

Virtual Visitor Solutions

Why Virtual Visitor Solutions?

With in-person visitation restrictions put into place during the pandemic, long-term care residents face challenges staying connected to their loved ones. This lack of contact can increase stress and feelings of isolation as residents lose a sense of connection to friends and family. Our Virtual Visitor endpoints allow residents to stay connected remotely, so they can enjoy safe contact with their loved ones. These mobile endpoints can be moved easily throughout the facility and be utilized for physician care as needed.

- **Give patients the safe option of connecting virtually with friends and family**
- **Increase communication, while limiting the potential spread of infection**
- **A mobile solution that can be moved in and out of rooms or areas at ease**
- **Wide range of device and video conferencing software choices to fit your facility's needs**
- **Upgrade to clinical-grade software for behavioral health or general telehealth uses**
- **Reduce physical contact in your facility**

Endpoints

HI-Rise Telepresence Cart

The new Howard HI-Rise cart allows you to expand your telehealth presence quickly in response to COVID-19 and as additional needs arise. The HI-Rise provides clinicians a safe way to interact with patients via video chat and includes a speakerphone mount for hands-free communication. In addition to being sturdy and lightweight, which makes it super maneuverable, the HI-Rise is also height adjustable, making it easy for people of varying heights to use it comfortably. The HI-Rise tablet mount also allows for a wide variety of tablets to best fit your current workflow.

- **Adjustable height for easier viewing angles, whether seated, in bed, or standing**
- **Casters allow for easy deployment to patient rooms, clinical triage, office location, etc**
- **Adjustable design supports most tablets with 8" to 13" screens**
- **Limit the spread of infection by using video conferencing software to allow communication while reducing physical contact**

HI-View Telepresence Cart

The all new Howard HI-View has been designed to help you to expand your telehealth presence in a flash. Simply open the box, attach your tablet, connect, and you're ready to roll! It's that simple. In less time than it takes to wash your hands and put on appropriate personal protective equipment, your healthcare workers can safely connect to their patients remotely—no travel time and costs associated with it. That makes Howard's HI-View a time saver, a money saver, and most importantly, it can be a life saver!

- **Equip with casters for easy mobile deployment to various locations**
- **Can be equipped as a kiosk unit to allow for fixed location deployment**
- **Table mount allows for All-in-One computer mounting for a more robust Telehealth solution**
- **Ready to deploy out of the box, just attach your tablet / PC and it's ready to use**

Endpoints and Clinical Upgrades

Telehealth Solutions **Telehealth HI-View and HI-Rise**

HI-Rise
Telepresence Cart
(height-adjustable)

HI-View
Telepresence Cart
(fixed height)

Features Included:

- Lightweight pole-style tablet cart
- Configurable with casters for mobile use or rubber feet for stationary kiosk mode (HI-View only)
- Adjustable-height column with 14" of range (HI-Rise only)
- Storage basket with handle
- 15' extension cord with cable-management cleat
- 4-port USB hub

Technology Included:

- Windows-based Tablet Computer

Dimensions:

- Overall dimensions: 18.3" W x 17.3" D (HI-Rise)
- Overall dimensions: 18.3" W x 17.3" D (HI-View)

Note: Total number of peripherals selected may be limited due to available USB ports and mounting space.

AGNES Connect®

A Collaborative Patient Assessment Tool for
Enterprise-Wide Telehealth Applications

What Is AGNES Connect®?

AGNES Connect® is cloud-based telemedicine software that enables remote clinical healthcare providers to capture and share medical device data, exchange documents, stream medical images in real-time, and participate in a live video conference - all in a single web-based platform.

How Does it Work?

AGNES Connect® is operational in minutes - no need to configure back-end servers. The cloud-based platform aggregates clinical device diagnostics, vital signs data, encounter documents and live video conferencing and then securely exchanges that information in real-time to the remote consulting physician.

Delivers 100% Real-Time Clinical Examinations via a Virtual Platform

Enables Complete Physician Mobility and Remote Camera Control

Provides Enterprise-Wide Scalability & Security

Integrates to EMRs using HL7 or FHIR

Medical Video:

Allows you to transmit live medical images and video from your integrated medical scopes and devices in 100% real-time.

