## Definitions of Notes

We use the following symbols and conventions throughout this User's Guide:

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="warning.png" alt="WARNING" /></td>
<td>WARNING indicates a potentially hazardous situation which, if not avoided, could result in death or serious injuries.</td>
</tr>
<tr>
<td><img src="caution.png" alt="CAUTION" /></td>
<td>CAUTION indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injuries.</td>
</tr>
<tr>
<td><img src="important.png" alt="IMPORTANT" /></td>
<td>IMPORTANT indicates a potentially hazardous situation which, if not avoided, may result in damage to property or loss of product functionality.</td>
</tr>
<tr>
<td><img src="note.png" alt="NOTE" /></td>
<td>NOTE specifies the operating environment, conditions for installation, or special conditions of use.</td>
</tr>
<tr>
<td><img src="tips.png" alt="Tips" /></td>
<td>Tips icons indicate helpful hints and supplementary information.</td>
</tr>
<tr>
<td><img src="electrical.png" alt="Electrical Hazard" /></td>
<td>Electrical Hazard icons alert you to possible electrical shock.</td>
</tr>
<tr>
<td><img src="fire.png" alt="Fire Hazard" /></td>
<td>Fire Hazard icons alert you to the possibility of a fire.</td>
</tr>
<tr>
<td><img src="hot.png" alt="Hot Surface" /></td>
<td>Hot Surface icons warn you not to touch hot machine parts.</td>
</tr>
<tr>
<td><img src="prohibition.png" alt="Prohibition" /></td>
<td>Prohibition icons indicate actions you must not perform.</td>
</tr>
<tr>
<td><strong>Bold</strong></td>
<td>Bold style identifies buttons on the machine's control panel or computer screen.</td>
</tr>
<tr>
<td><strong>Italics</strong></td>
<td>Italics style emphasises an important point or refers you to a related topic.</td>
</tr>
<tr>
<td><strong>Courier New</strong></td>
<td>Courier New font identifies messages shown on the machine's LCD.</td>
</tr>

Before Using Your Machine

Before attempting any printing operation, confirm the following:
• Make sure you have installed the printer driver.
• For USB or network cable users: Make sure the interface cable is physically secure.

Firewall (Windows®)

If your computer is protected by a firewall and you are unable to network print, you may need to configure the firewall settings. If you are using the Windows® Firewall and you installed the drivers using the steps in the installer, the necessary firewall settings have been already set. If you are using any other personal firewall software, see the User's Guide for your software or contact the software manufacturer.

Control Panel Overview

The control panel may vary depending on your model.

**HL-L3210CW/HL-L3230CDW**

1. **Liquid Crystal Display (LCD)**
   Displays messages to help you set up and use the machine.
   - **Wireless Network Models**
     A four-level indicator shows the wireless signal strength if you are using a wireless connection.

   ![Wireless Signal Levels](image)

2. **WiFi Button**
   Launch the wireless installer on your computer and press the **WiFi** button. Follow the on-screen instructions to set up a wireless connection between your machine and your network.

   When the **WiFi** light is on, your Brother machine is connected to a wireless access point. When the **WiFi** light blinks, the wireless connection is down, or your machine is in the process of connecting to a wireless access point.

3. **Menu Buttons**
   **OK**
   Press to select the displayed option. After you change a setting, the machine returns to the previous menu level.

   **Back**
   - Press to go back one level in the menu.
   - Press to select the previous digit when entering letters or numbers.
▲ or ▼ (+ or -)

- Press to scroll through menus and options.
- Press to enter or change a letter or number. Hold down ▲ or ▼ to scroll faster. When you see the letter or number you want, press OK.

4. Secure
Press to print jobs saved in the memory when you enter your four-digit password.

5. Go
- Press to clear certain error messages. To clear all other errors, follow the LCD instructions.
- Press to print any data remaining in the machine's memory.
- Press to select the displayed option. After you change a setting, the machine returns to Ready Mode.

6. Error LED
The Error LED blinks when the LCD displays an error or an important status message.

7. Data LED
The Data LED blinks depending on the machine's status.
When the Data LED is on, data is in the machine's memory. When the Data LED blinks, the machine is receiving or processing data.

8. Cancel
- Press to cancel the current setting.
- Press to cancel a programmed print job and clear it from the machine's memory. To cancel multiple print jobs, hold down Cancel until the LCD displays [Cancel All Jobs].

9. Power On/Off

- Turn the machine on by pressing ⊗.
- Turn the machine off by pressing and holding down ⊗.
1. **Touchscreen Liquid Crystal Display (LCD)**
   Access menus and options by pressing them on the touchscreen.

2. **Menu buttons**
   - **(Back)**
     Press to go back to the previous menu.
   - **(Home)**
     Press to return to the Home screen.
   - **(Cancel)**
     Press to cancel an operation. Press to cancel a programmed print job and clear it from the machine’s memory.

3. **LED Power Indicator**
   The LED lights up depending on the machine’s power status.

4. **Power On/Off**
   - Turn the machine on by pressing .
   - Turn the machine off by pressing and holding down .

5. **Near Field Communication (NFC)**
   If your Android™ device supports the NFC feature, you can print from your mobile device by touching it to the NFC symbol on the control panel.
Related Information

• Introduction to Your Brother Machine
Touchscreen LCD Overview

From the Home screen, you can access the WiFi setup, Toner level, Settings, and Functions screens. The Home screen displays the machine’s status when the machine is idle. When displayed, this screen indicates that your machine is ready for the next command.

1. **(Wireless Status)**
   If you are using a wireless connection, a four-level indicator in the Home screen displays the current wireless signal strength.

   ![Wireless Status](image)

   - If you see **WiFi** at the top on the screen, press to select a wireless connection method, or edit an existing wireless connection.

2. **[Toner]**
   Displays the remaining toner life. Press to access the [Toner] menu.

3. **[Settings]**
   Press to access the [Settings] menu.
   Use the Settings menu to access all of your Brother machine’s settings.
   If Setting Lock has been turned on, a lock icon appears on the LCD. You must unlock the machine to change any settings.

4. **[Functions]**
   Press to access the Functions screen.
   - **[Secure Print]**
     Press to access the Secure Print option.
   - **[Web]**
     Press to connect the Brother machine to an Internet service.
Warning icon

The warning icon 🚸 appears when there is an error or maintenance message; press 🚸 to view it, and then press ✗ to return to Ready Mode.

**NOTE**

This product adopts the font of ARPHIC TECHNOLOGY CO., LTD.

**Related Information**

- Introduction to Your Brother Machine
Press your finger on the LCD to operate it. To display and access all the options, press ▲ or ▼ on the LCD to scroll through them.

The following steps explain how to navigate through changing the machine’s setting. In this example, the LCD Backlight setting is changed from [Light] to [Med]:

**IMPORTANT**

DO NOT press the LCD with a sharp object such as a pen or stylus. It may damage the machine.

**NOTE**

DO NOT touch the LCD immediately after plugging in the power cord or turning on the machine. Doing this may cause an error.

1. Press [Settings] > [All Settings].
2. Press ▲ or ▼ to display the [General Setup] option, and then press [General Setup].
3. Press ▲ or ▼ to display the [LCD Settings] option, and then press [LCD Settings].
4. Press [Backlight].

Access Brother Utilities (Windows®)

Brother Utilities is an application launcher that offers convenient access to all Brother applications installed on your computer.

1. Do one of the following:
   - (Windows® 7, Windows Server® 2008 and Windows Server® 2008 R2)
     Click (Start) > All Programs > Brother > Brother Utilities.
   - (Windows® 8 and Windows Server® 2012)
     Tap or click (Brother Utilities) either on the Start screen or the desktop.
   - (Windows® 8.1 and Windows Server® 2012 R2)
     Move your mouse to the lower left corner of the Start screen and click (if you are using a touch-based device, swipe up from the bottom of the Start screen to bring up the Apps screen).
     When the Apps screen appears, tap or click (Brother Utilities).
   - (Windows® 10 and Windows Server® 2016)
     Click > Brother > Brother Utilities.

2. Select your machine (where XXXX is the name of your model).

3. Choose the operation you want to use.

Load and Print Using the Paper Tray

- Load Paper in the Paper Tray
- Printing Problems
- Error and Maintenance Messages
Load Paper in the Paper Tray

- If the Check Size setting is set to On and you pull the paper tray out of the machine, a message appears on the LCD asking if you want to change the paper size and paper type. Change the paper size and paper type settings if needed, following the LCD instructions.
- When you load a different size and type of paper in the tray, you must also change the Paper Size and Paper Type settings in the machine, or on your computer.

1. Pull the paper tray completely out of the machine.

2. Press and slide the paper guides to fit the paper.
   Press the green release levers to slide the paper guides.

3. Fan the stack of paper well.

4. Load paper in the paper tray with the printing surface face down.

When you use preprinted paper, load the paper in the correct orientation. See Related Information: Change Machine Settings to Print on Preprinted Paper in the Paper Tray.
5. Make sure the paper is below the maximum paper mark (▷▷▷). Overfilling the paper tray will cause paper jams.

6. Slowly push the paper tray completely into the machine.
7. Lift the support flap to prevent paper from sliding off the output tray.

- Change Machine Settings to Print on Preprinted Paper in the Paper Tray
Change Machine Settings to Print on Preprinted Paper in the Paper Tray

When you use preprinted paper for 2-sided printing, change the machine's settings.

DO NOT load different sizes and types of paper in the paper tray at the same time. Doing this may cause the paper to jam or misfeed.

Orientation

| For 1-sided printing: | • face down  
| | • top edge towards the front of the paper tray |
| For automatic 2-sided printing (long edge binding): | • face up  
| | • bottom edge towards the front of the paper tray |

Load and Print Paper in the Manual Feed Slot

When you load a different paper size in the tray, you must change the Paper Size setting in the machine or on your computer at the same time.

- Plain Paper
- Thin Paper
- Thick Paper
- Recycled Paper
- Bond Paper
- Glossy Paper

1. Lift the support flap to prevent paper from sliding off the face down output tray.

2. Open the manual feed slot cover.

3. Use both hands to slide the manual feed slot paper guides to fit the width of the paper you are using.

4. Using both hands, place one sheet of paper in the manual feed slot until the front edge touches the paper feed roller. When you feel the machine pull it in, let go.
Load paper into the manual feed slot with the printing surface facing up.

Make sure the paper is straight and in the correct position in the manual feed slot. If it is not, the paper may not be fed correctly, resulting in a skewed printout or a paper jam.

5. Send your print job to the machine.

Change your print preferences in the Print screen before sending the print job from your computer.

6. After the printed page comes out from the machine, load the next sheet of paper in the manual feed slot. Repeat for each page that you want to print.

Related Information

- Load and Print Paper in the Manual Feed Slot
Load and Print on Labels in the Manual Feed Slot

When you load a different paper size in the tray, you must change the Paper Size setting in the machine or on your computer at the same time.

1. Open the machine's back cover (the face up output tray).

The machine automatically turns on Manual Feed mode when you load paper in the manual feed slot.

2. On the front of the machine, open the manual feed slot cover.

3. Use both hands to slide the manual feed slot paper guides to fit the width of the paper that you are using.

4. Using both hands, place one sheet of paper in the manual feed slot until the front edge touches the paper feed roller. When you feel the machine pull it in, let go.
5. Send your print job to the machine.

Change your print preferences in the Print screen before sending the print job from your computer.

6. After the printed page comes out from the back of the machine, load the next sheet of paper in the manual feed slot. Repeat for each page that you want to print.

7. Close the back cover (the face up output tray) until it locks in the closed position.

Related Information

- Load and Print Paper in the Manual Feed Slot
Load and Print on Envelopes in the Manual Feed Slot

When you load a different paper size in the tray, you must change the Paper Size setting in the machine or on your computer at the same time.

1. Open the machine's back cover (the face up output tray).

2. Pull down the two grey levers, one on the left side and one on the right side, as shown in the illustration.

3. On the front of the machine, open the manual feed slot cover.

4. Use both hands to slide the manual feed slot paper guides to fit the width of the paper that you are using.
5. Using both hands, put one envelope in the manual feed slot until the front edge touches the paper feed roller. When you feel the machine pull it in, let go.

- Load the envelope into the manual feed slot with the printing surface facing up.
- Pull the envelope out completely when you reload the envelope into the manual feed slot.
- Do not put more than one envelope in the manual feed slot at one time, as it may cause a jam.
- Make sure the envelope is straight and in the correct position on the manual feed slot. If it is not, the envelope may not be fed correctly, resulting in a skewed printout or a paper jam.

6. Send your print job to the machine.

Change your print preferences in the Print dialog box before sending the print job from your computer.

Using Special Paper

Always test paper samples before purchasing them to ensure desirable performance.

- DO NOT use inkjet paper; it may cause a paper jam or damage your machine.
- If you use bond paper, paper with a rough surface, or paper that is wrinkled or creased, the paper may exhibit degraded performance.

Store paper in its original packaging and keep it sealed. Keep the paper flat and away from moisture, direct sunlight and heat.

IMPORTANT

Some types of paper may not perform well or may cause damage to your machine.

DO NOT use paper:
- that is highly textured
- that is extremely smooth or shiny
- that is curled or warped
- that is coated or has a chemical finish
- that is damaged, creased or folded
- that exceeds the recommended weight specification in this guide
- with tabs and staples
- with letterheads using low temperature dyes or thermography
- that is multipart or carbonless
- that is designed for inkjet printing

If you use any of the types of paper listed above, they may damage your machine. This damage is not covered under any Brother warranty or service agreement.

Print a Document (Windows®)

1. Select the print command in your application.

2. Select Brother XXX-XXXX (where XXXX is the name of your model), and then click the printing properties or preferences button.
   The printer driver window appears.

3. Make sure you have loaded the correct size paper in the paper tray.

4. Click the Paper Size drop-down list, and then select your paper size.

5. In the Orientation field, select the Portrait or Landscape option to set the orientation of your printout.
   If your application contains a similar setting, we recommend that you set the orientation using the application.

6. Type the number of copies (1-999) you want in the Copies field.

7. Click the Media Type drop-down list, and then select the type of paper you are using.

8. To print multiple pages on a single sheet of paper or print one page of your document on multiple sheets, click the Multiple Page drop-down list, and then select your options.

9. Change other printer settings if needed.

10. Click OK.

11. Complete your print operation.
Related Information

- Print from Your Computer (Windows®)
- Print Settings (Windows®)
1. **Paper Size**
   Select the size of the paper you want to use. You can either choose from standard paper sizes or create a custom paper size.

2. **Orientation**
   Select the orientation (portrait or landscape) of your printout.
   If your application contains a similar setting, we recommend that you set the orientation using the application.

3. **Copies**
   Type the number of copies (1-999) that you want to print in this field.

   **Collate**
   Select this option to print sets of multi-page documents in the original page order. When this option is selected, one complete copy of your document will print, and then reprint according to the number of copies you choose. If this option is not selected, then each page will print according to the number of copies chosen before the next page of the document is printed.

4. **Media Type**
   Select the type of media you want to use. To achieve the best print results, the machine automatically adjusts its print settings according to the selected media type.
5. **Print Quality**
Select the print resolution you want. Because print quality and speed are related, the higher the quality, the longer it will take to print the document.

6. **Colour / Mono**
Select the Colour/Mono settings to use.

**NOTE**

- The machine’s colour sensor is very sensitive and may perceive faded black text or an off-white background as colour. If you know that your document is black and white and you want to conserve colour toner, select **Mono** mode.
- If either the Cyan, Magenta or Yellow toner reaches the end of its life while printing a colour document, the print job cannot be completed. Cancel your print job and select to start the print job again in **Mono** mode, as long as Black toner is available.

