

EP4-1104 Server

POWERED BY HOWARD INNOVATION

Expandable Server Solutions

When it comes to business, one size does not fit all. Howard knows that, so we build our servers accordingly. Howard's Esteem EP4-1104 is designed with small business in mind, with Intel® Xeon® E-2400 series processors that can handle current needs and yet are powerful enough to manage expansion as your business grows. The Esteem EP4-1104 provides a platform that delivers complete reliability and performance for small business workloads. And when you own your server, you're in control, you don't pay someone else for the privilege of accessing your data. Your business data is located on-premises, enabling day-to-day data exchange without requiring email or Internet, making it quicker and more secure. With Howard's Esteem EP4-1104 server, your business is just that—your business. Utilizing Intel's E-2400 processor family increases performance per rack-unit and reduces total cost of ownership (TCO), making Howard's Esteem EP4-1104 an exceptional value.

Howard Server Solutions Are Good for Business!

HOWARD

EP4-1104 Server Specifications

Chipset

Intel® 266
