medical Transfer Carts & Med-Hub with our POC carts. Utilizing our interchangeable cassette system, Transfer carts make it possible for medications to be cassette-transferred securely from the pharmacy and stored in Med-Hub units on patient floors. When it's time for a med pass, nurses can transfer the medication-filled cassettes directly from the Med Hub to their POC carts for safe delivery to patient rooms.

Med-Hub

HI-Pinnacle

The Pinnacle 30 packs a large amount of storage into a small space. This new cart is easy to maneuver and can accommodate multiple accessories.

HI-Pinnacle E
model 30

Cabinets

Strategically placed cabinets increase efficiency by providing more access points for readily available data. Howard Medical cabinets include solutions for both patient rooms and high traffic areas, helping clinicians improve work flows and provide better patient care.

Wall-Mounted Cabinets

Kiosk Solutions

Our kiosk solutions help patients to have the best experience possible within your facility. Surveys indicate that patients are more likely to choose a healthcare provider who allows them to manage their health and medical care using convenient healthcare portals. Our easy-to-use, self-service kiosks are compatible with most EMRs and a perfect fit for healthcare facilities. Healthcare uses include registration, check-in, and billing; wayfinding, virtual concierge, internal HR applications, and many more.

Patient/ Vendor Check-In

The Howard Patient Check-In model kiosk gives your patients control over their healthcare information, helping to minimize errors and improve their experience. Strategic partnerships with other industry professionals enable us to provide you with all the equipment you need to make patient check-in a breeze.

Patient Bill Pay

Howard's Patient Bill-Pay kiosk options enable patients to make payments conveniently and privately during check-in, without requiring assistance from office personnel. During the check-in process, patients can also update personal details and confirm insurance information. Collecting payments and securing verified insurance data in advance helps to streamline office processes and reduces the need for collection services.

Information Access

Allow patients to view their medical records, update account information, schedule appointments, make payments, and more, with interactive kiosk solutions from Howard Medical. Automated information access kiosks are convenient, secure, and help to ensure HIPAA compliance. Information access kiosks increase efficiency, improve financial performance, and result in greater patient satisfaction.

Wayfinding

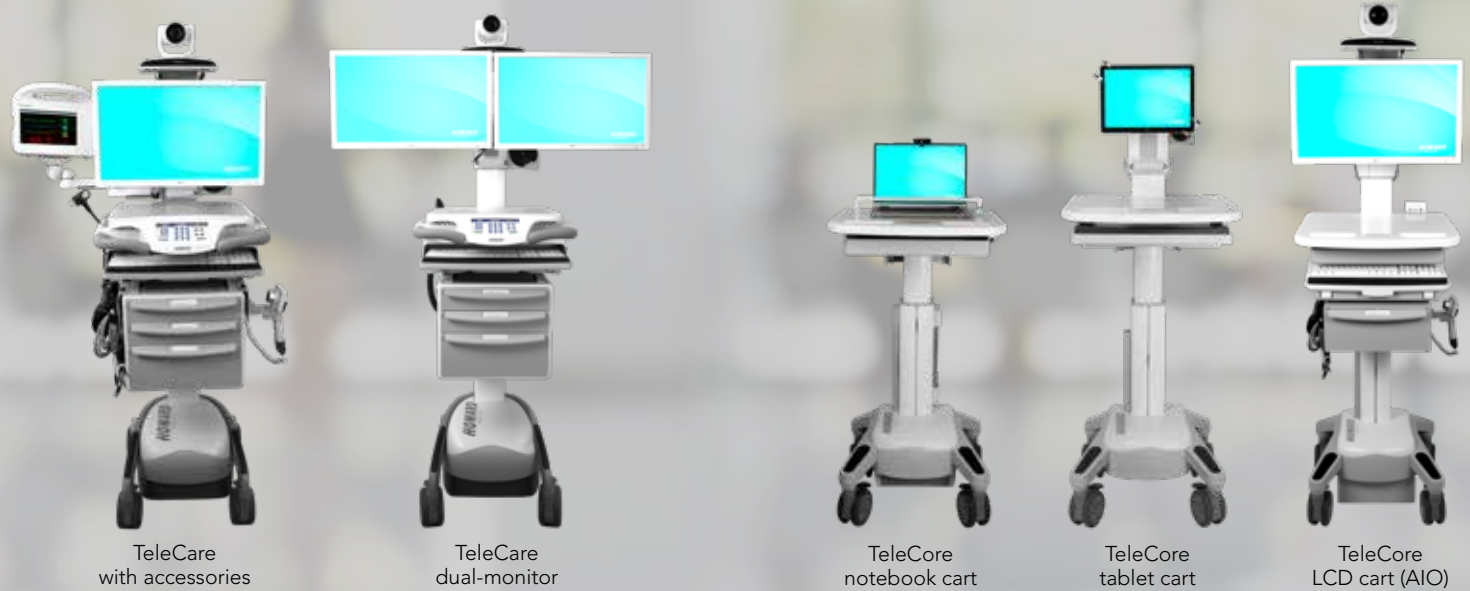

Howard Wayfinding kiosks incorporate a user-friendly platform to help customers and visitors find their way. In addition to enhancing the customer's overall experience, the device can also alleviate reception staff of wayfinding duties in favor of other tasks, increasing workplace efficiency in the process. Wayfinding kiosks can also be configured to promote additional services, specials, and websites.

Telehealth Solutions

Howard Medical's virtual care and telehealth offerings range from easy-to-use kits to full all-in-one solutions for telehealth related communications. Our product offering has combined high-level industry needs with the precision engineering customers have come to expect from Howard Medical. Our uniquely-designed technology is functional and practical for all sizes of telemedicine projects.

Remote Patient Monitoring

Remote Patient Monitoring (RPM) involves the use of physical sensors, sometimes attached to the body of a patient, to read and transmit patient data to a central hub or dashboard. It is somewhat different from telehealth in that RPM is more focused on the data collection aspect of healthcare and diagnosis, while telehealth encompasses healthcare delivered virtually. It aims to give caregivers real-time access to essential health indicators of their patients, allowing them to provide better and quicker services and more accurate diagnoses. RPM also helps care facilities and hospitals lower the cost of patient monitoring and data collection while simultaneously lowering the error rates involved with manual approaches to data collection and management.

In-Room Telehealth

In-room telehealth is a virtual solution that can improve the patient experience by expanding connections to include a patient's support system outside the hospital—family and friends who are unable to visit the hospital in person. It can also include email and instant messaging. In-room telehealth not only facilitates access to caregivers outside the traditional clinician staff, but also gives patients access to the broader emotional support system they need to remain positive and proactive with regard to their own care. In short, in-room telehealth is whole-person virtual care.

Infection Control Solutions

Infection control doesn't just happen. It takes vigilance and the right equipment to protect your environment from the germs, viruses, and harmful bacteria that cause infection. Howard has what you need to combat infection and maintain a healthy environment, from PPE and cleaning products to sanitizing stations, electrostatic disinfectant sprayers, and custom protective acrylic shields. Additional offerings include Howard temperature sensing kiosks, UVC sanitizing solutions, and sanitizable technology. It's your environment, keep it clean and safe with the right supplies from the right supplier—Howard.