7. **Document Type**
Select the type of document you want to print.

**Settings button**
Specify advanced settings, such as colour mode and other settings.

**Colour Mode**
Select the colour mode to suit your preference.

**Import**
To adjust the print configuration of a particular image, click **Settings**. When you have finished adjusting the image parameters, such as brightness and contrast, import those settings as a print configuration file. Use the **Export** option to create a print configuration file from the current settings.

**Export**
To adjust the print configuration of a particular image, click **Settings**. When you have finished adjusting the image parameters, such as brightness and contrast, export those settings as a print configuration file. Use the **Import** option to load a previously exported configuration file.

**Improve Grey Colour**
Select this option to improve the image quality of shaded areas.

**Enhance Black Printing**
If a black graphic does not print correctly, select this setting.

**Improve Pattern Printing**
Select this option to improve the pattern printing if printed fills and patterns are different from the fills and patterns you see on your computer screen.

8. **Multiple Page**
Select this option to print multiple pages on a single sheet of paper or print one page of your document on multiple sheets.

**Page Order**
Select the page order when printing multiple pages on a single sheet of paper.

**Border Line**
Select the type of border to use when printing multiple pages on a single sheet of paper.

9. **2-sided / Booklet (Available only for certain models)**
Select this option to print on both sides of the paper or print a document in booklet format using 2-sided printing.
2-sided Settings button
Click this button to select the type of 2-sided binding. Four types of 2-sided bindings are available for each orientation.

10. Paper Source
Select the paper source setting according to your print conditions or purpose.

First Page
Select the paper source to use for printing the first page.

Other Pages
Select the paper source to use for printing the second and subsequent pages.

Advanced Tab

1. Scaling
Select these options to enlarge or reduce the size of the pages in your document.

Fit to Paper Size
Select this option to enlarge or reduce the document pages to fit a specified paper size. When you select this option, select the paper size you want from the drop-down list.

Free
Select this option to enlarge or reduce the document pages manually. When you select this option, type a value into the field.
2. **Reverse Print**
   Select this option to rotate the printed image 180 degrees.

3. **Use Watermark**
   Select this option to print a logo or text on your document as a watermark. Select one of the preset watermarks, add a new watermark, or use an image file you have created.

4. **Header-Footer Print**
   Select this option to print the date, time and PC login user name on the document.

5. **Toner Save Mode**
   Select this feature to conserve toner by using less toner to print documents; printouts appear lighter, but are still legible.

6. **Secure Print**
   This feature ensures that confidential or sensitive documents do not print until you enter a password on the machine's control panel.

7. **Administrator**
   This feature allows you to change the administrator password and restrict various printing functions.

8. **User Authentication**
   This feature allows you to confirm the restrictions for each user.

9. **Other Print Options button**

   **Sleep Time**
   Select this option to set the machine to enter sleep mode immediately after printing.

   **Improve Print Output**
   Select this option to reduce the amount of paper curling and improve the toner fixing.

   **Skip Blank Page**
   Select this option to allow the printer driver to automatically detect blank pages and exclude them from printing.

   **TrueType Mode**
   **Mode**
   Select how the fonts are processed for printing.

   **Use Printer TrueType Fonts (Available only for certain models)**
   Select whether to use built-in fonts for the font processing.

   **Eco settings**
   Select this option to reduce printing noise.

- Print from Your Computer (Windows®)
Change the Default Print Settings (Windows®)

When you change an application's print settings, the changes only apply to documents printed with that application. To change print settings for all Windows® applications, you must configure the printer driver properties.

1. Do one of the following:
   • For Windows Server® 2008
     Click (Start) > Control Panel > Hardware and Sound > Printers.
   • For Windows® 7 and Windows Server® 2008 R2
     Click (Start) > Devices and Printers.
   • For Windows® 8
     Move your mouse to the lower right corner of your desktop. When the menu bar appears, click Settings, and then click Control Panel. In the Hardware and Sound group, click View devices and printers.
   • For Windows® 10 and Windows Server® 2016
     Click > Windows System > Control Panel. In the Hardware and Sound group, click View devices and printers.
   • For Windows Server® 2012
     Move your mouse to the lower right corner of your desktop. When the menu bar appears, click Settings, and then click Control Panel. In the Hardware group, click View devices and printers.
   • For Windows Server® 2012 R2
     Click Control Panel on the Start screen. In the Hardware group, click View devices and printers.

2. Right-click the Brother XXX-XXXX icon (where XXXX is your model name), and then select Printer properties. If printer driver options appear, select your printer driver.

3. Click the General tab, and then click the Printing Preferences... or Preferences... button.
   The printer driver dialog box appears.
   
   - To configure the tray settings, click the Device Settings tab (Available only for certain models).
   - To change the printer port, click the Ports tab.

4. Select the print settings you want to use as defaults for all of your Windows® programs.

5. Click OK.

6. Close the printer properties dialog box.

**HL-L3210CW/HL-L3230CDW**

1. From an application, such as Apple TextEdit, click the File menu, and then select Print.
2. Select Brother XXX-XXXX (where XXXX is your model name).
3. Click the application pop-up menu, and then select the Secure Print option. The Secure Print options appear.
4. Select the Secure Print check box.
5. Type your user name, job name and a four-digit password.
6. Click Print.
7. On the machine's control panel, press Secure.
8. Press ▲ or ▼ to display your user name, and then press OK.
   The LCD displays the list of secured jobs for that name.
9. Press ▲ or ▼ to display the job, and then press OK.
10. Enter your four-digit password.
    To enter each digit, press ▲ or ▼ to select a number, and then press OK.
11. Press ▲ or ▼ to select the [Print] option, and then press OK.
12. Press ▲ or ▼ to enter the number of copies you want.
13. Press OK.
    The machine prints the data.

After you have printed the secured data, it will be cleared from the machine's memory.

**HL-L3270CDW**

1. From an application, such as Apple TextEdit, click the File menu, and then select Print.
2. Select Brother XXX-XXXX (where XXXX is your model name).
3. Click the application pop-up menu, and then select the Secure Print option. The Secure Print options appear.
4. Select the Secure Print check box.
5. Type your user name, job name and a four-digit password.
6. Click Print.
7. On the machine's control panel, press [Functions].
8. Press [Secure Print].
9. Press ▲ or ▼ to display user names, and then press your user name.
   The LCD displays the list of secured jobs for your name.
10. Press ▲ or ▼ to display the print job, and then press it.
11. Enter your four-digit password, and then press [OK].
12. Enter the number of copies you want.
13. Press [Start].
After you have printed the secured data, it will be cleared from the machine's memory.

Monitor the Status of the Machine from Your Computer (Mac)

The Status Monitor utility is a configurable software tool for monitoring the status of a device, allowing you to get immediate notification of error messages, such as paper empty or paper jam, at preset update intervals. You can also access Web Based Management.

1. Click the **System Preferences** menu, select **Printers & Scanners**, and then select your machine.
2. Click the **Options & Supplies** button.
3. Click the **Utility** tab, and then click the **Open Printer Utility** button.

Status Monitor starts.

**Troubleshooting**

Click the **Troubleshooting** button to access the troubleshooting website.

**Visit the Genuine Supplies website**

Click the **Visit the Genuine Supplies website** button for more information on Brother genuine supplies.

**Updating the machine's status**

To view the latest machine status while the **Status Monitor** window is open, click the icon. You can set the interval at which the software updates machine status information. Click **Brother Status Monitor** in the menu bar, and then select **Preferences**.

**Web Based Management (Network Connection Only)**

Access the Web Based Management System by clicking the machine icon on the **Status Monitor** screen. You can use a standard Web Browser to manage your machine using HTTP (Hyper Text Transfer Protocol).

1 The default login password to manage machine settings is **initpass**. We recommend you change it to protect your machine from unauthorised access.
Configure and change your Brother machine's network settings using a management utility.

- Learn about Network Management Software and Utilities
- Change Machine Settings from Your Computer
- Change Machine Settings Using Web Based Management
Learn about Network Management Software and Utilities

Web Based Management

Web Based Management is a utility that uses a standard web browser to manage your machine using the Hyper Text Transfer Protocol (HTTP) or Hyper Text Transfer Protocol over Secure Socket Layer (HTTPS). Type your machine's IP address into your web browser to access and change your print server settings.

BRAdmin Light (Windows®)

BRAdmin Light is a utility for the initial setup of Brother network-connected devices. This utility can search for Brother products on your network, view the status and configure the basic network settings, such as IP address.

Go to your model's Downloads page on the Brother Solutions Center at support.brother.com to download BRAdmin Light.

• If using Windows® Firewall, or the firewall function of an anti-spyware or antivirus application, temporarily disable them. When you are sure you can print, configure the software settings following the instructions.

BRAdmin Professional (Windows®)

BRAdmin Professional is a utility for more advanced management of network-connected Brother devices. This utility can search for Brother products on your network and view the device status from an easy-to-read Windows® Explorer-style screen that changes colour to identify the status of each device. You can configure network and device settings, and update device firmware from a Windows® computer on your LAN. BRAdmin Professional can also log activity of Brother devices on your network and export the log data. For users who want to monitor locally-connected machines, install the Print Auditor Client software on the client computer. This utility allows you to use BRAdmin Professional to monitor machines that are connected to a client computer via the USB interface.

• Go to your model's Downloads page on the Brother Solutions Center at support.brother.com to download the latest version of BRAdmin Professional.

• Node name: The node name appears in the current BRAdmin Professional window. The default node name is "BRNxxxxxxxxxxxx" for a wired network or "BRWxxxxxxxxxxxx" for a wireless network (where "xxxxxxxxxxxx" is your machine's MAC Address / Ethernet address).

• If using Windows® Firewall, or the firewall function of an anti-spyware or antivirus application, temporarily disable them. When you are sure you can print, configure the software settings following the instructions.

Before Configuring Your Brother Machine for a Wireless Network

Before attempting to configure a wireless network, confirm the following:

- If you are using an enterprise wireless network, you must know the User ID and Password.
- To achieve optimum results with normal everyday document printing, place the Brother machine as close to the wireless LAN access point/router as possible with minimal obstructions. Large objects and walls between the two devices and interference from other electronic devices can affect the data transfer speed of your documents.

Due to these factors, wireless may not be the best method of connection for all types of documents and applications. If you are printing large files, such as multi-page documents with mixed text and large graphics, you may want to consider selecting wired Ethernet for faster data transfer (supported models only), or USB for the fastest throughput speed.

- Although the Brother machine can be used in both a wired and wireless network (supported models only), only one connection method can be used at a time. However, a wireless network connection and Wi-Fi Direct connection, or a wired network connection (supported models only) and Wi-Fi Direct connection can be used at the same time.

If you do not know the security information (for example, Network Name (SSID) and Network Key), consult the router manufacturer, your system administrator, or your Internet provider.

Related Information

- Additional Methods of Configuring Your Brother Machine for a Wireless Network
Configure Your Machine for a Wireless Network

1. Turn on your computer and insert the Brother installation disc into your computer.
   - For Windows®, follow these instructions:
   - For Mac, click Driver Download to go to the Brother Solutions Center. Follow the on-screen instructions to install printer drivers.

2. The opening screen appears automatically.
   Choose your language, and then follow the on-screen instructions.

   If the Brother screen does not appear, do the following:
   - (Windows® 7)
     Go to Computer. Double-click the CD/DVD icon, and then double-click start.exe.
   - (Windows® 8 and Windows® 10)
     Click the (File Explorer) icon on the taskbar, and then go to Computer (This PC). Double-click the CD/DVD icon, and then double-click start.exe.
     If the User Account Control screen appears, click Yes.

3. Choose Wireless Network Connection (Wi-Fi), and then click Next.

4. Follow the on-screen instructions.

You have completed the wireless network setup. To install the Full Driver & Software Package necessary for operating your machine, insert the Brother installation disc into your computer, or go to your model's Downloads page on the Brother Solutions Center at support.brother.com.

- Additional Methods of Configuring Your Brother Machine for a Wireless Network
Configure Your Machine for a Wireless Network Using the One Push Method of Wi-Fi Protected Setup™ (WPS)

If your wireless access point/router supports WPS (PBC: Push Button Configuration), you can use WPS from your machine's control panel menu to configure your wireless network settings.

Routers or access points that support WPS are marked with this symbol:

> HL-L3210CW/HL-L3230CDW
> HL-L3270CDW

### HL-L3210CW/HL-L3230CDW

1. Press ▲ or ▼ to select the [Network] option, and then press OK.
2. Press ▲ or ▼ to select the [WLAN] option, and then press OK.
3. Press ▲ or ▼ to select the [WPS] option, and then press OK.
4. When [WLAN Enable?] appears, select On.
   This will start the wireless setup wizard.
5. When the LCD displays [Press Key on rtr], press the WPS button on your wireless access point/router. Press ▲ on the machine's control panel. Your machine will automatically detect your wireless access point/router and try to connect to your wireless network.

If your wireless device is connected successfully, the machine's LCD displays [Connected].

You have completed the wireless network setup. To install the Full Driver & Software Package necessary for operating your machine, insert the Brother installation disc into your computer, or go to your model's Downloads page on the Brother Solutions Center at support.brother.com.

### HL-L3270CDW

1. Press [Settings] > [All Settings] > [Network] > [WLAN] > [WPS].
2. When [Enable WLAN?] appears, press [Yes].
   This will start the wireless setup wizard. To cancel, press [No].
3. When the touchscreen displays [Start WPS on your wireless access point/router, then press [OK].], press the WPS button on your wireless access point/router. Then press [OK] on your machine. Your machine will automatically detect your wireless access point/router and try to connect to your wireless network.

If your wireless device is connected successfully, the machine's LCD displays [Connected].

You have completed the wireless network setup. To install the Full Driver & Software Package necessary for operating your machine, insert the Brother installation disc into your computer, or go to your model's Downloads page on the Brother Solutions Center at support.brother.com.

Configure Your Machine for a Wireless Network Using the PIN Method of Wi-Fi Protected Setup™ (WPS)

If your wireless LAN access point/router supports WPS, you can use the Personal Identification Number (PIN) Method to configure your wireless network settings.

The PIN Method is one of the connection methods developed by the Wi-Fi Alliance®. By submitting a PIN created by an Enrollee (your machine) to the Registrar (a device that manages the wireless LAN), you can set up the wireless network and security settings. For more information on how to access WPS mode, see the instructions provided with your wireless access point/router.

**Type A**

Connection when the wireless LAN access point/router (1) doubles as the Registrar:

![Type A Diagram]

**Type B**

Connection when another device (2), such as a computer, is used as the Registrar:
Routers or access points that support WPS are marked with this symbol:

![WPS symbol]

---

**HL-L3210CW/HL-L3230CDW**

1. Press \( \text{a} \) or \( \text{b} \) to select the [Network] option, and then press \( \text{OK} \).
2. Press \( \text{a} \) or \( \text{b} \) to select the [WLAN] option, and then press \( \text{OK} \).
3. Press \( \text{a} \) or \( \text{b} \) to select the [WPS w/PIN Code] option, and then press \( \text{OK} \).
4. When [WLAN Enable?] appears, select On.
   
   This will start the wireless setup wizard.
5. The LCD displays an eight-digit PIN and the machine starts searching for a wireless LAN access point/router.
6. Using a computer connected to the network, in your browser's address bar, type the IP address of the device you are using as the Registrar. (For example: http://192.168.1.2)
7. Go to the WPS settings page and type the PIN, and then follow the on-screen instructions.

