

Patient Check-In Kiosk Solutions

Maximize patient engagement; streamline check-in processes, increase point-of-service collections, and more with Howard's patient check-in kiosk solutions powered by Dell. They are self-service solutions that give your patients a measure of control. Our highly versatile kiosks can work with nearly any software platform, giving you and your facility the freedom to customize your kiosk to best fit your facility's workflow and maintain facility standards. Patients check-in without requiring assistance or having to wait in line. They update their own registration information. They pay co-pay amounts, sign documents, and print receipts. In fact, the more functions a kiosk can offer to check-in patients, the less manual registration work the front desk employees have to perform. This patient-centric approach to healthcare means that care teams spend less time dealing with administrative duties and more time providing care for patients.

- Reduces patient wait times
- Reduces staffing requirements
- Reduces administrative costs
- Gives patients a measure of control
- Eliminates front desk congestion
- Minimizes data entry errors
- Ensures transaction privacy
- Accelerates collection
- Generates significant ROI

Antimicrobial Coating and Paint

Howard Antimicrobial Displays and Howard Antimicrobial Kiosks kill 99% of bacteria on contact (when compared to non-treated surfaces). Howard utilizes a unique, patented antimicrobial coating innovation that is permanently sintered in during manufacturing to create touchscreens with 24/7 germ-free protection for life. Howard Technology Solutions' kiosk coatings are designed to kill or prevent growth of microorganisms over a 24-hour period of contact using antimicrobial additives that have been proven effective against a broad spectrum of bacteria, including antibiotic-resistant MRSA, E.coli and VRE.

- 24/7 Germ Free Protection For Life
- Tested by Independent Laboratories
- Unique, Patented Antimicrobial Coating

Tangent's Medical Grade All-in-One Computer and Tablet solutions are designed for operations where essential reliability, critical timing, and the security of antimicrobial, wipeable, washable equipment with EPA and CDC Hospital Grade Cleaners are crucial.