Stethoscope:

Easily connect a USB digital stethoscope to stream live heart/lung sounds to the remote physician and eliminate the need for stethoscope hardware at the receiving end. When used with our Interactive Stethoscope, it also enables software-based control for frequency ranges and volume.

Session Documents:

To capture the information gathered during the patient assessment in a format that can be shared or saved into an EMR system.

Video Conferencing:

Clinician and remote specialist can teleconference, using the built in point-to-point Video Module. The remote specialist has full PTZ camera controls as well.

Vital Signs:

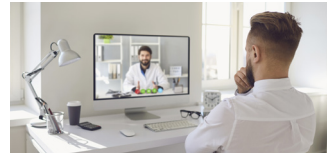

Allows you to integrate medical data directly from an external vital signs monitor, so you can include and capture this information as part of the exam session, for the physician to review and evaluate.

Universal HL7 and EMR Filing:

Seamlessly export information collected during a patient session to a single HL7, FHIR based file. The HL7 module eases the integration with your organization's infrastructure by providing a file that can interface with EMR systems. In a single step, information is ready to be stored with the patient's record.

Video Conferencing Software

ZOOM

Zoom for telehealth reliably delivers consistent clinical user experiences, seamlessly integrates into your technology and workflows, and keeps you connected and compliant. With high quality video, even in low-bandwidth environments, organizations can support healthcare teams and patients around the globe.

Expand Telehealth Consultations and Treatment

Connect physicians, patients, and specialists for regular or urgent care appointments. Easily screen share imaging and test results with all participants.

Health Education for Staff and Patients

Reduce employee travel with cost-effective continuing education and ongoing training for healthcare professionals. Provide progressive health education and preventative care for high-risk patient populations.

Virtual Counseling

Expand behavioral and mental health programs by providing virtual behavioral and mental health in 1-1 or group sessions that patients may join from their homes.

HIPAA-compliant

Zoom allows for multiple members to join in a HIPAA-compliant setting. Doctor, patient, and family members can be in the conversation.

MICROSOFT TEAMS

The hub for teamwork in Microsoft 365

Invite everyone you work with to chat, meet, call, and collaborate all in one place, no matter where you are.

Chat from anywhere

Share your opinion and your personality. Send gifs, stickers, and emojis in a group chat or in one-to-one messages.

Meet from anywhere

Instantly go from group chat to video conference with the touch of a button. Teams of 10 or 10,000 can meet in one place, no matter how many places they're in.

Call from anywhere

Never yell "who just joined?!" ever again. Use Teams calling, Phone System, Calling Plan, or Direct Routing to take the stress out of conference calls.

Collaborate from anywhere

Never do that frantic, searching-for-files thing ever again. In Teams you can access, share, and edit Word docs, PowerPoint, and Excel files in real time.

Telehealth Technology

Dell empowers countries, communities, customers and people everywhere to use technology to realize their dreams. Customers trust us to deliver technology solutions that help them do and achieve more, whether they're at home, work, school or anywhere in their world. Listen. Learn. Deliver. That's what we're about.

HP's vision is to create technology that makes life better for everyone, everywhere — every person, every organization, and every community around the globe. This motivates us — inspires us — to do what we do. To make what we make. To invent, and to reinvent. To engineer experiences that amaze. We won't stop pushing ahead, because you won't stop pushing ahead. You're reinventing how you work. How you play. How you live. With our technology, you'll reinvent your world.

SAMSUNG

As a global leader in enterprise mobility and information technology, Samsung provides enterprise products and services that help customers realize the promise of digital business. Samsung utilizes partnerships to transform our products into end-to-end solutions. From hardware to software to implementation, we work with integrators to bring these solutions to life.

Lenovo

Lenovo's broad product portfolio, deep expertise, industry leading reliability and durability, and relentless focus on innovation that matters makes us the ideal technology partner. We have the right solution for any workplace.