- The Registrar is usually the wireless LAN access point/router.
- The settings page will differ depending on the brand of wireless LAN access point/router. For more information, see the instructions supplied with your wireless LAN access point/router.

If you are using a Windows® 7, Windows® 8, or Windows® 10 computer as a Registrar, complete the following steps:
8. Do one of the following:
   - Windows® 7
Click (Start) > Devices and Printers > Add a device.

- Windows® 8
  Move your mouse to the lower right corner of your desktop. When the menu bar appears, click Settings > Control Panel > Hardware and Sound > Devices and Printers > Add a device.

- Windows® 10
  Click > Windows System > Control Panel. In the Hardware and Sound group, click Add a device.

To use a Windows® 7, Windows® 8, or Windows® 10 computer as a Registrar, you must register it to your network in advance. For more information, see the instructions supplied with your wireless LAN access point/router.

If you use Windows® 7, Windows® 8, or Windows® 10 as a Registrar, you can install the printer driver after the wireless configuration by following the on-screen instructions. To install the Full Driver & Software Package necessary for operating your machine, insert the Brother installation disc into your computer or go to your model's Downloads page on the Brother Solutions Center at support.brother.com.

9. Select your machine and click Next.
10. Type the PIN displayed on the machine's LCD, and then click Next.
11. (Windows® 7) Select your network, and then click Next.
12. Click Close.

If your wireless device is connected successfully, the machine's LCD displays [Connected].

You have completed the wireless network setup. To install the Full Driver & Software Package necessary for operating your machine, insert the Brother installation disc into your computer, or go to your model's Downloads page on the Brother Solutions Center at support.brother.com.

HL-L3270CDW

1. Press [Settings] > [All Settings] > [Network] > [WLAN] > [WPS w/ PIN Code].

- Your access point/router may support the use of multiple WEP keys, however your Brother machine supports the use of the first WEP key only.
- If you need assistance during setup and want to contact Brother customer service, make sure you have your SSID (Network Name) and Network Key ready. We cannot assist you in locating this information.
- If you do not know this information (SSID and Network Key), you cannot continue the wireless setup.

How can I find this information?
- Check the documentation provided with your wireless access point/router.
- The initial SSID could be the manufacturer's name or the model name.
- If you do not know the security information, please consult the router manufacturer, your system administrator, or your Internet provider.

2. Press ▲ or ▼ to select the [Network] option, and then press OK.
3. Press ▲ or ▼ to select the [WLAN] option, and then press OK.
4. Press ▲ or ▼ to select the [Setup Wizard] option, and then press OK.
5. When [WLAN Enable?] appears, select On.
   This will start the wireless setup wizard.
6. The machine will search for your network and display a list of available SSIDs. When a list of SSIDs appears, press ▲ or ▼ to select the SSID you want.
7. Press OK.
8. Do one of the following:
   - If you are using an authentication and encryption method that requires a Network Key, enter the Network Key you wrote down in the first step.
     Enter the key, and then press OK to apply your settings.
To apply the settings, select [Yes].

- If your authentication method is Open System and your encryption mode is None, go to the next step.

9. The machine attempts to connect to the wireless device you have selected.

If your wireless device is connected successfully, the machine's LCD displays [Connected].

You have completed the wireless network setup. To install the Full Driver & Software Package necessary for operating your machine, insert the Brother installation disc into your computer, or go to your model's Downloads page on the Brother Solutions Center at support.brother.com.

<td>WPA2-PSK</td>
<td>AES</td>
<td>12345678</td>
</tr>
</tbody>
</table>

If your router uses WEP encryption, enter the key used as the first WEP key. Your Brother machine supports the use of the first WEP key only.

2. Press ▲ or ▼ to select the [Network] option, and then press OK.
3. Press ▲ or ▼ to select the [WLAN] option, and then press OK.
4. Press ▲ or ▼ to select the [Setup Wizard] option, and then press OK.
5. When [WLAN Enable?] appears, select On.

This will start the wireless setup wizard.

6. The machine will search for your network and display a list of available SSIDs. Press ▲ or ▼ to select the [<New SSID>] option, and then press OK.
7. Enter the SSID name, and then press OK.
8. Select the [Infrastructure] option, and then press OK.
9. Press ▲ or ▼ to select the Authentication Method you want, and then press OK.
10. Do one of the following:
    - If you selected the [Open System] option, press ▲ or ▼ to select the Encryption Type [None] or [WEP], and then press OK.
    - If you selected the [WEP] option for Encryption Type, enter the WEP key, and then press OK.
    - If you selected the [Shared Key] option, enter the WEP key, and then press OK.
If you selected the [WPA/WPA2-PSK] option, press ▲ or ▼ to select the Encryption Type [TKIP+AES] or [AES], and then press OK.

Enter the WPA™ key, and then press OK.

Your Brother machine supports the use of the first WEP key only.

11. To apply the settings, select [Yes].

12. The machine will attempt to connect to the wireless device you have selected.

If your wireless device is connected successfully, the machine's LCD displays [Connected].

You have completed the wireless network setup. To install the Full Driver & Software Package necessary for operating your machine, insert the Brother installation disc into your computer, or go to your model's Downloads page on the Brother Solutions Center at support.brother.com.

HL-L3270CDW

Before configuring your machine, we recommend writing down your wireless network settings. You will need this information before you continue with the configuration.

1. Check and write down the current wireless network settings.

• If you configure your machine using EAP-TLS authentication, you must install the client certificate issued by a CA before you start configuration. Contact your network administrator about the client certificate. If you have installed more than one certificate, we recommend writing down the certificate name you want to use.
• If you verify your machine using the common name of the server certificate, we recommend writing down the common name before you start configuration. Contact your network administrator about the common name of the server certificate.

2. Press ▲ or ▼ to select the [Network] option, and then press OK.
3. Press ▲ or ▼ to select the [WLAN] option, and then press OK.
4. Press ▲ or ▼ to select the [Setup Wizard] option, and then press OK.
5. When [WLAN Enable?] appears, select On. This will start the wireless setup wizard.
6. The machine will search for your network and display a list of available SSIDs. Press ▲ or ▼ to select the [<New SSID>] option, and then press OK.
7. Enter the SSID name, and then press OK.
8. Select the [Infrastructure] option, and then press OK.
9. Press ▲ or ▼ to select the Authentication Method you want, and then press OK.
10. Do one of the following:
   • If you selected the [LEAP] option, enter the user ID, and then press OK.
   • If you selected the [EAP-FAST], [PEAP] or [EAP-TTLS] option, press ▲ or ▼ to select the Inner Authentication Method [NONE], [CHAP], [MS-CHAP], [MS-CHAPv2], [PAP] or [GTC], and then press OK.

Depending on your Authentication Method, the Inner Authentication Method selections differ.

- Press ▲ or ▼ to select the Encryption Type [TKIP+AES] or [AES], and then press OK.
- Press ▲ or ▼ to select the Verification Method [No Verification], [CA] or [CA+Server ID], and then press OK.
  - If you selected the [CA+Server ID] option, enter the server ID, user ID and password (if required), and then press OK for each option.
  - For other selections, enter the user ID and the Password, and then press OK for each option.

If you have not imported a CA certificate into your machine, the machine will display the message [No Verification].

- If you selected the [EAP-TLS] option, press ▲ or ▼ to select the Encryption Type [TKIP+AES] or [AES], and then press OK.

When the machine displays a list of available Client Certificates, select the certificate you want.

Press ▲ or ▼ to select the Verification Method [No Verification], [CA] or [CA+Server ID], and then press OK.
  - If you selected the [CA+Server ID] option, enter the server ID and user ID, and then press OK for each option.
  - For other selections, enter the user ID, and then press OK.

11. To apply the settings, press ▲. To cancel, press ▼.
12. The machine will attempt to connect to the wireless device you have selected.

If your wireless device is connected successfully, the machine's LCD displays [Connected].

You have completed the wireless network setup. To install Full Driver & Software Package necessary for operating your device, insert the Brother installation disc into your computer or go to your model's Downloads page on the Brother Solutions Center at support.brother.com.
Before configuring your machine, we recommend writing down your wireless network settings. You will need this information before you continue with the configuration.

Print from Your Mobile Device Using Wi-Fi Direct

Wi-Fi Direct is one of the wireless configuration methods developed by the Wi-Fi Alliance®. It allows you to configure a secured wireless network between your Brother machine and a mobile device, such as an Android™ device, Windows® device, iPhone, iPod touch, or iPad, without using an access point. Wi-Fi Direct supports wireless network configuration using the one-push or PIN Method of Wi-Fi Protected Setup™ (WPS). You can also configure a wireless network by manually setting an SSID and password. Your Brother machine's Wi-Fi Direct feature supports WPA2™ security with AES encryption.

1. Mobile device
2. Your Brother machine

- Although the Brother machine can be used in both a wired and wireless network, only one connection method can be used at a time. However, a wireless network connection and Wi-Fi Direct connection, or a wired network connection (supported models only) and Wi-Fi Direct connection can be used at the same time.
- The Wi-Fi Direct-supported device can become a Group Owner (G/O). When configuring the Wi-Fi Direct network, the G/O serves as an access point.

</tbody>
</table>

2. Does your mobile device support one-push configuration for Wi-Fi Direct?

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes</td>
<td>See Related Information: Configure Your Wi-Fi Direct Network Using the One-Push Method.</td>
</tr>
<tr>
<td>No</td>
<td>See Related Information: Configure Your Wi-Fi Direct Network Using the PIN Method.</td>
</tr>
</tbody>
</table>

3. Does your mobile device support Wi-Fi Protected Setup™ (WPS)?

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes</td>
<td>Go to Step 4</td>
</tr>
<tr>
<td>No</td>
<td>See Related Information: Configure Your Wi-Fi Direct Network Manually.</td>
</tr>
</tbody>
</table>

4. Does your mobile device support one-push configuration for Wi-Fi Protected Setup™ (WPS)?

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes</td>
<td>See Related Information: Configure Your Wi-Fi Direct Network Using the One-Push Method of Wi-Fi Protected Setup™ (WPS).</td>
</tr>
<tr>
<td>No</td>
<td>See Related Information: Configure Your Wi-Fi Direct Network Using the PIN Method of Wi-Fi Protected Setup™ (WPS).</td>
</tr>
</tbody>
</table>

To use Brother iPrint&Scan functionality in a Wi-Fi Direct network configured by one-push configuration using Wi-Fi Direct or by PIN Method configuration using Wi-Fi Direct, the device you use to configure Wi-Fi Direct must be running Android™ 4.0 or greater.

>> HL-L3270CDW

### HL-L3210CW/HL-L3230CDW

If your mobile device supports Wi-Fi Direct, follow these steps to configure a Wi-Fi Direct network:

1. Press ▲ or ▼ to select the [Network] option, and then press OK.
2. Press ▲ or ▼ to select the [Wi-Fi Direct] option, and then press OK.
3. Press ▲ or ▼ to select the [Push Button] option, and then press OK.
4. When [Wi-Fi Direct On?] appears, select On.
5. Activate Wi-Fi Direct on your mobile device (see your mobile device's user's guide for instructions) when [Activate Wi-Fi Direct on other device and press OK.] appears on the machine's LCD. Press OK on your machine.
   This will start the Wi-Fi Direct setup.
6. Do one of the following:
   - When your Brother machine is the Group Owner (G/O), connect your mobile device to the machine directly.
   - When your Brother machine is not the G/O, it will display available device names with which to configure a Wi-Fi Direct network. Press ▲ or ▼ to select the mobile device you want to connect to and press OK. To search for available devices again, select [<Rescan>], and then press OK.
7. If your mobile device connects successfully, the machine's LCD displays [Connected]. You have completed the Wi-Fi Direct network setup.

### HL-L3270CDW

If your mobile device supports Wi-Fi Direct, follow these steps to configure a Wi-Fi Direct network:

When the machine receives the Wi-Fi Direct request from your mobile device, the message [Wi-Fi Direct connection request received. Press [OK] to connect.] will appear on the LCD. Press [OK] to connect.

1. Press [Settings] > [All Settings] > [Network] > [Wi-Fi Direct] > [Push Button].
2. Activate Wi-Fi Direct on your mobile device (see your mobile device’s user's guide for instructions) when [Activate Wi-Fi Direct on other device. Then Press [OK].] appears on the machine's LCD. Press [OK] on your machine.
   This will start the Wi-Fi Direct setup. To cancel, press X.
3. Do one of the following:
   - When your Brother machine is the Group Owner (G/O), connect your mobile device to the machine directly.
   - When your Brother machine is not the G/O, it displays available device names with which to configure a Wi-Fi Direct network. Select the mobile device you want to connect to. Search for available devices again by pressing [Rescan].
4. If your mobile device connects successfully, the machine's LCD displays [Connected]. You have completed the Wi-Fi Direct network setup.
Related Information

- Configure Your Wi-Fi Direct Network
- Wi-Fi Direct Network Configuration Overview
Configure Your Wi-Fi Direct Network Using the One-Push Method of Wi-Fi Protected Setup™ (WPS)

If your mobile device supports WPS (PBC: Push Button Configuration), follow these steps to configure a Wi-Fi Direct network:

1. Press ▲ or ▼ to select the [Network] option, and then press OK.
2. Press ▲ or ▼ to select the [Wi-Fi Direct] option, and then press OK.
3. Press ▲ or ▼ to select the [Group Owner] option, and then press OK.
4. Press ▲ or ▼ to select the [On] option, and then press OK.
5. Press ▲ or ▼ to select the [Push Button] option, and then press OK.
6. When [Wi-Fi Direct On?] appears, select On.
7. Activate your mobile device's WPS one-push configuration method (see your mobile device's user's guide for instructions) when [Activate Wi-Fi Direct on other device and press OK.] appears on the machine's LCD. Press OK on your machine.
   This will start the Wi-Fi Direct setup.
8. If your mobile device connects successfully, the machine's LCD displays [Connected]. You have completed the Wi-Fi Direct network setup.

>> HL-L3210CW/HL-L3230CDW
>> HL-L3270CDW

**HL-L3210CW/HL-L3230CDW**

If your mobile device supports the PIN Method of Wi-Fi Direct, follow these steps to configure a Wi-Fi Direct network:

1. Press ▲ or ▼ to select the [Network] option, and then press OK.
2. Press ▲ or ▼ to select the [Wi-Fi Direct] option, and then press OK.
3. Press ▲ or ▼ to select the [PIN Code] option, and then press OK.
4. When [Wi-Fi Direct On?] appears, select On.
5. Activate Wi-Fi Direct on your mobile device (see your mobile device's user's guide for instructions) when [Activate Wi-Fi Direct on other device and press OK.] appears on the machine's LCD. Press OK on your machine.
   This will start the Wi-Fi Direct setup.
6. Do one of the following:
   - When your Brother machine is the Group Owner (G/O), it will wait for a connection request from your mobile device. When [Input PIN Code] appears, enter the PIN displayed on your mobile device in your Brother machine. Press OK to complete the setup. If the PIN is displayed on your Brother machine, enter the PIN in your mobile device.
   - When your Brother machine is not the G/O, it will display available device names with which to configure a Wi-Fi Direct network. Press ▲ or ▼ to select the mobile device you want to connect to and press OK. To search for available devices again, select [<Rescan>], and then press OK.
7. Do one of the following:
   - Select [Display] to display the PIN on your Brother machine, enter the PIN in your mobile device, and then go to the next step.
   - Select [Input] to enter the PIN displayed by your mobile device in your Brother machine. Press OK, and then go to the next step.
   If your mobile device does not display a PIN, press Back on your Brother machine. Go back to the first step and try again.
8. If your mobile device connects successfully, the machine's LCD displays [Connected]. You have completed the Wi-Fi Direct network setup.

