

Our New HI-View Cart

The new Howard HI-View cart allows you to expand your telehealth presence quickly in response to COVID-19 and as additional needs arise. The HI-View, with included Tangent Tablet, provides clinicians a safe way to interact with patients via video chat. It's lightweight, sturdy, and flexible; it can be set up with casters for mobile use and moved from one location to another, or it can be converted into a kiosk by switching the wheels for rubber feet. Each included Tangent tablet has an antimicrobial enclosure that is designed to be cleaned with Hospital Grade Cleaners.

- Economic virtual presence platform for rapid deployment
- Deploy to patient rooms, emergency departments, temporary near-site or offsite locations, and repurposed onsite clinical triage and treatment units
- Reduce physical contact to limit the spread of infection

M8 Tablet

- Antimicrobial enclosure
- Wipeable, cleanable with EPA and CDC Hospital Grade Cleaners
- Optional Bar-Code Scanner and Smart Card Reader

Tangent's Medical Grade, Antimicrobial, Wipeable, PCAP Touch M8 Tablet is designed for increased patient safety, real-time updates at Point-of-Care and can be equipped with a Bar Code Scanner or Smart Card Reader for reliable patient and sample identification.

T13 Tablet

- Antimicrobial enclosure
- Wipeable, cleanable with EPA and CDC Hospital Grade Cleaners
- Hot-swap battery for 24/7 runtime

Tangent's Medical Grade, Rugged, Antimicrobial, Wipeable, PCAP Touch T13 Tablet is equipped with a hot-swap battery for reliable, 24/7 runtime capability.
