

Four Reasons Why Your SMB Needs a Chromebook

ASUS and Chrome Enterprise provide professionals the technology to tackle their business needs effectively in the office or at home. Remote employees can stay productive while IT admin increases security, manages devices, and deploys to new teams to get them online quickly and easily. With a versatile design and a light build to fit in any workspace, the ASUS Chromebook is geared to match business needs.

Finding the right ASUS Chromebook

ASUS Chromebook Flip C434

- Match your workspace needs by flipping to a tent, stand and tablet mode
- Up to 10 hours to last the full workday
- 4-way NanoEdge display with Hi-Res screen

- Up to 4GB Ram with up to an Intel Core m3 Processor

ASUS Chromebook Flip C436

- Powerful performance with up to a 10th Gen i5 Core Processor
- Unlock with just a fingerprint to quickly sign in
- Quad-speakers certified by Harman/Kardon
- Up to 12 hours to last the full work-day
- USI stylus compatibility

ASUS and Chrome Enterprise make working remotely seamless

Quick Deployment

Simply flip open your Chromebook to either tent, flat, or tablet mode depending on how you work. Boot up the Chromebook in seconds and have quick access to all your cloud-based apps and files.

Remote Management

Thin and lightweight devices make it easy for IT administrators to set policies with Google Admin Console and enable or disable workforce access from anywhere.

Security Everywhere

Regular security updates ensure powerful performance and virus protection without disrupting the workday.

Apps for Every Employee

With battery life to last the full workday, boost productivity with GSuite or Office 365 through the Google Play Store. Virtualization solutions support a range of additional Windows and non-cloud applications.