**HL-L3270CDW**

If your mobile device supports the PIN Method of Wi-Fi Direct, follow these steps to configure a Wi-Fi Direct network:

When the machine receives the Wi-Fi Direct request from your mobile device, the message [Wi-Fi Direct connection request received. Press [OK] to connect.] will appear on the LCD. Press [OK] to connect.

1. Press [Settings] > [All Settings] > [Network] > [Wi-Fi Direct] > [PIN Code].
2. Activate Wi-Fi Direct on your mobile device (see your mobile device's user's guide for instructions) when [Activate Wi-Fi Direct on other device. Then Press [OK].] appears on the machine's LCD. Press [OK] on your machine.
   This will start the Wi-Fi Direct setup. To cancel, press ✗.
3. Do one of the following:
   - When your Brother machine is the Group Owner (G/O), it will wait for a connection request from your mobile device. When [PIN Code] appears, enter the PIN displayed on your mobile device in the machine. Press [OK] to complete the setup.
     If the PIN is displayed on your Brother machine, enter the PIN in your mobile device.
   - When your Brother machine is not the G/O, it displays available device names with which to configure a Wi-Fi Direct network. Select the mobile device you want to connect to. Search for available devices again by pressing [Rescan].

4. Do one of the following:
   - Press [Display PIN Code] to display the PIN on your Brother machine and enter the PIN in your mobile device. Go to the next step.
   - Press [Input PIN Code] to enter the PIN displayed by your mobile device in the machine, and then press [OK]. Go to the next step.
     If your mobile device does not display a PIN, press on your Brother machine. Go back to the first step and try again.

5. If your mobile device connects successfully, the machine's LCD displays [Connected]. You have completed the Wi-Fi Direct network setup.

1. Press ▲ or ▼ to select the [Network] option, and then press OK.
2. Press ▲ or ▼ to select the [Wi-Fi Direct] option, and then press OK.
3. Press ▲ or ▼ to select the [Group Owner] option, and then press OK.
4. Press ▲ or ▼ to select the [On] option, and then press OK.
5. Press ▲ or ▼ to select the [PIN Code] option, and then press OK.
6. When [Wi-Fi Direct On?] appears, select On.
7. Activate your mobile device's WPS PIN configuration method (see your mobile device's user's guide for instructions) when [Activate Wi-Fi Direct on other device and press OK.] appears on the machine's LCD. Press OK on your machine.
   This will start the Wi-Fi Direct setup.
8. The machine will wait for a connection request from your mobile device. When [Input PIN Code] appears, enter the PIN displayed on your mobile device in the machine.
9. Press OK.
10. If your mobile device connects successfully, the machine's LCD displays [Connected]. You have completed the Wi-Fi Direct network setup.

If your mobile device supports the PIN Method of Wi-Fi Protected Setup™ (WPS), follow these steps to configure a Wi-Fi Direct network:

1. Press [Settings] > [All Settings] > [Network] > [Wi-Fi Direct] > [Group Owner].
2. Press [On].
4. When [Activate Wi-Fi Direct on other device. Then Press [OK].] appears, activate your mobile device's WPS PIN configuration method (see your mobile device's user's guide for instructions) and then press [OK] on your Brother machine.
   This will start the Wi-Fi Direct setup. To cancel, press X.
5. The machine will wait for a connection request from your mobile device. When [PIN Code] appears, enter the PIN displayed on your mobile device in to the machine. Press [OK].
6. If your mobile device connects successfully, the machine's LCD displays [Connected]. You have completed the Wi-Fi Direct network setup.

Manage Your Network Machine Securely Using SSL/TLS

- Introduction to SSL/TLS
- Certificates and Web Based Management
- Manage Your Network Machine Securely Using Web Based Management
- Manage Your Network Machine Securely Using BRAdmin Professional (Windows®)
- Print Documents Securely Using SSL/TLS
Introduction to SSL/TLS

Secure Socket Layer (SSL) or Transport Layer Security (TLS) is an effective method of protecting data sent over a local or wide area network (LAN or WAN). It works by encrypting data, such as a print job, sent over a network, so anyone trying to capture it will not be able to read it.

SSL/TLS can be configured on both wired and wireless networks and will work with other forms of security such as WPA keys and firewalls.

Related Information

- Manage Your Network Machine Securely Using SSL/TLS
- Brief History of SSL/TLS
- Benefits of Using SSL/TLS
Brief History of SSL/TLS

SSL/TLS was originally created to secure web traffic information, particularly data sent between web browsers and servers. For example, when you use Internet Explorer® for Internet Banking and you see https:// and the little padlock icon in the web browser, you are using SSL. SSL grew to work with additional applications, such as Telnet, printer, and FTP software, in order to become a universal solution for online security. Its original design intentions are still being used today by many online retailers and banks to secure sensitive data, such as credit card numbers, customer records, etc.

SSL/TLS uses extremely high levels of encryption and is trusted by banks all over the world.

Related Information

- Introduction to SSL/TLS
Benefits of Using SSL/TLS

The primary benefit of using SSL/TLS on Brother machines is to guarantee secure printing over an IP network by restricting unauthorised users from reading data sent to the machine. SSL's key selling point is that it can be used to print confidential data securely. For example, an HR department in a large company may be printing wage slips on a regular basis. Without encryption, the data contained on these wages slips can be read by other network users. However, with SSL/TLS, anyone trying to capture the data will see a confusing page of code and not the actual wage slip.

Certificates and Web Based Management

You must configure a certificate to manage your networked Brother machine securely using SSL/TLS. You must use Web Based Management to configure a certificate.

- Supported Security Certificate Features
- Create and Install a Certificate
- Manage Multiple Certificates
Supported Security Certificate Features

Your Brother machine supports the use of multiple security certificates, which allows secure management, authentication, and communication with the machine. The following security certificate features can be used with the machine:

- SSL/TLS communication
- SSL communication for SMTP
- IEEE 802.1x authentication

The Brother machine supports the following:

- Pre-installed certificate
  Your machine has a pre-installed self-signed certificate. This certificate enables you to use SSL/TLS communication without creating or installing a different certificate.

  The pre-installed self-signed certificate protects your communication up to a certain level. We recommend using a certificate that is issued by a trusted organisation for better security.

- Self-signed certificate
  This print server issues its own certificate. Using this certificate, you can easily use the SSL/TLS communication without creating or installing a different certificate from a CA.

- Certificate from a Certificate Authority (CA)
  There are two methods for installing a certificate from a CA. If you already have a certificate from a CA or if you want to use a certificate from an external trusted CA:
  - When using a Certificate Signing Request (CSR) from this print server.
  - When importing a certificate and a private key.

- Certificate Authority (CA) Certificate
  To use a CA certificate that identifies the CA and owns its private key, you must import that CA certificate from the CA before configuring the security features of the Network.

  If you are going to use SSL/TLS communication, we recommend contacting your system administrator first.

  When you reset the print server back to its default factory settings, the certificate and the private key that are installed will be deleted. If you want to keep the same certificate and the private key after resetting the print server, export them before resetting, and then reinstate them.

Related Information

- Certificates and Web Based Management
Create and Install a Certificate

- Step by Step Guide for Creating and Installing a Certificate
- Create and Install a Self-signed Certificate
- Create and Install a Certificate from a Certificate Authority (CA)
- Import and Export a CA Certificate
Step by Step Guide for Creating and Installing a Certificate

There are two options when choosing a security certificate: use a self-signed certificate or use a certificate from a Certificate Authority (CA).

These are a brief summary of the actions required, based on the option you choose.

Option 1

Self-Signed Certificate

1. Create a self-signed certificate using Web Based Management.
2. Install the self-signed certificate on your computer.

Option 2

Certificate from a CA

1. Create a Certificate Signing Request (CSR) using Web Based Management.
2. Install the certificate issued by the CA on your Brother machine using Web Based Management.
3. Install the certificate on your computer.

Related Information

- Create and Install a Certificate
Create and Install a Self-signed Certificate

- Create a Self-signed Certificate
- Install the Self-signed Certificate for Windows® users with Administrator Rights
- Import and Export the Self-signed Certificate on your Brother Machine
Create a Self-signed Certificate

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example: https://192.168.1.2
   • If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.
     - For example: https://SharedPrinter
     • If you enable a NetBIOS name, you can also use the node name.
       - For example: https://brnxxxxxxxxxxxx
       The NetBIOS name can be found in the Network Configuration Report.
   • For Mac, access Web Based Management by clicking the machine's icon on the Status Monitor screen.
3. If the machine prompts you for a password, type it, and then click.
4. Click the Network tab.
5. Click the Security tab.
6. Click the Certificate menu in the left navigation bar.
7. Click Create Self-Signed Certificate.
8. Enter a Common Name and a Valid Date.
   • The length of the Common Name is less than 64 bytes. Enter an identifier, such as an IP address, node name, or domain name to use when accessing this machine through SSL/TLS communication. The node name is displayed by default.
   • A warning will appear if you use the IPPS or HTTPS protocol and enter a different name in the URL than the Common Name that was used for the self-signed certificate.
9. Select your setting from the Public Key Algorithm drop-down list. The default setting is RSA(2048bit).
10. Select your setting from the Digest Algorithm drop-down list. The default setting is SHA256.
11. Click Submit.
12. Click the Network tab.
13. Click the Protocol menu in the left navigation bar.
14. Click HTTP Server Settings.
15. Select the certificate you want to configure from the Select the Certificate drop-down list.
16. Click Submit.
17. Click Yes to restart your print server.

The self-signed certificate is created and saved in your machine's memory.

To use SSL/TLS communication, the self-signed certificate must be installed on your computer.

Related Information

- Create and Install a Self-signed Certificate
Install the Self-signed Certificate for Windows® users with Administrator Rights

The following steps are for Microsoft® Internet Explorer®. If you use another web browser, consult the documentation for your web browser to get help with installing certificates.

1. Do one of the following:
   • (Windows® 7 and Windows Server® 2008)
     Click (Start) > All Programs.
   • (Windows® 8 )
     Right-click the (Internet Explorer) icon on the taskbar.
   • (Windows® 10 and Windows Server® 2016)
     Click > Windows Accessories.
   • (Windows Server® 2012 and Windows Server® 2012 R2)
     Click (Internet Explorer), and then right-click the (Internet Explorer) icon that appears on the taskbar.

2. Right-click Internet Explorer, and then click Run as administrator.

   If the More option appears, click More.

   If the User Account Control screen appears, click Yes.

3. Type "https://machine's IP address" in your browser's address bar to access your machine (where "machine's IP address" is the machine's IP address or the node name that you assigned for the certificate).

4. Click Continue to this website (not recommended).

5. Click Certificate error, and then click View certificates.
6. Click Install Certificate…

7. When the Certificate Import Wizard appears, click Next.

8. Select Place all certificates in the following store, and then click Browse….

9. Select Trusted Root Certification Authorities, and then click OK.

10. Click Next.

11. Click Finish.

12. Click Yes, if the fingerprint (thumbprint) is correct.

13. Click OK.

The self-signed certificate is now installed on your computer, and SSL/TLS communication is available.

Related Information

• Create and Install a Self-signed Certificate
Import and Export the Self-signed Certificate on your Brother Machine

You can store the self-signed certificates on your Brother machine and manage them by importing and exporting.

- Import the Self-signed Certificate
- Export the Self-signed Certificate
Import the Self-signed Certificate

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example:
   https://192.168.1.2

3. If the machine prompts you for a password, type it, and then click.

4. Click the Network tab.
5. Click the Security tab.
6. Click the Certificate menu in the left navigation bar.
7. Click Import Certificate and Private Key.
8. Browse to the file you want to import.
9. Type the password if the file is encrypted, and then click Submit.

The self-signed certificate is imported to your machine.

To use SSL/TLS communication, the self-signed certificate must also be installed on your computer. Contact your network administrator.

Related Information

- Import and Export the Self-signed Certificate on your Brother Machine
Export the Self-signed Certificate

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example:
   https://192.168.1.2

3. If the machine prompts you for a password, type it, and then click.
4. Click the Network tab.
5. Click the Security tab.
6. Click the Certificate menu in the left navigation bar.
7. Click Export shown with Certificate List.
8. If you want to encrypt the file, type a password in the Enter password field.
   If the Enter password field is blank, your output file will not be encrypted.
9. Type the password again in the Retype password field, and then click Submit.
10. Click Save.
11. Specify the location where you want to save the file.

The self-signed certificate is exported to your computer.

You can also import the self-signed certificate to your computer.

Related Information

- Import and Export the Self-signed Certificate on your Brother Machine
Create and Install a Certificate from a Certificate Authority (CA)

If you already have a certificate from an external trusted CA, you can store the certificate and private key on the machine and manage them by importing and exporting. If you do not have a certificate from an external trusted CA, create a Certificate Signing Request (CSR), send it to a CA for authentication, and install the returned certificate on your machine.

- Create a Certificate Signing Request (CSR)
- Install a Certificate on Your Brother Machine
- Import and Export the Certificate and Private Key
Create a Certificate Signing Request (CSR)

A Certificate Signing Request (CSR) is a request sent to a Certificate Authority (CA) to authenticate the credentials contained within the certificate.

We recommend installing a Root Certificate from the CA on your computer before creating the CSR.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example:
   https://192.168.1.2
   - If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.
     - For example:
       https://SharedPrinter
   - If you enable a NetBIOS name, you can also use the node name.
     - For example:
       https://brnxxxxxxxxxxxx
       The NetBIOS name can be found in the Network Configuration Report.
   - For Mac, access Web Based Management by clicking the machine's icon on the Status Monitor screen.
3. If the machine prompts you for a password, type it, and then click .
4. Click the Network tab.
5. Click the Security tab.
6. Click the Certificate menu in the left navigation bar.
7. Click Create CSR.
8. Type a Common Name (required) and add other information about your Organization (optional).
   - Your company details are required so that a CA can confirm your identity and verify it to the outside world.
   - The length of the Common Name must be less than 64 bytes. Enter an identifier, such as an IP address, node name, or domain name to use when accessing this printer through SSL/TLS communication. The node name is displayed by default. The Common Name is required.
   - A warning will appear if you type a different name in the URL than the Common Name that was used for the certificate.
   - The length of the Organization, the Organization Unit, the City/Locality and the State/Province must be less than 64 bytes.
   - The Country/Region should be a two character ISO 3166 country code.
   - If you are configuring an X.509v3 certificate extension, select the Configure extended partition check box, and then select Auto (Register IPv4) or Manual.
9. Select your setting from the Public Key Algorithm drop-down list. The default setting is RSA(2048bit).
10. Select your setting from the Digest Algorithm drop-down list. The default setting is SHA256.
11. Click Submit.

The CSR appears on your screen. Save the CSR as a file or copy and paste it into an online CSR form offered by a Certificate Authority.
12. Click **Save**.

- Follow your CA’s policy regarding the method to send a CSR to your CA.
- If you are using the Enterprise root CA of Windows Server® 2008/2012/2012 R2/2016, we recommend using the Web Server for the certificate template to securely create the Client Certificate. If you are creating a Client Certificate for an IEEE 802.1x environment with EAP-TLS authentication, we recommend using User for the certificate template. For more detailed information, go to your model's FAQs & Troubleshooting page on the Brother Solutions Center at support.brother.com. Search for "SSL".

---

**Related Information**

- Create and Install a Certificate from a Certificate Authority (CA)
Install a Certificate on Your Brother Machine

When you receive a certificate from a CA, follow the steps below to install it into the print server:

Only a certificate issued with your machine's CSR can be installed onto the machine. When you want to create another CSR, make sure that the certificate is installed before creating another CSR. Create another CSR only after installing the certificate on the machine. If you do not, the CSR you create before installing will be invalid.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   - For example:
     https://192.168.1.2

   • If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.
     - For example:
       https://SharedPrinter
   
   If you enable a NetBIOS name, you can also use the node name.
     - For example:
       https://brnxxxxxxxxxxxx
   
   The NetBIOS name can be found in the Network Configuration Report.

3. If the machine prompts you for a password, type it, and then click.
4. Click the Network tab.
5. Click the Security tab.
6. Click the Certificate menu in the left navigation bar.
7. Click Install Certificate.
8. Browse to the file that contains the certificate issued by the CA, and then click Submit.

   The certificate has been created successfully and saved in your machine's memory successfully.

To use SSL/TLS communication, the Root Certificate from the CA must be installed on your computer. Contact your network administrator.

Related Information

• Create and Install a Certificate from a Certificate Authority (CA)
Import and Export the Certificate and Private Key

Store the certificate and private key on your machine and manage them by importing and exporting them.

- Import a Certificate and Private Key
- Export the Certificate and Private Key
1. Start your web browser.

2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   
   For example:
   
   https://192.168.1.2

3. If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.
   
   - For example:
     
     https://SharedPrinter
   
   If you enable a NetBIOS name, you can also use the node name.
   
   - For example:
     
     https://brnxxxxxxxxxxxx
   
   The NetBIOS name can be found in the Network Configuration Report.

4. If the machine prompts you for a password, type it, and then click.

5. Click the Network tab.

6. Click the Security tab.

7. Click Import Certificate and Private Key.

8. Browse to the file you want to import.

9. Type the password if the file is encrypted, and then click Submit.

The certificate and private key are imported to your machine.

To use SSL/TLS communication, the Root Certificate from the CA must also be installed on your computer. Contact your network administrator.

Related Information

- Import and Export the Certificate and Private Key
1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example:
   https://192.168.1.2

   - If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.
   - For example:
     https://SharedPrinter
   If you enable a NetBIOS name, you can also use the node name.
   - For example:
     https://brnxxxxxxxxxxxx
   The NetBIOS name can be found in the Network Configuration Report.

3. If the machine prompts you for a password, type it, and then click.
4. Click the Network tab.
5. Click the Security tab.
6. Click the Certificate menu in the left navigation bar.
7. Click Export shown with Certificate List.
8. Enter the password if you want to encrypt the file.
   If a blank password is used, the output is not encrypted.
9. Enter the password again for confirmation, and then click Submit.
10. Click Save.
11. Specify the location where you want to save the file.

The certificate and private key are exported to your computer.

You can also import the certificate to your computer.
Import and Export a CA Certificate

You can import, export and store CA certificates on your Brother machine.

- Import a CA Certificate
- Export a CA Certificate
Import a CA Certificate

1. Start your web browser.
2. Type "https://machine's IP address" in your browser’s address bar (where "machine's IP address" is the machine’s IP address).
   For example:
   https://192.168.1.2

   • If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.
   
   - For example:
     https://SharedPrinter
     If you enable a NetBIOS name, you can also use the node name.
   
   - For example:
     https://brnxxxxxxxxxxx
     The NetBIOS name can be found in the Network Configuration Report.

3. If the machine prompts you for a password, type it, and then click .
4. Click the Network tab.
5. Click the Security tab.
6. Click CA Certificate.
7. Click Import CA Certificate.
8. Browse to the file you want to import.
9. Click Submit.

Related Information

• Import and Export a CA Certificate
Export a CA Certificate

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example:
   https://192.168.1.2

   • If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.
     - For example:
       https://SharedPrinter
   If you enable a NetBIOS name, you can also use the node name.
   - For example:
     https://brnxxxxxxxxxxxx
   The NetBIOS name can be found in the Network Configuration Report.

3. If the machine prompts you for a password, type it, and then click

4. Click the Network tab.
5. Click the Security tab.
6. Click CA Certificate.
7. Select the certificate you want to export and click Export.
8. Click Submit.
9. Click Save.
10. Specify where on your computer you want to save the exported certificate, and save it.

Related Information

• Import and Export a CA Certificate
Manage Multiple Certificates

The multiple certificate feature allows you to use Web Based Management to manage each certificate installed on your machine. In Web Based Management, navigate to the Certificate or CA Certificate screen to view certificate content, delete, or export your certificates.

<table>
<thead>
<tr>
<th>Maximum Number of Certificates Stored UP on Brother Machine</th>
</tr>
</thead>
<tbody>
<tr>
<td>Self-signed Certificate or Certificate Issued by a CA</td>
</tr>
<tr>
<td>CA Certificate</td>
</tr>
</tbody>
</table>

We recommend storing one less certificate than allowed, reserving an empty spot in case of certificate expiration. When a certificate expires, import a new certificate into the reserved spot, and then delete the expired certificate. This ensures that you avoid configuration failure.

- When you use HTTPS/IPPS, or IEEE 802.1x, you must select which certificate you are using.
- When you use SSL for SMTP communications, you do not have to choose the certificate. The necessary certificate will be chosen automatically.

Related Information

- Certificates and Web Based Management
Manage Your Network Machine Securely Using Web Based Management

To manage your network machine securely, you must use management utilities with security protocols.

We recommend using the HTTPS protocol for secure management. To use this protocol, HTTPS must be enabled on your machine.

- The HTTPS protocol is enabled by default.
- You can change the HTTPS protocol settings using the Web Based Management screen.

1. Start your web browser.
2. Type "https://Common Name" in your browser’s address bar (where "Common Name" is the Common Name that you assigned to the certificate; this could be your IP address, node name, or domain name).
3. If the machine prompts you for a password, type it, and then click .
4. You can now access the machine using HTTPS.

- If you use the SNMPv3 protocol, follow the steps below.
- You can also change the SNMP settings by using BRAdmin Professional.

5. Click the Network tab.
6. Click Protocol.
7. Make sure the SNMP setting is enabled, and then click Advanced Settings.
8. Configure the SNMP settings.

There are three options for SNMP Mode of Operation.

- **SNMP v1/v2c read-write access**
  In this mode, the print server uses version 1 and version 2c of the SNMP protocol. You can use all Brother applications in this mode. However, it is not secure since it will not authenticate the user, and data will not be encrypted.

- **SNMPv3 read-write access and v1/v2c read-only access**
  In this mode, the print server uses the read-write access of version 3 and the read-only access of version 1 and version 2c of the SNMP protocol.

When you use **SNMPv3 read-write access and v1/v2c read-only access** mode, some Brother applications (such as BRAdmin Light) that access the print server do not work correctly since they authorise the read-only access of version 1 and version 2c. If you want to use all applications, we recommend using **SNMP v1/v2c read-write access** mode.

- **SNMPv3 read-write access**
  In this mode, the print server uses version 3 of the SNMP protocol. If you want to manage the print server securely, use this mode.

When you use **SNMPv3 read-write access** mode, note the following:
- You can use only BRAdmin Professional or Web Based Management to manage the print server.
- Except for BRAdmin Professional, all applications that use SNMPv1/v2c will be restricted. To allow the use of SNMPv1/v2c applications, use **SNMPv3 read-write access and v1/v2c read-only access** or **SNMP v1/v2c read-write access** mode.

9. Click Submit.
Related Information

- Manage Your Network Machine Securely Using SSL/TLS
To use BRAdmin Professional, you must:

- Use the latest version of BRAdmin Professional. Go to your model's Downloads page on the Brother Solutions Center at support.brother.com.
- Use Web Based Management with the HTTPS protocol if you use BRAdmin Professional and Web Based Management together.
- Use a different password in each group if you are managing a mixed group of older and newer print servers with BRAdmin Professional. This will ensure security is maintained on the newer print servers.

- "Older versions of BRAdmin" refer to BRAdmin Professional older than Ver. 2.80 and BRAdmin Light for Mac older than Ver.1.10.
- "Older print servers" refer to NC-2000 series, NC-2100p, NC-3100h, NC-3100s, NC-4100h, NC-5100h, NC-5200h, NC-6100h, NC-6200h, NC-6300h, NC-6400h, NC-8000, NC-100h, NC-110h, NC-120w, NC-130h, NC-140w, NC-8100h, NC-9100h, NC-7100w, NC-7200w and NC-2200w.

**Related Information**

- Manage Your Network Machine Securely Using SSL/TLS
Print Documents Securely Using SSL/TLS

To print documents securely with IPP protocol, use the IPPS protocol.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example:
   https://192.168.1.2

   - If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.
     - For example:
       https://SharedPrinter
     If you enable a NetBIOS name, you can also use the node name.
     - For example:
       https://brnxxxxxxxxxxxx
       The NetBIOS name can be found in the Network Configuration Report.

   • For Mac, access Web Based Management by clicking the machine's icon on the Status Monitor screen.

3. If the machine prompts you for a password, type it, and then click

4. Click the Network tab.
5. Click Protocol. Make sure the IPP check box is selected.

   If the IPP check box is not selected, select the IPP check box, and then click Submit.
   Restart your machine to activate the configuration.
   After the machine restarts, return to the machine's web page, click the Network tab, and then click Protocol.

6. Click HTTP Server Settings.
7. Select the HTTPS(Port 443) check box in the IPP, and then click Submit.
8. Restart your machine to activate the configuration.

Communication using IPPS cannot prevent unauthorised access to the print server.

Related Information

- Manage Your Network Machine Securely Using SSL/TLS
Send an Email Securely

- Configure Email Sending Using Web Based Management
- Send an Email with User Authentication
- Send an Email Securely Using SSL/TLS
Configure Email Sending Using Web Based Management

We recommend using Web Based Management to configure secured email sending with user authentication, or email sending using SSL/TLS.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example:
   https://192.168.1.2
3. If the machine prompts you for a password, type it, and then click
4. Click the Network tab.
5. Click the Protocol menu in the left navigation bar.
6. In the SMTP field, click Advanced Settings and make sure the status of SMTP is Enabled.
7. Configure the SMTP settings.
   • Confirm that the email settings are correct after configuration by sending a test email.
   • If you do not know the SMTP server settings, contact your network administrator or Internet Service Provider (ISP).
8. When finished, click Submit.
   The Test Send E-mail Configuration dialog box appears.
9. Follow the instructions in the dialog box to test the current settings.

Related Information

• Send an Email Securely
Send an Email with User Authentication

Your Brother machine supports the SMTP-AUTH method to send email via an email server that requires user authentication. This method prevents unauthorised users from accessing the email server.

You can use the SMTP-AUTH method for email notification and email reports.

We recommend using Web Based Management to configure the SMTP authentication.

Email Server Settings

You must configure your machine's SMTP authentication method to match the method used by your email server. For details about your email server settings, contact your network administrator or Internet Service Provider (ISP).

To enable SMTP server authentication, in the Web Based Management SMTP screen, under Server Authentication Method, you must select SMTP-AUTH.

Related Information

- Send an Email Securely
Send an Email Securely Using SSL/TLS

Your Brother machine supports SSL/TLS communication methods. To use email server that is using SSL/TLS communication, you must configure following settings.

We recommend using Web Based Management to configure SSL/TLS.

Verify Server Certificate

Under SSL/TLS, if you choose SSL or TLS, the Verify Server Certificate check box will be selected automatically.

- Before you verify the server certificate, you must import the CA certificate issued by the CA that signed the server certificate. Contact your network administrator or your Internet Service Provider (ISP) to confirm if importing a CA certificate is necessary.
- If you do not need to verify the server certificate, clear the Verify Server Certificate check box.

Port Number

If you select SSL, or TLS, the Port value will be changed to match the protocol. To change the port number manually, type the port number after you select SSL/TLS settings.

You must configure your machine’s communication method to match the method used by your email server. For details about your email server settings, contact your network administrator or your ISP.

In most cases, the secured webmail services require the following settings:

<table>
<thead>
<tr>
<th>SMTP</th>
<th>Port</th>
<th>25</th>
</tr>
</thead>
<tbody>
<tr>
<td>Server Authentication Method</td>
<td>SMTP-AUTH</td>
<td></td>
</tr>
<tr>
<td>SSL/TLS</td>
<td>TLS</td>
<td></td>
</tr>
</tbody>
</table>
Use IEEE 802.1x Authentication for a Wired or a Wireless Network

- What Is IEEE 802.1x Authentication?
- Configure IEEE 802.1x Authentication for a Wired or a Wireless Network Using Web Based Management (Web Browser)
- IEEE 802.1x Authentication Methods
What Is IEEE 802.1x Authentication?

IEEE 802.1x is an IEEE standard for wired and wireless networks that limits access from unauthorised network devices. Your Brother machine (supplicant) sends an authentication request to a RADIUS server (Authentication server) through your access point or HUB. After your request has been verified by the RADIUS server, your machine can access the network.

Related Information

- Use IEEE 802.1x Authentication for a Wired or a Wireless Network
Configure IEEE 802.1x Authentication for a Wired or a Wireless Network Using Web Based Management (Web Browser)

- If you configure your machine using EAP-TLS authentication, you must install the client certificate issued by a CA before you start configuration. Contact your network administrator about the client certificate. If you have installed more than one certificate, we recommend writing down the certificate name you want to use.

- Before you verify the server certificate, you must import the CA certificate that has been issued by the CA that signed the server certificate. Contact your network administrator or your Internet Service Provider (ISP) to confirm whether a CA certificate import is necessary.

You can also configure IEEE 802.1x authentication using:
- BRAdmin Professional (Wired and wireless network)
- Wireless setup wizard from the control panel (Wireless network)
- Wireless setup wizard on the installation disc (Wireless network)

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example:
   https://192.168.1.2

- If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.
  - For example:
    https://SharedPrinter
    If you enable a NetBIOS name, you can also use the node name.
  - For example:
    https://brnxxxxxxxxxxxx
    The NetBIOS name can be found in the Network Configuration Report.
- For Mac, access Web Based Management by clicking the machine's icon on the Status Monitor screen.

3. If the machine prompts you for a password, type it, and then click.
4. Click the **Network** tab.
5. Do one of the following:

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Wired network</td>
<td>Click the <strong>Wired</strong> tab, and then select <strong>Wired 802.1x Authentication</strong> in the left navigation bar.</td>
</tr>
<tr>
<td>Wireless network</td>
<td>Click the <strong>Wireless</strong> tab, and then select <strong>Wireless (Enterprise)</strong> in the left navigation bar.</td>
</tr>
</tbody>
</table>

6. Configure the IEEE 802.1x authentication settings.
• To enable IEEE 802.1x authentication for wired networks, select Enabled for Wired 802.1x status on the Wired 802.1x Authentication page.

• If you are using EAP-TLS authentication, you must select the client certificate that has been installed (shown with certificate name) for verification from the Client Certificate drop-down list.

• If you select EAP-FAST, PEAP, EAP-TTLS, or EAP-TLS authentication, select the verification method from the Server Certificate Verification drop-down list. Verify the server certificate using the CA certificate, imported to the machine in advance, that has been issued by the CA that signed the server certificate.

Select one of the following verification methods from the Server Certificate Verification drop-down list:

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>No Verification</td>
<td>The server certificate can always be trusted. The verification is not performed.</td>
</tr>
<tr>
<td>CA Cert.</td>
<td>The verification method to check the CA reliability of the server certificate, using the CA certificate that has been issued by the CA that signed the server certificate.</td>
</tr>
<tr>
<td>CA Cert. + ServerID</td>
<td>The verification method to check the common name value of the server certificate, in addition to the CA reliability of the server certificate.</td>
</tr>
</tbody>
</table>

7. When finished with configuration, click Submit.

For wired networks: After configuring, connect your machine to the IEEE 802.1x supported network. After a few minutes, print the Network Configuration Report to check the Wired IEEE 802.1x Status.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Success</td>
<td>The wired IEEE 802.1x function is enabled and the authentication was successful.</td>
</tr>
<tr>
<td>Failed</td>
<td>The wired IEEE 802.1x function is enabled; however, the authentication failed.</td>
</tr>
<tr>
<td>Off</td>
<td>The wired IEEE 802.1x function is not available.</td>
</tr>
</tbody>
</table>

Related Information

• Use IEEE 802.1x Authentication for a Wired or a Wireless Network

---

1 The common name verification compares the common name of the server certificate to the character string configured for the Server ID. Before you use this method, contact your system administrator about the server certificate's common name and then configure Server ID.
IEEE 802.1x Authentication Methods

LEAP (Wireless network)

Lightweight Extensible Authentication Protocol (LEAP) is a proprietary EAP method developed by Cisco Systems, Inc., which uses a user ID and password for authentication.

EAP-FAST

Extensible Authentication Protocol-Flexible Authentication via Secured Tunneling (EAP-FAST) has been developed by Cisco Systems, Inc., which uses a user ID and password for authentication, and symmetric key algorithms to achieve a tunnelled authentication process.

The Brother machine supports the following inner authentication methods:
- EAP-FAST/NONE
- EAP-FAST/MS-CHAPv2
- EAP-FAST/GTC

EAP-MD5 (Wired network)

Extensible Authentication Protocol-Message Digest Algorithm 5 (EAP-MD5) uses a user ID and password for challenge-response authentication.

PEAP

Protected Extensible Authentication Protocol (PEAP) is a version of EAP method developed by Cisco Systems, Inc., Microsoft Corporation and RSA Security. PEAP creates an encrypted Secure Sockets Layer (SSL)/Transport Layer Security (TLS) tunnel between a client and an authentication server, for sending a user ID and password. PEAP provides mutual authentication between the server and the client.

The Brother machine supports the following inner authentications:
- PEAP/MS-CHAPv2
- PEAP/GTC

EAP-TTLS

Extensible Authentication Protocol-Tunneled Transport Layer Security (EAP-TTLS) has been developed by Funk Software and Certicom. EAP-TTLS creates a similar encrypted SSL tunnel to PEAP, between a client and an authentication server, for sending a user ID and password. EAP-TTLS provides mutual authentication between the server and the client.

The Brother machine supports the following inner authentications:
- EAP-TTLS/CHAP
- EAP-TTLS/MS-CHAP
- EAP-TTLS/MS-CHAPv2
- EAP-TTLS/PAP

EAP-TLS

Extensible Authentication Protocol-Transport Layer Security (EAP-TLS) requires digital certificate authentication both at a client and an authentication server.

Store Print Log to Network

- Store Log to Network Overview
- Configure the Store Print Log to Network Settings Using Web Based Management
- Use the Store Print Log to Network's Error Detection Setting
Store Log to Network Overview

The Store Print Log to Network feature allows you to save the print log file from your Brother machine to a network server using the Common Internet File System (CIFS) protocol. You can record the ID, type of print job, job name, user name, date, time and the number of printed pages for every print job. CIFS is a protocol that runs over TCP/IP, allowing computers on a network to share files over an intranet or the Internet.

The following print functions are recorded in the print log:

- Print jobs from your computer
- Web Connect Print (supported models only)

- The Store Print Log to Network feature supports Kerberos authentication and NTLMv2 authentication. You must configure the SNTP protocol (network time server) for Authentication.
- You can set the file type to TXT or CSV when storing a file to the server.

- Store Print Log to Network
Configure the Store Print Log to Network Settings Using Web Based Management

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example:
   https://192.168.1.2
3. If the machine prompts you for a password, type it, and then click.
4. Click the Administrator tab.
5. Click the Store Print Log to Network menu.
6. In the Print Log field, click On.
7. Configure the following settings:

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Network Folder Path</td>
<td>Type the destination folder where your log will be stored on the CIFS server (i.e., \ComputerName\SharedFolder).</td>
</tr>
<tr>
<td>File Name</td>
<td>Type the file name you want to use for the print log (up to 32 characters).</td>
</tr>
<tr>
<td>File Type</td>
<td>Select the TXT or CSV option for the Print Log file type.</td>
</tr>
<tr>
<td>Auth. Method</td>
<td>Select the authentication method required for access to the CIFS server: Auto, Kerberos, or NTLMv2. Kerberos is an authentication protocol which allows devices or individuals to securely prove their identity to network servers using a single sign-on. NTLMv2 is the authentication method used by Windows® to log into servers.</td>
</tr>
<tr>
<td></td>
<td>• Auto: If you select Auto, NTLMv2 will be used to the authentication method.</td>
</tr>
<tr>
<td></td>
<td>• Kerberos: Select the Kerberos option to use Kerberos authentication only.</td>
</tr>
<tr>
<td></td>
<td>• NTLMv2: Select the NTLMv2 option to use NTLMv2 authentication only.</td>
</tr>
<tr>
<td></td>
<td>• For the Kerberos and NTLMv2 authentication, you must also configure the SNTP protocol (network time server) and DNS server.</td>
</tr>
<tr>
<td>Username</td>
<td>Type the user name for the authentication (up to 96 characters). If the user name is part of a domain, enter the user name in one of the following styles: user@domain or domain\user.</td>
</tr>
<tr>
<td>Password</td>
<td>Type the password for the authentication (up to 32 characters).</td>
</tr>
<tr>
<td>Kerberos Server Address (if needed)</td>
<td>Type the KDC host address (for example: kerberos.example.com; up to 64 characters) or the IP address (for example: 192.168.56.189).</td>
</tr>
<tr>
<td>Error Detection Setting</td>
<td>Choose what action should be taken when the Print Log cannot be stored to the server due to a network error.</td>
</tr>
</tbody>
</table>

8. In the Connection Status field, confirm the last log status.
   You can also confirm the error status on the LCD of your machine.
9. Click Submit to display the Test Print Log to Network page.
To test your settings, click **Yes** and then go to the next step.

To skip the test, click **No**. Your settings will be submitted automatically.

10. The machine will test your settings.

11. If your settings are accepted, **Test OK** appears on the screen.

   If **Test Error** appears, check all settings, and then click **Submit** to display the Test page again.

---

**Related Information**

- Store Print Log to Network
Use Error Detection Settings to determine the action that is taken when the print log cannot be stored to the server due to a network error.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example: https://192.168.1.2
3. If the machine prompts you for a password, type it, and then click.
4. Click the Administrator tab.
5. Click the Store Print Log to Network menu in the left navigation bar.
6. In the Error Detection Setting section, select the Cancel Print or Ignore Log & Print option.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cancel Print</td>
<td>If you select the Cancel Print option, the print jobs are cancelled when the print log cannot be stored to the server.</td>
</tr>
<tr>
<td>Ignore Log &amp; Print</td>
<td>If you select the Ignore Log &amp; Print option, the machine prints the documentation even if the print log cannot be stored to the server.</td>
</tr>
</tbody>
</table>

When the store print log function has recovered, the print log is recorded as follows:

```
Id, Type, Job Name, User Name, Date, Time, Print Pages, Color Pages
1, Print(xxxxxxxx), "Document01.doc", "user01", 03/03/20xx, 14:01:32, 52, 21
2, Print(xxxxxxxx), "Document02.doc", "user01", 03/03/20xx, 14:45:30, ?, ?
3, <Error>, ?, ?, ?, ?, ?
4, Print(xxxxxxxx), "Report01.xls", "user02", 03/03/20xx, 19:30:40, 4, 4
```

a. If the log cannot be stored at the end of printing, the print log except the number of printed pages will be recorded.

b. If the print log cannot be stored at the beginning and the end of printing, the print log of the job will not be recorded. When the function has recovered, the error is reflected in the log.

7. Click Submit to display the Test Print Log to Network page.
   To test your settings, click Yes and then go to the next step.
   To skip the test, click No. Your settings will be submitted automatically.
8. The machine will test your settings.
9. If your settings are accepted, Test OK appears on the screen.
   If Test Error appears, check all settings, and then click Submit to display the Test page again.

Certain websites provide services that allow users to upload and view images and files on the websites. Your Brother machine can download and print images that are already uploaded to these services.

1. Printing
2. Photos, images, documents and other files
3. Web Service

To use Brother Web Connect, your Brother machine must be connected to a network that has access to the Internet, through either a wired or wireless connection.

For network setups that use a proxy server, the machine must also be configured to use a proxy server. If you are unsure of your network configuration, check with your network administrator.

A proxy server is a computer that serves as an intermediary between computers without a direct Internet connection, and the Internet.

Create an Account for Each Online Service Before Using Brother Web Connect

Related Models: HL-L3270CDW

To use Brother Web Connect to access an online service, you must have an account with that online service. If you do not already have an account, use a computer to access the service's website and create an account. After creating an account, log on and use the account once with a computer before using the Brother Web Connect feature. Otherwise, you may not be able to access the service using Brother Web Connect.

If you already have an account, there is no need to create an additional account.

After you finish creating an account with the online service you want to use, apply for Brother Web Connect access.

You do not need to create an account if you use the service as a guest. You can use only certain services as a guest. If the service you want to use does not have a guest-user option, you must create an account.

![Related Information]

- Set Up Brother Web Connect
To use Brother Web Connect to access online services, you must first apply for Brother Web Connect access using a computer that has the Brother Software installed.

1. Access the Brother Web Connect application website:

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Windows® 7</td>
<td>Click (Start) &gt; All Programs &gt; Brother &gt; Brother Utilities, and then click the drop-down list and select your model name (if not already selected). Click Do More in the left navigation bar, and then click Brother Web Connect.</td>
</tr>
<tr>
<td>Windows® 8</td>
<td>Launch Brother Utilities, and then click the drop-down list and select your model name (if not already selected). Click Do More in the left navigation bar, and then click Brother Web Connect.</td>
</tr>
<tr>
<td>Windows® 10</td>
<td>Launch Brother Utilities, and then click the drop-down list and select your model name (if not already selected). Click Do More in the left navigation bar, and then click Brother Web Connect.</td>
</tr>
<tr>
<td>Windows® 8.1</td>
<td>Move your mouse to the lower left corner of the Start screen and click (if you are using a touch-based device, swipe up from the bottom of the Start screen to bring up the Apps screen). Click Brother Utilities, and then click the drop-down list and select your model name (if not already selected). Click Do More in the left navigation bar, and then click Brother Web Connect.</td>
</tr>
<tr>
<td>Mac</td>
<td>Click Go in the Finder bar, Applications &gt; Brother &gt; Utilities &gt; Brother Web Connect.</td>
</tr>
</tbody>
</table>

You can also access the website directly:
Type bwc.brother.com into your web browser's address bar.

The Brother Web Connect page launches.

2. Select the service you want to use.

3. Follow the on-screen instructions and apply for access.
When finished, your temporary ID will appear.
Get connected with Brother Web Connect

Finished the registration.

Please enter the following temporary ID on the LCD screen of your machine.

Temporary ID (11 digits)

XXX XXXX XXXX

NOTE: The temporary ID will expire in 24 hours.

4. Make a note of your temporary ID, as you will need it to register accounts to the machine. The temporary ID is valid for 24 hours.
5. Close the web browser.

Now that you have a Brother Web Connect access ID, you must register this ID on your machine, and then use your machine to access the web service you want to use.

Register an Account on Your Brother Machine for Brother Web Connect

Related Models: HL-L3270CDW

You must enter your Brother Web Connect account information and configure your machine so that it can use Brother Web Connect to access the service you want.

- You must apply for Brother Web Connect access to register an account on your machine.
- Before you register an account, confirm that the correct date and time are set on the machine.

1. Press [Functions] > [Web].

   - If information regarding the Internet connection appears on the machine’s LCD, read the information and press [OK]. If you want to display this information again, press [Yes].
   - Occasionally, updates or announcements about Brother Web Connect's features will appear on the LCD. Read the information, and then press [OK].

2. If the information regarding licence agreement appears, make your selection and follow the on-screen instructions.
3. Press ▲ or ▼ to display the service with which you want to register.
4. Press the service name.
5. Press the service name.
6. Press [Register/Delete].
7. Press [Register Account].
   The machine will prompt you to enter the temporary ID you received when you applied for Brother Web Connect access.
8. Press [OK].
9. Enter the temporary ID using the LCD.
10. Press [OK].
    The machine will prompt you to enter the account name that you want to be displayed on the LCD.
11. Press [OK].
12. Enter the name using the LCD.
13. Press [OK].
14. Do one of the following:
   - To set a PIN for the account, press [Yes]. (A PIN prevents unauthorised access to the account.) Enter a four-digit number, and then press [OK].
   - If you do not want to set a PIN, press [No].
15. When the account information you entered appears, confirm that it is correct.
16. Press [Yes] to register your information as entered.

   An error message will appear on the LCD if the information you entered does not match the temporary ID you received when you applied for access, or if the temporary ID has expired. Enter the temporary ID correctly, or apply for access again to receive a new temporary ID.

17. Press [OK].
18. Press 🏠.

Registration is complete and your machine can now access the service.

Documents that have been uploaded to your account can be downloaded directly to your machine and printed. Documents that other users have uploaded to their own accounts for sharing can also be downloaded to your machine and printed, as long as you have viewing privileges for those documents. Certain services allow guest users to view documents that are public. When accessing a service or an account as a guest user, you can view documents that the owner has made public, that is, documents with no viewing restrictions.

To download other users’ documents, you must have access privileges to view the corresponding albums or documents.

If you are a restricted user for Web Connect due to the Secure Function Lock feature (available for certain models), you cannot download the data.

The Secure Function Lock Page Limit feature applies to the print job using Web Connect.

For Hong Kong, Taiwan and Korea
Brother Web Connect supports only file names written in English. Files named in the local language will not be downloaded.

Error and Maintenance Messages

- **HL-L3270CDW**
  If the LCD displays errors and your Android™ device supports the NFC feature, touch your device to the NFC symbol on your Brother machine to access the Brother Solutions Center and browse the latest FAQs from your device. (Your mobile telephone provider’s message and data rates may apply.)

Make sure the NFC settings of both your Brother machine and your Android™ device are set to On.

As with any sophisticated office product, errors may occur and supply items may have to be replaced. If this happens, your machine identifies the error or required routine maintenance and shows the appropriate message. The most common error and maintenance messages are shown in the table.

Follow the instructions in the **Action** column to solve the error and remove the message.

You can correct most errors and perform routine maintenance by yourself. If you need more tips: Visit [support.brother.com](http://support.brother.com), and click the **FAQs & Troubleshooting** page.

Paper Jams

Always remove the remaining paper from the paper tray and straighten the stack when you are adding new paper. This helps prevent multiple sheets of paper from feeding through the machine at one time and prevents paper jams.

- Paper is Jammed in the Manual Feed Slot
- Paper is Jammed in the Paper Tray
- Paper is Jammed in the Back of the Machine
- Paper is Jammed Inside the Machine
- Paper is Jammed underneath the Paper Tray
Paper is Jammed in the Manual Feed Slot

If the machine's control panel or the Status Monitor indicates that there is a jam in the machine's manual feed slot, follow these steps:

1. Gently remove any paper that is jammed in or around the manual feed slot.

2. Reload the paper into the manual feed slot.

3. Do one of the following:
   - HL-L3210CW/HL-L3230CDW
     Press Go to resume printing.
   - HL-L3270CDW
     Press [Retry] to resume printing.

Related Information

- Paper Jams
If the machine's control panel or the Status Monitor indicates that there is a jam in the paper tray, follow these steps:

1. Pull the paper tray completely out of the machine.

2. Slowly pull out the jammed paper.

   Pulling the jammed paper downward using both hands allows you to remove the paper more easily.

3. Fan the stack of paper to prevent further jams, and slide the paper guides to fit the paper size.

4. Make sure the paper is below the maximum paper mark (▼▼▼).
5. Put the paper tray firmly back in the machine.

**Related Information**

- Paper Jams
Paper is Jammed in the Back of the Machine

If the machine's control panel or the Status Monitor indicates that there is a jam in the back (Rear) of the machine, follow these steps:

1. Leave the machine turned on but do not use it for 10 minutes to allow its internal fan to cool the extremely hot parts inside the machine.
2. Open the back cover.

3. Pull the green tabs at the left and right sides toward you to release the fuser cover.

**WARNING**

HOT SURFACE

The machine's internal parts will be extremely hot. Wait for the machine to cool down before touching them.

If the grey envelope levers inside the back cover are pulled down to the envelope position, lift these levers to the original position before pulling the green tabs down.

4. Use both hands to gently pull the jammed paper out of the fuser unit.
5. Close the fuser cover.

If you print on envelopes, pull down the grey envelope levers to the envelope position again before closing the back cover.

6. Close the back cover until it locks in the closed position.

Related Information

- Paper Jams
Paper is Jammed Inside the Machine

If the machine's control panel or the Status Monitor indicates that there is a jam inside the machine, follow these steps:

1. Leave the machine turned on but do not use it for 10 minutes to allow its internal fan to cool the extremely hot parts inside the machine.
2. Open the top cover until it locks in the open position.

**WARNING**

HOT SURFACE

The machine's internal parts will be extremely hot. Wait for the machine to cool down before touching them.

3. Remove all of the toner cartridge and drum unit assemblies.

**CAUTION**

We recommend placing the toner cartridge and drum unit assemblies on a clean, flat surface with disposable paper underneath it in case you accidentally spill or scatter toner.
IMPORTANT

To prevent damage to the machine from static electricity, DO NOT touch the electrodes shown in the illustration.

4. Gently remove the jammed paper slowly.

5. Reinsert each toner cartridge and drum unit assembly into the machine. Make sure that you match the toner cartridge colour to the same colour label on the machine for all four toner cartridge and drum unit assemblies.

6. Close the machine's top cover.
Related Information

- Paper Jams
If the machine's control panel or the Status Monitor indicates that there is a jam in the paper tray, follow these steps:

1. Leave the machine turned on but do not use it for 10 minutes to allow its internal fan to cool the extremely hot parts inside the machine.
2. Pull the paper tray completely out of the machine.
3. Make sure the jammed paper does not remain inside the machine.
4. If paper is not jammed inside the machine, remove the paper from the paper tray, flip it over, and check underneath the paper tray.
5. If the paper is not jammed in the paper tray, open the back cover.

⚠️ **WARNING**

**HOT SURFACE**
The machine's internal parts will be extremely hot. Wait for the machine to cool down before touching them.
6. Use both hands to gently pull the jammed paper out of the back of the machine.

7. Close the back cover until it locks in the closed position.
8. Put the paper tray firmly back in the machine.

## Printing Problems

If, after reading this table, you still need help, go to the Brother Solutions Center at [support.brother.com](http://support.brother.com).

<table>
<thead>
<tr>
<th>Difficulties</th>
<th>Suggestions</th>
</tr>
</thead>
</table>
| No printout      | Check the machine is not in Power Off mode.  
If the machine is in Power Off mode, press on the control panel, and then send the print data again.  
Check that the correct printer driver has been installed and selected.  
Check to see if the Status Monitor or the machine’s control panel displays an error status.  
Check that the machine is online:  
• Windows® 7 and Windows Server® 2008 R2  
  Click (Start) >Devices and Printers. Right-click Brother XXX-XXXX and click See what's printing. Click Printer in the menu bar. Make sure Use Printer Offline is not selected.  
• Windows Server® 2008  
  Click (Start) >Control Panel > Hardware and Sound > Printers. Right-click Brother XXX-XXXX. Make sure Use Printer Online is not listed. If it is listed, click this option to set the driver Online.  
• Windows® 8 and Windows Server® 2012  
  Move your mouse to the lower right corner of your desktop. When the menu bar appears, click Settings > Control Panel > Hardware and Sound > Devices and Printers. Right-click the Brother XXX-XXXX. Click See what's printing. If printer driver options appear, select your printer driver. Click Printer in the menu bar and make sure that Use Printer Offline is not selected.  
• Windows® 10 and Windows Server® 2016  
  Click > Windows System > Control Panel. In the Hardware and Sound group, click View devices and printers. Right-click the Brother XXX-XXXX. Click See what's printing. If printer driver options appear, select your printer driver. Click Printer in the menu bar and make sure that Use Printer Offline is not selected.  
• Windows Server® 2012 R2  
  Click Control Panel on the Start screen. In the Hardware group, click View devices and printers. Right-click the Brother XXX-XXXX. Click See what's printing. If printer driver options appear, select your printer driver. Click Printer in the menu bar and make sure Use Printer Offline is not selected.  
• Mac  
  Click the System Preferences menu, and then select the Printers & Scanners option. When the machine is offline, delete it using the button, and then add it using the button. |

<tbody>
<tr>
<td>The machine is not printing or has stopped printing.</td>
<td>Cancel the print job and clear it from the machine’s memory. The printout may be incomplete. Send the print data again. See Related Information: Cancel a Print Job.</td>
</tr>
<tr>
<td>The headers or footers appear when the document displays on the screen but they do not show up when it is printed.</td>
<td>There is an unprintable area on the top and bottom of the page. Adjust the top and bottom margins in your document to allow for this.</td>
</tr>
<tr>
<td>The machine prints unexpectedly or it prints garbage.</td>
<td>Cancel the print job and clear it from the machine’s memory. The printout may be incomplete. Send the print data again. See Related Information: Cancel a Print Job.</td>
</tr>
<tr>
<td>The machine prints the first couple of pages correctly, then some pages have missing text.</td>
<td>Check the settings in your application to make sure they are set up to work with your machine. Confirm that the Brother printer driver is selected in your application's Print window.</td>
</tr>
<tr>
<td>The machine does not print on both sides of the paper even though the printer driver setting is 2-sided and the machine supports automatic 2-sided printing.</td>
<td>Check the paper size setting in the printer driver. You must select A4 paper. Supported paper weight is 60 to 163 g/m².</td>
</tr>
<tr>
<td>Print speed is too slow.</td>
<td>Try changing the printer driver setting. The highest resolution needs longer data processing, sending and printing time.</td>
</tr>
<tr>
<td></td>
<td>If you have enabled the Quiet Mode, disable the Quiet Mode on the printer driver or the machine’s menu setting.</td>
</tr>
<tr>
<td>The machine does not feed paper.</td>
<td>If there is paper in the paper tray, make sure it is straight. If the paper is curled, straighten it. Sometimes it is helpful to remove the paper, turn the stack over and place it back in the paper tray. Reduce the amount of paper in the paper tray, and then try again.</td>
</tr>
<tr>
<td></td>
<td>(For models with Manual Feed Slot)Make sure Manual is not selected for Paper Source in the printer driver. Clean the paper pick-up rollers.</td>
</tr>
<tr>
<td>The machine does not feed paper from the Manual feed slot. (For models with Manual Feed Slot)</td>
<td>Use both hands to push one sheet of paper firmly into the manual feed slot until the top edge of the paper presses against the paper feed rollers. Continue pressing the paper against the rollers until the machine grabs the paper and pulls it in further. Put only one sheet of paper in the manual feed slot. Make sure Manual is selected as Paper Source in the printer driver.</td>
</tr>
<tr>
<td>The machine does not feed envelopes. (For models with Manual Feed Slot)</td>
<td>(For models with Manual Feed Slot)Load one envelope at a time in the manual feed slot. Your application must be set to print the envelope size you are using. This is usually done in the Page Setup or Document Setup menu of your application.</td>
</tr>
</tbody>
</table>
• Monitor the Status of the Machine from Your Computer (Windows®)
• Monitor the Status of the Machine from Your Computer (Mac)
• Cancel a Print Job
• Load and Print Using the Paper Tray
• Clean the Paper Pick-up Rollers
**Improve the Print Quality**

If you have a print quality problem, print a test page first. If the printout looks good, the problem is probably not the machine. Check the interface cable connections and try printing a different document. If the printout or test page printed from the machine has a quality problem, check the examples of poor print quality and follow the recommendations in the table.

**IMPORTANT**

Using non-genuine supplies may affect the print quality, hardware performance, and machine reliability.

1. To get the best print quality, we suggest using recommended print media. Make sure you use paper that meets our specifications.
2. Check that the toner cartridge and drum unit assemblies are installed correctly.

## Related Information

- Network Problems
Use the Network Connection Repair Tool (Windows®)

Use the Network Connection Repair Tool to fix the Brother machine’s network settings. It will assign the correct IP address and Subnet Mask.

- Windows® 7/Windows® 8/Windows® 10
  You must log on with Administrator rights.
- Make sure the Brother machine is turned on and is connected to the same network as your computer.

1. Do one of the following:

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Windows Server® 2008</td>
<td>Click (Start) &gt; All Programs &gt; Brother &gt; Brother Utilities. Click the drop-down list and select your model name (if not already selected). Click Tools in the left navigation bar, and then click Network Connection Repair Tool.</td>
</tr>
<tr>
<td>Windows® 7</td>
<td>Click (Start) &gt; All Programs &gt; Brother &gt; Brother Utilities. Click the drop-down list and select your model name (if not already selected). Click Tools in the left navigation bar, and then click Network Connection Repair Tool.</td>
</tr>
<tr>
<td>Windows® 8/Windows® 10</td>
<td>Launch (Brother Utilities), and then click the drop-down list and select your model name (if not already selected). Click Tools in the left navigation bar, and then click Network Connection Repair Tool.</td>
</tr>
<tr>
<td>Windows Server® 2012 / 2012 R2 / 2016</td>
<td>Launch (Brother Utilities), and then click the drop-down list and select your model name (if not already selected). Click Tools in the left navigation bar, and then click Network Connection Repair Tool.</td>
</tr>
</tbody>
</table>

If the User Account Control screen appears, click Yes.

2. Follow the on-screen instructions.
3. Check the diagnosis by printing the Network Configuration Report or the Printer Settings page.

The Network Connection Repair Tool will start automatically if you select the Enable Connection Repair Tool option in the Status Monitor. Right-click the Status Monitor screen, and then click Other Settings > Enable Connection Repair Tool. This is not recommended when your network administrator has set the IP address to Static, since it will automatically change the IP address.

If the correct IP address and the Subnet Mask are still not assigned even after using the Network Connection Repair Tool, ask your network administrator for this information.

Routine Maintenance

• Replace Supplies
• Clean the Machine
• Calibrate Colour Output
• Correct Colour Print Alignment (Colour Registration)
• Check the Remaining Part Life
• Pack and Ship Your Brother Machine
• Replace Periodic Maintenance Parts
Replace Supplies

You must replace supplies when the machine indicates that the life of the supply is over. Using non-Brother supplies may affect the print quality, hardware performance, and machine reliability. The toner cartridge and drum unit are two separate supplies. Make sure both are installed as an assembly. The model name of supplies may vary depending on the country.

NOTE

• Be sure to seal up the used supplies tightly in a bag so that toner powder does not spill out of the cartridge.
• Visit www.brother.com/original/index.html for instructions on how to return your used supplies to the Brother collection and recycling program. If your local Brother office does not have the collection program yet, or you choose not to return your used supply, discard the used supply according to local regulations, keeping it separate from domestic waste. If you have questions, contact your local waste disposal office.
• We recommend placing used and new supplies on a piece of paper to prevent accidentally spilling or scattering the material inside.
• If you use paper that is not a direct equivalent for the recommended print media, the life of supplies and machine parts may be reduced.
• The projected life for each of the toner cartridges is based on ISO/IEC 19798. Frequency of replacement will vary depending on the print volume, percentage of coverage, types of media used, and powering on/off the machine.
• Frequency of replacing supplies except toner cartridges will vary depending on the print volume, types of media used, and powering on/off the machine.
• Handle the toner cartridge carefully. If toner scatters on your hands or clothes, immediately wipe or wash it off with cold water.
• To avoid print quality problems, DO NOT touch the shaded parts shown in the illustrations.

Replace the Toner Cartridge

Before starting the replacement procedure, see Related Information: Replace Supplies.

1. Make sure the machine is turned on.
2. Open the top cover until it locks in the open position.

![Diagram of the machine with the top cover open]

**WARNING**

HOT SURFACE

The machine's internal parts will be extremely hot. Wait for the machine to cool down before touching them.

3. Remove the toner cartridge and drum unit assembly for the colour shown on the LCD.
CAUTION

We recommend placing the toner cartridge and drum unit assemblies on a clean, flat surface with disposable paper underneath it in case you accidentally spill or scatter toner.

IMPORTANT

To prevent damage to the machine from static electricity, DO NOT touch the electrodes shown in the illustration.

4. Push down the green lock lever and remove the toner cartridge from the drum unit.
5. Unpack the new toner cartridge.

6. Remove the protective cover.

The shape of the toner cartridge will vary depending on your country and region.

7. Insert the new toner cartridge firmly into the drum unit until you hear it lock into place.

Make sure you put the toner cartridge in correctly or it may separate from the drum unit.

8. Clean the corona wire inside the drum unit by gently sliding the green tab from left to right and right to left several times. Repeat this for all the corona wires.

Be sure to return the green tab to the Home position (▲). The arrow on the tab must be aligned with the arrow on the drum unit. If it is not, printed pages may have a vertical stripe.
9. Slide the toner cartridge and drum unit assemblies into the machine. Make sure that you match the toner cartridge colour to the same colour label on the machine.

10. Close the machine's top cover.

- After replacing a toner cartridge, DO NOT turn the machine off or open the top cover until the machine's display returns to Ready Mode.
- The toner cartridge that comes with your Brother machine is an Inbox toner cartridge.
- We recommend keeping a new toner cartridge ready for use when you see the Toner Low warning.
- To ensure high quality printing, we recommend using only Brother Original toner cartridges. When you want to buy toner cartridges, contact Brother customer service or your local Brother dealer.
- DO NOT unpack the new toner cartridge until you are ready to install it.
- If a toner cartridge is left unpacked for a long time, the toner life will be shortened.
- Brother strongly recommends you DO NOT refill the toner cartridge provided with your machine. We also strongly recommend you continue to use only Brother Original replacement toner cartridges. Use or attempted use of third-party toner and/or cartridges in the Brother machine may cause damage to the machine and/or may result in unsatisfactory print quality. Our limited warranty coverage does not apply to any problem that is caused by the use of third party toner and/or cartridges. To protect your investment and obtain premium performance from the Brother machine, we strongly recommend the use of Brother Original Supplies.

Replace the Drum Unit

1. Make sure the machine is turned on.
2. Open the top cover until it locks in the open position.

**WARNING**

HOT SURFACE
The machine's internal parts will be extremely hot. Wait for the machine to cool down before touching them.

3. Remove the toner cartridge and drum unit assembly for the colour shown on the LCD.
**CAUTION**

We recommend placing the toner cartridge and drum unit assemblies on a clean, flat surface with disposable paper underneath it in case you accidentally spill or scatter toner.

**IMPORTANT**

To prevent damage to the machine from static electricity, DO NOT touch the electrodes shown in the illustration.

4. Push down the green lock lever and remove the toner cartridge from the drum unit.
5. Unpack the new drum unit.

6. Remove the protective cover.

7. Reinsert the toner cartridge firmly into the new drum unit until you hear it lock into place.

Make sure you put the toner cartridge in correctly or it may separate from the drum unit.

8. Clean the corona wire inside the drum unit by gently sliding the green tab from left to right and right to left several times. Repeat this for all the corona wires.

Be sure to return the green tab to the Home position (▲). The arrow on the tab must be aligned with the arrow on the drum unit. If it is not, printed pages may have a vertical stripe.
9. Slide the toner cartridge and drum unit assemblies into the machine. Make sure that you match the toner cartridge colour to the same colour label on the machine.

10. Close the machine's top cover.

11. Reset the drum counter by following the next section.

NOTE

• Drum wear and tear occurs due to use and rotation of the drum and interaction with paper, toner and other materials in the paper path. In designing this product, Brother decided to use the number of rotations of the drum as a reasonable determinant of the drum life. When a drum reaches the factory-established rotation limit corresponding to the rated page yield, the product's LCD will advise you to replace the drum. The product will continue to function; however, print quality may not be optimal.

• If an unpacked drum unit is placed in direct sunlight (or artificial light for long periods of time), the unit may be damaged.

• There are many factors that determine the actual drum life, such as the temperature, humidity, type of paper, type of toner used and so on. Under ideal conditions, the average drum life is estimated at approximately 18,000 pages based on one page per job [A4/letter simplex pages]. The number of pages may be affected due to a variety of factors including but not limited to media type and media size.

Because we have no control over the many factors that determine the actual drum life, we cannot guarantee a minimum number of pages that will be printed by your drum.

• For best performance, use only Brother Original toner.

• The machine should be used only in a clean, dust-free environment with adequate ventilation.

Printing with a non-Brother drum unit may reduce not only the print quality but also the quality and life of the machine itself. Warranty coverage does not apply to problems caused by the use of a non-Brother drum unit.

IMPORTANT

• To avoid print quality issues or damage to the machine, DO NOT reset the drum counter unless you are replacing the drum unit.

• If you reset the drum counter without replacing the drum unit, the machine will not be able to correctly calculate the remaining drum life.

• Using non-genuine Brother supplies may affect the print quality, hardware performance, and machine reliability.

Reset the Drum Counter (HL-L3210CW/HL-L3230CDW)

1. Make sure the machine is turned on.

2. Make sure the machine's cover is closed.

3. Press OK and ▲ at the same time.
4. Press **OK** to select **[Drum]**.
5. Select the toner colour for the drum unit you just replaced, and then press **OK**.
6. Select **[Reset]** to reset the drum counter.

---

**Reset the Drum Counter (HL-L3270CDW)**

1. Make sure the machine is turned on.
2. Press and hold **▌▌** for about five seconds.
3. Press **[Drum]**.
4. Select the toner colour for the drum unit you just replaced.
5. Press **[Yes]**.

### Level 3 | Level 4 | Descriptions
---|---|---
**Interface** | Select | Select the interface to use. If you select the Auto option, the machine changes the interface to USB or Network depending on which interface is receiving data.

**Auto IF Time** | | Set the time-out period for the auto interface selection.

**Input Buffer** | | Increase or decrease the input buffer capacity.

**Delete Storage** | **Macro ID** | Delete the registered Macro data.

**Font ID** | Delete the registered Font data.

**Format** | | Restore the Macro and Font data of your machine to the default settings.

---

**[All Settings] > [Printer]**

| Level 3 | Level 4 | Level 5 | Descriptions
---|---|---|---
**Emulation** | - | - | Choose the emulation mode.

**Quality** | - | - | Select the print quality.

**Print Options** | **Font List** | **HP LaserJet** | Print the font list and samples of HP LaserJet.

**BR-Script 3** | Print the font list and samples of BR-Script.

**Test Print** | - | - | Print the test page.

**2-sided** | **2-sided Print** | - | Select whether to print on both sides of the paper.

**Single Image** | - | For a print job where the last page is a 1-sided image, select the 1-sided Feed option to reduce printing time. When you use preprinted paper, you must select the 2-sided Feed option. If you select 1-sided Feed for preprinted paper, the last page will be printed on the reverse side.

**Auto Continue** | - | - | Select if you want the machine to clear paper size errors or media type errors automatically, and use paper from other trays.

**Output Colour** | - | - | Set the output colour.

**Paper Type** | - | - | Set the type of paper.

**Paper Size** | - | - | Set the size of paper.

**Copies** | - | - | Set the number of printed pages.

**Orientation** | - | - | Set pages to print in either portrait or landscape orientation.

**Print Position** | **X Offset** | - | Move the print start position (at the top-left corner of pages) horizontally up to -500 (left) to +500 (right) dots in 300 dpi.

**Y Offset** | - | Move the print start position (at the top-left corner of pages) vertically up to -500 (up) to +500 (down) dots in 300 dpi.

**Auto FF** | - | - | Allow the machine to print any remaining data automatically.

**HP LaserJet** | **Font No.** | **Font No.** | Set the font number.

**Soft Font No.** | Set the soft font number. This menu appears if a soft font is installed on your Brother machine.

**Font Pitch** | - | Set the font pitch. (Available for certain font numbers)

1 On connection to the network, if the machine’s ‘Boot Method’ is ‘Auto’ the machine will attempt to set the IP address and Subnet Mask from a boot server such as DHCP. If a boot server cannot be found, an APIPA IP address will be allocated, such as 169. 254. [001-254]. [000-255]. If the ‘Boot Method’ of the machine is set to ‘Static’ you must manually enter an IP address from the machine’s control panel.

Change Machine Settings from Your Computer

• Change Machine Settings Using Web Based Management

• Where Can I Find My Brother Machine’s Network Settings?

• Network Management Software and Utilities
Web Based Management is a utility that uses a standard web browser to manage your machine using the Hyper Text Transfer Protocol (HTTP) or Hyper Text Transfer Protocol over Secure Socket Layer (HTTPS).

- What is Web Based Management?
- Access Web Based Management
- Set or Change a Login Password for Web Based Management
- Network Management Software and Utilities
- Learn about Network Management Software and Utilities
What is Web Based Management?

Web Based Management is a utility that uses a standard web browser to manage your machine using the Hyper Text Transfer Protocol (HTTP) or Hyper Text Transfer Protocol over Secure Socket Layer (HTTPS). Type your machine’s IP address into your web browser to access and change your print server settings.

- We recommend Microsoft® Internet Explorer® 11/Microsoft Edge for Windows® and Safari 10/11 for Mac. Make sure that JavaScript and Cookies are always enabled in whichever browser you use.
- You must use the TCP/IP protocol on your network and have a valid IP address programmed into the print server and your computer.

The actual screen may differ from the screen shown above.

Related Information

- Change Machine Settings Using Web Based Management
We recommend using the HTTPS security protocol when configuring settings using Web Based Management.

When you use HTTPS for Web Based Management configuration, your browser will display a warning dialog box. To avoid displaying the warning dialog box, you can install a self-signed certificate to use SSL/TLS communication. For more detailed information, see Related Information.

The default login password to manage machine settings is initpass. We recommend you change it to protect your machine from unauthorised access.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example:
   https://192.168.1.2
   - If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.
   - For example:
     https://SharedPrinter
     If you enable a NetBIOS name, you can also use the node name.
     - For example:
       https://brnxxxxxxxxxxxx
   The NetBIOS name can be found in the Network Configuration Report.
   - For Mac, access Web Based Management by clicking the machine's icon on the Status Monitor screen.
3. If the machine prompts you for a password, type it, and then click Submit. You can now change the print server settings.

If you change the protocol settings, you must restart the machine after clicking Submit to activate the configuration.

Every time you access Web Based Management, type the password in the Login field, and then click Submit. After configuring the settings, log out by clicking Submit.

Related Information

- Change Machine Settings Using Web Based Management
- Print the Network Configuration Report
- Create a Self-signed Certificate
- Install the Self-signed Certificate for Windows® users with Administrator Rights
Set or Change a Login Password for Web Based Management

We recommend changing the default login password to prevent unauthorised access to Web Based Management.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example:
   https://192.168.1.2

   • If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.
     - For example:
       https://SharedPrinter
     If you enable a NetBIOS name, you can also use the node name.
     - For example:
       https://brnxxxxxxxx
     The NetBIOS name can be found in the Network Configuration Report.
   • For Mac, access Web Based Management by clicking the machine's icon on the Status Monitor screen.

3. Do one of the following:
   • If you have previously set your own password, type it, and then click .
   • If you have not previously set your own password, type initpass, and then click

4. Click Administrator.
5. Type the password you want to use in the Enter New Password field (8 to 32 characters).
6. Retype the password in the Confirm New Password field.
7. Click Submit.

#### USB

1. **Hi-Speed USB 2.0**
   - Use a USB 2.0 interface cable that is no more than 2 metres long.

2. **LAN**
   - HL-L3230CDW/HL-L3270CDW
   - 10Base-T/100Base-TX

3. **Wireless LAN**
   - IEEE 802.11b/g/n (Infrastructure Mode)
   - IEEE 802.11g/n (Wi-Fi Direct®)

4. **NFC**
   - HL-L3270CDW
   - Yes

---

1. Your machine has a USB 2.0 Hi-Speed interface. The machine can also be connected to a computer that has a USB 1.1 interface.
2. Third party USB ports are not supported.
3. Use a straight-through Category 5 (or greater) twisted-pair cable.

### Supported Protocols and Security Features

#### Ethernet

10Base-T/100Base-TX

#### Wireless LAN

- IEEE 802.11b/g/n (Infrastructure Mode), IEEE 802.11g/n (Wi-Fi Direct)

#### Protocols (IPv4)

- ARP, RARP, BOOTP, DHCP, APIPA (Auto IP), WINS/NetBIOS name resolution, DNS Resolver, mDNS, LLNMR responder, LPR/LPD, Custom Raw Port/Port9100, IPP/IPPS, FTP Server, TELNET Server, HTTP/HTTPS server, TFTP client and server, SMTP Client, SNMPv1/v2c/ v3, ICMP, Web Services (Print), CIFS client, SNTP client

#### Protocols (IPv6)

- NDP, RA, DNS resolver, mDNS, LLNMR responder, LPR/LPD, Custom Raw Port/Port9100, IPP/IPPS, FTP Server, TELNET Server, HTTP/HTTPS server, TFTP client and server, SMTP Client, SNMPv1/v2c/v3, ICMPv6, Web Services (Print), CIFS Client, SNTP Client

#### Network Security (Wired)

- SMTP-AUTH, SSL/TLS (IPPS, HTTPS, SMTP, POP), SNMP v3, 802.1x (EAP-MD5, EAP-FAST, PEAP, EAP-TLS, EAP-TTLS), Kerberos

#### Network Security (Wireless)

- SMTP-AUTH, SSL/TLS (IPPS, HTTPS, SMTP, POP), SNMP v3, 802.1x (LEAP, EAP-FAST, PEAP, EAP-TLS, EAP-TTLS), Kerberos

#### Wireless Network Security

- WEP 64/128 bit, WPA-PSK (TKIP/AES), WPA2-PSK (TKIP/AES)

---

11 Wi-Fi Direct supports WPA2-PSK (AES) only.

How to Enter Text on Your Brother Machine

**HL-L3210CW/HL-L3230CDW**

When text is required, enter characters on the machine. The characters that are available may differ depending on the operation you perform.

- Hold down or repeatedly press ▲ or ▼ to select a character from this list:
  0123456789abcdefghijklmnopqrstuvwxyzABCDEFGHIJKLMNOPQRSTUVWXYZ(space)!"#$%&'()*+,-./:;<=>?@[]\]^_'{|}~
- Press OK when the character or symbol you want is displayed, and then enter the next character.
- Press Back to delete characters entered incorrectly.

**HL-L3270CDW**

- When you must enter text on your Brother machine, a keyboard appears on the LCD.
- The characters that are available may differ depending on your country.
- The keyboard layout may differ depending on the operation you perform.

- Press △1@ to cycle between letters, numbers and special characters.
- Press ◀aA to cycle between lowercase and uppercase letters.
- To move the cursor to the left or right, press ◀ or ▶.

**Inserting spaces**

- To enter a space, press [Space].

**Making corrections**

- If you entered a character incorrectly and want to change it, press ◀ or ▶ to move the cursor to the incorrect character and press x. Enter the correct character.
- To insert a character, press ◀ or ▶ to move the cursor to the correct place, and then enter the character.
- Press x for each character you want to erase, or press and hold x to erase all the characters.

Related Information

Important Information About Toner Cartridge Life

Toner Cartridge Life

This product detects the life of the toner cartridges using the following two methods:

- Detection by counting the dots of each colour that are necessary to create an image
- Detection by counting the rotations of the developer roller

This product has a function that will count the dots of each colour used to print every document and the rotations of each toner cartridge's developer roller. The print operation will stop when either of the upper limits is reached. The upper limit is set above the number of dots or rotations that would be required for the cartridge to perform consistently with its advertised page yield. This function is intended to reduce the risk of poor print quality and damage to the machine.

There are two messages that indicate when the toner is low or needs replacing: Toner Low and Replace Toner. Toner Low is displayed on the LCD when the number of dots or rotations of the developer roller nears its maximum count: Replace Toner is displayed on the LCD when the number of dots or rotations of the developer roller reaches its maximum count.

Colour Correction

The number of developer roller rotations that are counted may not only be for normal operations, such as printing and copying, but also for machine adjustments, such as Colour Calibration and Colour Registration.

Colour Calibration (Adjustment of Colour Density)

To obtain stable print quality, the density of each toner cartridge needs to be maintained at a fixed value. If the density balance between the colours cannot be kept, the tint becomes unstable, and accurate colour reproduction becomes unavailable. The toner density can change due to chemical changes to the toner that affect its electrical charge, deterioration of the developer unit, and temperature and humidity levels in the machine. During calibration, the density level adjustment test patterns are printed on the belt unit.

Calibration is mainly performed at the following times:

- When the user manually selects calibration from the operation panel or the printer driver.
  
  (Please perform calibration if colour density needs to be improved.)

- When a used toner cartridge is replaced with a new one.

- When the machine detects that the ambient temperature and humidity have changed.

- When a specified number of printed pages is reached.

Colour Registration (Correction of Colour Position)

In this machine, the drum unit and developer unit are prepared for black (K), yellow (Y), magenta (M), and cyan (C), respectively. Four colour images are combined into one image, and therefore colour registration errors (for example, how the four colour images align) might occur. When registration errors occur, registration correction test patterns are printed on the belt unit.

Registration is mainly performed at the following times:

- When the user manually selects registration from the operation panel.
  
  (Please perform registration if a colour registration error needs to be corrected.)

- When a specified number of printed pages is reached.

Related Information

- Appendix
Information Regarding Recycled Paper

- Recycled paper is of the same quality as paper made from original forest sources. Standards governing modern recycled paper ensure that it meets the highest quality requirements for different printing processes. The imaging equipment supplied by the VA signatories is suitable for using with recycled paper meeting the EN 12281:2002 standard.

- Purchasing recycled paper saves natural resources and promotes the circular economy. Paper is made using cellulose fibres from wood. Collecting and recycling paper extends the life of fibres over multiple life cycles, making the best use of the resources.

- The recycled paper production process is shorter. The fibres have already been processed, so less water and energy, and fewer chemicals are used.

- Paper recycling has the benefit of saving carbon by diverting paper products from alternative disposal routes such as landfill and incineration. Landfill waste emits methane gas, which has a powerful greenhouse effect.
